## **Inside The Ethical Expert Problem Solving In Applied Ethics:**

Inside the Ethical Expert Theodoor van Willigenburg, 1991 Peeters 1991      *Ethics by Committee* Noortje Jacobs, 2022-08-26 How liberal democracies in the late twentieth century have sought to resolve public concerns over charged issues in medicine and science Ethics boards have become obligatory passage points in today's medical science and we forget how novel they really are The use of humans in experiments is an age old practice that records show goes back to at least the third century BC and it has been popular as a practice since the early modern period Yet in most countries around the world hardly any formal checks and balances existed to govern the communal oversight of experiments involving human subjects until at least the 1960s Ethics by Committee traces the rise of ethics boards for human experimentation in the second half of the twentieth century Using the Netherlands as a case study historian Noortje Jacobs shows how the authority of physicians to make decisions about clinical research in this period gave way in most developed nations to formal mechanisms of communal decision making that served to regiment the behavior of individual researchers This historically unprecedented change in scientific governance came out of the growing international wariness of medical research in the decades after World War II and was meant to solidify a new way of reasoning together in liberal democracies about medicine and science But what reasoning together meant and who was invited to participate changed drastically over time In detailing this history Jacobs shows that research ethics committees were originally intended not only to make human experimentation more ethical but also to raise its epistemic quality and intensify the use of new clinical research methods By examining complex negotiations over the appropriate governance of human subjects research Ethics by Committee is an important contribution to our understanding of the randomized controlled trial and the history of research ethics and bioethics more generally

**The Juridification of Business Ethics** Bart Jansen, 2023-08-25 This book provides a theory of the juridification of business ethics Ethical codes pop up everywhere in the business world and increasingly resemble the code of law A focus on compliance rather than reflection becomes the norm Legal perspectives replace ethical perspectives turning ethicists into lawyers without a law degree This juridification of business ethics conceals a diminishing trust in ethics as legal reasoning substitutes philosophical thinking By appealing to the critical study of law Bart Jansen advocates for a renewed focus on the ethical side of business This book shows the importance of a good balance between law and ethics in business and is of great interest to both academics and professionals

*Ezra, Nehemiah, and the Construction of Early Jewish Identity* Bob Becking, 2011 The post exilic or Persian period showed a transition in the religion in ancient Israel from Yahwism to Judaism The events of exile and return made it impossible to completely fall back on the traditional religious identity The essays in this volume try to reconstruct the path taken in that transition The characters of Ezra and Nehemiah are generally seen as playing a formative role in this process By reading texts from the biblical books supposedly written by Ezra and Nehemiah in a religious historical context new light falls on the process of change

**Reasoning in Ethics and Law**

Albert W. Musschenga, Wim J. van der Steen, 2017-03-02 Legal and moral reasoning share much methodology and they address similar problems This volume charts two shared problems the relation between theory principles and particular judgments and the role of facts and factual assertions in normative settings The relation between theory and practice and between principle and particular judgment has become the subject of much debate in moral philosophy In the ongoing debate some moral philosophers refer to legal philosophy for a support of their views on the primacy of practice over theory According to them legal philosophy should have a more balanced view in that relation In the contributions to Part One this claim is critically analysed The role of the facts is underestimated in discussions on legal reasoning and legal theory as well as moral reasoning and ethical theory Factual statements enter into moral and legal discussions not only because they link the conclusion with a rule They also play a role as background assumptions in supporting a theory Its focus on the role of facts in normative reasoning makes this book of special interest to scholars of legal and moral argumentation Ethical Foundations of Palliative Care for Alzheimer Disease Ruth B. Purtilo, Henk A.M.J. ten Have, 2010-09-01 Alzheimer disease afflicts more than twelve million people worldwide and its incidence is increasing at a staggering rate People with the disorder are living longer than have those in previous generations and they require interventions for quality of life issues associated with palliative care However the symptoms of Alzheimer disease often fail to place such persons into settings where palliative care resources are available to them Indeed clinicians and other caregivers may be unsure about what constitutes effective palliation in these cases At the same time the ethical issues involved in providing end of life care to persons with Alzheimer disease remain on the margins of mainstream bioethics In Ethical Foundations of Palliative Care for Alzheimer Disease leading ethicists and clinicians from the United States and Europe explore ethical and scientific concerns about the diagnosis and prognosis of Alzheimer disease challenges arising from applying palliative procedures to its symptoms key philosophical and theological concepts central to our understanding of the disease and to end of life decisions and the changing patterns of relevant medical social and economic policies Cross cultural multidisciplinary and state of the art this volume is a unique and important resource for bioethicists clinicians and policy makers everywhere Contributors David A Bennahum M D University of New Mexico Pierre Boitte Ph D Catholic University of Lille France Roger A Brumback M D Creighton University Medical Center Wim J M Dekkers M D Ph D University Medical Centre Nijmegen The Netherlands Elizabeth Furlong R N Ph D J D Creighton University Medical Center Eugenijus Gefenas M D Ph D Vilnius University Lithuania Bert Gordijn Ph D University Medical Centre Nijmegen The Netherlands Amy M Haddad R N Ph D Creighton University Medical Center S ren Holm M D Ph D Dr Med Sci University of Manchester Franz J Illhardt D D Ph D Freiburg University Rien Janssens Ph D University Medical Centre Nijmegen The Netherlands Givi Javashvili M D Ph D State Medical Academy of Georgia Tbilisi Judith Lee Kissell Ph D Creighton University Medical Center Gunilla Nordenram D D S Ph D Karolinska Institute Stockholm Richard L O'Brien M D Creighton University Medical Center Marcel G M Olde Rikkert M D Ph

**Preventive Medicine between Obligation and Aspiration** M.F. Verweij, 2013-04-17 Preventive Medicine between Obligation and Aspiration is a study of ethical questions regarding mass screening vaccination and health policy programmes These interventions aim to enhance public health but may also constrain personal autonomy and cause harm and influence our moral views So far these issues have hardly been subject to systematic ethical analysis This study aims to fill this gap by providing an overview of moral problems in preventive medicine and by explicating norms for good practice Throughout the book it is argued that some moral concerns about prevention namely concerns about medicalization cannot be adequately grasped in terms of strict and binding moral norms Various moral concepts and types of norms beyond obligation are explored and developed in order to give practical meaning to these rather vague concerns In this way the book contributes to applied ethics as well as to ethical theory It is of interest to professionals in public health and preventive medicine and to scholars in applied ethics and moral philosophy

**The Turn to Applied Ethics** European Society for Research in Ethics. Conference, Theodoor van Willigenburg, 1993 Peeters 1993 *Morality* Vasil Gluchman, 2013-09-01 This book of essays focuses on the new approaches to moral issues from two perspectives The first part Various Concepts of Morality analyses certain central approaches to moral study and creates the methodological starting point for the more specific enquiries of the second part New Trends in Understanding Morality contains five articles focusing on these new approaches especially as they are related to their conceptions of scientific knowledge This section deals with selected special issues of morality in biology natural sciences but also in humanities

**Encyclopedia of Science, Technology, and Ethics** Carl Mitcham, 2005 This encyclopedia considers both the professional ethics of science and technology and the social ethical and political issues raised by science and technology

**New Titles in Bioethics**, 1992 Philosophical Perspectives on Bioethics L. W. Sumner, Joseph Boyle, Joseph M. Boyle, 1996-01-01 The contributors to the volume discuss various approaches to bioethical thinking and the political and institutional contexts of bioethics addressing underlying concerns about the purposes of its practice

**Metaethics (Volume 5 Part 1)** Shiva Nath Prasad, Debashis Guha, Avinash Kumar Srivastava, 2018-01-01 The present book exclusively concentrates on single theme Metaethics having 14 papers all written by specialist stalwarts of ethics except a few new scholars All the papers are authentic and thought provoking The word metaethics derives from two words Meta Ethics meta means after So Metaethics means after ethics The suffix Meta carries a specific sense meaning second order or later in origin or after study It occupies the tasks beyond Meta the traditional normative discussion It has been defined as the study of the origin and the meaning of ethical concepts though it is the least defined area of moral philosophy It investigates where our ethical principles come from and what they mean whether it involves merely a

discussion on social inventions or expressions of individual emotions It tries to answer question focusing on issues of universal truths the will of God the role of reason in ethical judgments and the meaning of ethical terms themselves It covers issues from moral semantics to epistemology to the metaphysical issues whether morality exists independently of humans as also psychological issues concerning the underlying mental basis of moral judgment and conduct Prof Nityanand Mishra prefers to call it just a Critique its business being to examine the reasonableness of or otherwise of both norms and virtues

**The Routledge Companion to Museum Ethics** Janet Marstine, 2012-05-23 Routledge Companion to Museum Ethics is a theoretically informed reconceptualization of museum ethics discourse as a dynamic social practice central to the project of creating change in the museum Through twenty seven chapters by an international and interdisciplinary group of academics and practitioners it explores contemporary museum ethics as an opportunity for growth rather than a burden of compliance The volume represents diverse strands in museum activity from exhibitions to marketing as ethics is embedded in all areas of the museum sector What the contributions share is an understanding of the contingent nature of museum ethics in the twenty first century its relations with complex economic social political and technological forces and its fluid ever shifting sensibility The volume examines contemporary museum ethics through the prism of those disciplines and methods that have shaped it most It argues for a museum ethics discourse defined by social responsibility radical transparency and shared guardianship of heritage And it demonstrates the moral agency of museums the concept that museum ethics is more than the personal and professional ethics of individuals and concerns the capacity of institutions to generate self reflective and activist practice
