Resources in Education ,2001 Higher Education in the United States James J. F. Forest,Kevin Kinser,2002-06-21 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically

transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study discuss and grapple with on a daily basis The Professional Student Affairs Administrator Roger B. Winston, Don G. Creamer, Theodore K. Miller, 2013-08-21 Styled as a complete update to the 1991 book Administration and Leadership in Student Affairs this work addresses issues of importance to student affairs professionals Grounded in human development learning leadership group dynamics management theories and social science research and evaluation methods this book articulates the means for college student affairs administrators to function in the forefront of student learning and personal development initiatives The book focuses on the three essential roles played by student affairs administrators as educators who play a significant role in addressing the academic goals of their institutions as leaders who help to shape the vision of their institutions student affairs practice and education mission and as managers who are responsible for coordinating programs and services supervising staff and overseeing university facilities and budgets Building a Scholarship of Assessment Trudy W. Banta, 2002-05-06 In this book leading experts in the field examine the current state of assessment practice and scholarship explore what the future holds for assessment and offer guidance to help educators meet these new challenges The contributors root assessment squarely in several related disciplines to provide an overview of assessment practice and scholarship that will prove useful to both the seasoned educator and those new to assessment practice Ultimately Building a Scholarship of Assessment will help convince skeptics who still believe outcomes assessment is a fad and will soon fade away that this is an interdisciplinary area with deep roots and an exciting future *General Education Assessment for Improvement of Student Academic Achievement* James Oliver Nichols, Karen W. Nichols, 2001 This monograph focuses on general education the one common curricular component that most institutions of higher learning share at the undergraduate level Also known as the core curriculum this uniquely American curricular form is among the common interests of regional accreditation associations throughout the United States In publicly financed institutions it is also the area most likely to be the subject of assessment for accountability efforts by the public and their representatives The monograph is user oriented like the others in the series Specific examples of models of general education assessment activities through use of results to improve student learning are provided for a comprehensive community college a major state university and a private college Users are encouraged to adjust and adapt the models described to best meet their institutional circumstances and culture Designing and Implementing Program Evaluation for

Teaching and Learning Centers Susan Hines, Catherine Ford, 2024-12-20 This practical guide equips educational developers with a clear systematic approach to evaluating the impact of their center's programs. Evaluation data and evidence can serve as powerful tools to demonstrate alignment with strategic priorities and to construct compelling narratives that highlight the value added by educational development opportunities. Drawing from 10 years of in-depth research investigating how teaching and learning centers evaluate their programs, this book provides a four-phase model flexible enough to fit centers of any size. The authors' accessible outcomes-based approach outlines essential steps and strategies in designing and implementing an evaluation plan tailored to their center's specific needs. The illustrative figures, practical examples, customizable templates, and real-world scenarios ensure that the model is comprehensive while also being straightforward and easy to apply. This book is an indispensable resource for directors and staff working in teaching and learning centers, chief academic officers and deans, and administrators responsible for educational development at the college level.

Library Data Darby Orcutt, 2009-11-19 Numerical evidence is everywhere and how best to handle and leverage it is a growing concern in the academic world in general and the academic library world in particular. Libraries are not only storehouses and key contacts for library patrons in accessing numbers but are also collectors and users of their own data, which is integral to the functioning of the library itself. The essays in *Library Data: Empowering Practice and Persuasion* focus on interpreting and using library-generated and outside data in support of data-driven practice and data-strengthened persuasion. The collection includes such topics as how to make data presentations appealing and effective, applying capital budgeting models to libraries, and using data for evaluation and improvement of collections and services. Articles also cover specialized scenarios including reference collection development, serial acquisitions, institutional repositories, web site design, interlibrary loan, and bibliographic instruction.

Factors Influencing Administrator/faculty Cooperation and Collaboration in NCA Acceptance of College Assessment Plans Linda S. Vega-Rodriguez, 2001

Assessment in Higher Education John Heywood, 2000 This book examines not only the assessment of student learning but the assessment of institutions, the programmes they offer, and the teaching they provide. It describes in detail the significant developments that have taken place over the last decade in the field and clarifies the different meanings of the term assessment that are now in use.

The Handbook of Institutional Research Richard D. Howard, Gerald W. McLaughlin, William E. Knight, 2012-06-28 Institutional research is more relevant today than ever before as growing pressures for improved student learning and increased institutional accountability motivate higher education to effectively use ever-expanding data and information resources. As the most current and comprehensive volume on the topic, the Handbook describes the fundamental knowledge, techniques, and strategies that define institutional research. The book contains an overview of the profession and its history, examines how institutional research supports executive and academic leadership and governance, and discusses the varied ways data from federal, state, and campus sources are used by research professionals. With contributions from

leading experts in the field this important resource reviews the analytic tools techniques and methodologies used by institutional researchers in their professional practice and covers a wide range of topics such as conducting institutional research statistical applications comparative analyses quality control systems measuring student faculty and staff opinions and management activities designed to improve organizational effectiveness *Leadership in Theological Education, Volume 1* Fritz Deininger,Orbelina Eguizabal,2017-04-14 The ICETE Programme for Academic Leadership IPAL was officially established in 2010 and arose out of the need to provide training to theological institutions in different regions of the world IPAL provides a three year cycle of four day seminars for the professional development of evangelical academic leaders to help institutions in their pursuit of quality and excellence This publication is the first of three volumes intended to accompany and support the IPAL seminars as well as independently providing wider access to the principles required by academic leaders for institutional development Each chapter shares and illustrates the contributors expertise in and understanding of education leadership and administration in the field of evangelical academic institutions With an intentional awareness of a wide range of non Western contexts this volume is a much needed guide for senior administrators around the world
