Commonsense Reasoning Erik T. Mueller, 2014-11-11 To endow computers with common sense is one of the major long term goals of artificial intelligence research One approach to this problem is to formalize commonsense reasoning using mathematical logic Commonsense Reasoning An Event Calculus Based Approach is a detailed high level reference on logic based commonsense reasoning It uses the event calculus a highly powerful and usable tool for commonsense reasoning which Erik Mueller demonstrates as the most effective tool for the broadest range of applications He provides an up to date work promoting the use of the event calculus for commonsense reasoning and bringing into one place information scattered across many books and papers Mueller shares the knowledge gained in using the event calculus and extends the literature with detailed event calculus solutions that span many areas of the commonsense world The Second Edition features new chapters on commonsense reasoning using unstructured information including the Watson system commonsense reasoning using answer set programming and techniques for acquisition of commonsense knowledge including crowdsourcing Understand techniques for automated commonsense reasoning Incorporate commonsense reasoning into software solutions Acquire a broad understanding of the field of commonsense reasoning Gain comprehensive knowledge of the human capacity for commonsense reasoning

Computational Logic — CL 2000 John Lloyd, Veronica Dahl, Ulrich Furbach, Manfred Kerber, Kung-Kiu Lau, Catuscia Palamidessi, Luis M. Pereira, Yehoshua Sagiv, Peter J. Stuckey, 2003-06-26 These are the proceedings of the First International Conference on Computational Logic CL 2000 which was held at Imperial College in London from 24th to 28th July 2000 The theme of the conference covered all aspects of the theory implementation and application of computational logic where computational logic is to be understood broadly as the use of logic in computer science The conference was collocated with the following events 6th International Conference on Rules and Objects in Databases DOOD 2000 10th International Workshop on Logic based Program Synthesis and Transformation LOPSTR 2000 10th International Conference on Inductive Logic Programming ILP 2000 CL 2000 consisted of seven streams Program Development LOPSTR 2000 Logic Programming Theory and Extensions Constraints Automated Deduction Putting Theory into Practice Knowledge Representation and Non monotonic Reasoning Database Systems DOOD 2000 Logic Programming Implementations and Applications The LOPSTR 2000 workshop constituted the program development stream and the DOOD 2000 conference constituted the database systems stream Each stream had its own chair and program committee which autonomously selected the papers in the area of the stream Overall 176 papers were submitted of which 86 were selected to be presented at the conference and appear in these proceedings The acceptance rate was uniform across the streams In addition LOPSTR 2000 accepted about 15 extended abstracts to be presented at the conference in the program development

Cohn, Lenhart Schubert, Stuart Charles Shapiro, 1998 **Handbook of Research on Emerging Rule-Based Languages and Technologies: Open Solutions and Approaches** Giurca, Adrian, Gasevic, Dragan, Taveter, Kuldar, 2009-05-31 This book provides a comprehensive collection of state of the art advancements in rule languages Provided by publisher Advances in Artificial Intelligence Canadian Society for Computational Studies of Intelligence. Conference, Yang Xiang, Chaib-draa Brahim, 2003-05-27 This book constitutes the refereed proceedings of the 16th Conference of the Canadian Society for Computational Studies of Intelligence AI 2003 held in Halifax Canada in June 2003 The 30 revised full papers and 24 revised short papers presented were carefully reviewed and selected from 106 submissions The papers are organized in topical sections on knowledge representation search constraint satisfaction machine learning and data mining AI and Web applications reasoning under uncertainty agents and multi agent systems AI and bioinformatics and AI and e commerce **Web Reasoning and Rule Systems** Sebastian Rudolph, Claudio Gutierrez, 2011-08-19 This book constitutes the refereed proceedings of the 5th International Conference on Web Reasoning and Rule Systems RR 2011 held in Galway Ireland in August 2011 The 13 revised full papers 12 revised short papers presented together with 2 invited talks were carefully reviewed and selected from 36 submissions The papers address all current topics in Semantic Web interplay between classical reasoning approach with well established web languages such as RDF and OWL reasoning languages querying and optimization and rules and ontologies **Temporal Logic** Dov M. Gabbay, Hans J. Ohlbach, 1994-06-29 This volume constitutes the proceedings of the First International Conference on Temporal Logic ICTL 94 held at Bonn Germany in July 1994 Since its conception as a discipline thirty years ago temporal logic is studied by many researchers of numerous backgrounds presently it is in a stage of accelerated dynamic growth This book as the proceedings of the first international conference particularly dedicated to temporal logic gives a thorough state of the art report on all aspects of temporal logic research relevant for computer science and AI It contains 27 technical contributions carefully selected for presentation at ICTL 94 as well as three surveys and position papers Challenges for Action Theories Michael Thielscher, 2003-06-29 A logic based approach to the design of computing systems would undoubtedly offer many advantages over the imperative paradigm most commonly applied so far for programming and hardware design and consequently logic again and again has been heralded as the basis for the next generation of computer systems While logic and formal methods are indeed gaining ground in many areas of computer science and artificial intelligence the expected revolution has not yet happened In this book the author offers a convincing solution to the ramification problem and qualification problem associated with the frame problem and thus contributes to a satisfactory solution of the core problem and related challenges Thielscher bases his approach on the fluent calculus a first order Prolog like formalism allowing for the description of actions and change *Fluent Aphasia* Susan Edwards, 2005-09-29 Fluent aphasia is a language disorder that follows brain damage causing difficulty in finding the correct words and

structuring sentences Speakers also experience problems in understanding language severely impairing their ability to communicate In this informative study Susan Edwards provides a detailed description of fluent aphasia by drawing widely on research data and by comparing fluent aphasia with other types of aphasia as well as with normal language She discusses evidence that the condition affects access to underlying grammatical rules as well as to the lexicon and explores the relationship between language and the brain the controversy over aphasia syndromes the assessment of aphasia via standardized tests and the analysis of continuous speech data Extensive examples of aphasic speech are given and the progress of one fluent aphasic speaker is discussed in detail Written by an internationally renowned expert this book will be invaluable to linguists and practitioners alike

Structure and Inference in Classical Planning

Nir Lipovetzky,2014-09-16 Classical planning is the problem of finding a sequence of actions for achieving a goal from an initial state assuming that actions have deterministic effects The most effective approach for finding such plans is based on heuristic search guided by heuristics extracted automatically from the problem representation In this thesis we introduce alternative approaches for performing inference over the structure of planning problems that do not appeal to heuristic functions nor to reductions to other formalisms such as SAT or CSP We show that many of the standard benchmark domains can be solved with almost no search or a polynomially bounded amount of search once the structure of planning problems is taken into account In certain cases we can characterize this structure in terms of a novel width parameter for classical planning

Features and Fluents

Erik Sandewall,1994 Techniques for reasoning about actions and change in the physical world are among the classic research topics in artificial intelligence motivated by the needs of autonomous robots which must be able to anticipate future developments and analyze problems This monograph presents a novel methodology for such reasoning It is based on a systematic approach for identifying the exact range of applicability of a given logic as opposed to traditional methods based on proposing new logic variants supported by episodic examples For a number of previously proposed logics as well as for some new ones this work characterizes exactly the class of those reasoning tasks where the logic results in the intended set of conclusions and the class where it does not The book will be a necessary resource for researchers in knowledge representation cognitive robotics and intelligent control It can also be recommended as a graduate level text in these fields especially in light of its emphasis on a strict and systematic methodology

Clinical Linguistics Louise Cummings,2008-02-06 Louise Cummings provides a comprehensive introduction to speech and language therapy which will give SLT students an excellent starting point for a wide range of communication impairments The Royal College of Speech and Language Therapists estimates that 2.5 million people in the UK have a communication disorder Of this number some 800 000 people have a disorder that is so severe that it is hard for anyone outside their immediate families to understand them In Clinical Linguistics Louise Cummings provides a comprehensive introduction to speech and language therapy which will give SLT students an excellent starting point for a wide range of communication impairments In chapters that are dedicated to the discussion of individual communication disorders Cummings argues that no treatment of this area can reasonably neglect an examination of the prevalence and causes of communication disorders The assessment and treatment of these disorders by speech and language therapists are discussed at length

Perception and Production of Fluent Speech Ronald A.

Cole, 2016-07-28 Originally published in 1980 this title looks at the mental processes involved in producing and understanding spoken language. Although there had been several edited volumes on speech in the previous ten years, this volume was unique in that it deals exclusively with perception and production of fluent speech. The chapters in this volume, contributed to by distinguished scientists from psychology, linguistics, and computer science, deal with such questions as: How are ideas encoded into sound? How does a speaker plan an utterance? How are words recognized? What is the role of knowledge in speech perception? In short, how do people communicate with each other using speech?
