Instructional Design Bruce R. Ledford,Phillip J. Sleeman,2001-04-01 The purpose of this book is to provide a superstructure within which one can design effective and efficient instruction a system in which predictable and validatable learning will occur a system in which one will be able to direct the learner s activities toward a mutual goal in an environment of positive relationships The purpose of this chapter is to provide an over view of the field of instructional technology with specific focus on instructional design The overview is eclectic it presents views commonly held by instructional designers that have been synthesized from the research and literature This book differs from most books on instructional design in that it describes a process that is internally consistent that is it embraces a specific approach which makes it possible and easier for the designer to achieve closure on a process Most books on instructional design describe several processes without adequately providing an opportunity for closure As a result many designers go away confused owning bits and pieces of a process that it is impossible or at least difficult to implement in a coherent fashion
