Logic Language And Composition:

Logic, Language, and Composition Hulon Willis, 1975 *Logic, Language, Information, and Computation* Helle Hvid Hansen, Andre Scedrov, Ruy J.G.B. de Queiroz, 2023-08-28 Edited in collaboration with FoLLI the Association of Logic Language and Information this book constitutes the refereed proceedings of the of the 29th International Workshop on Logic Language Information and Computation WoLLIC 2023 held in Halifax NS Canada during July 11 14 2023 The 24 full papers 21 contributed 3 invited included in this book were carefully reviewed and selected from 46 submissions The book also contains the abstracts for the 7 invited talks and 4 tutorials presented at WoLLIC 2023 The WoLLIC conference series aims at fostering interdisciplinary research in pure and applied logic **Logic, Language, and Computation** Nick Bezhanishvili, Sebastian Löbner, Kerstin Schwabe, Luca Spada, 2011-07-18 Edited in collaboration with FoLLI the Association of Logic Language and Information this book constitutes the refereed proceedings of the 8th International Tbilisi Symposium on Logic Language and Computation TbiLLC 2009 held in Bakuriani Georgia in September 2009 The 20 revised full papers included in the book were carefully reviewed and selected from numerous presentations given at the symposium The focus of the papers is on the following topics natural language syntax semantics and pragmatics constructive modal and algebraic logic linguistic typology and semantic universals logics for artificial intelligence information retrieval query answer systems logic games and formal pragmatics language evolution and learnability computational social choice historical linguistics history of logic **Categories and Types in Logic, Language, and Physics** Claudia Casadio, Bob Coecke, Michael Moortgat, Philip Scott, 2014-04-03 For more than 60 years Jim Lambek has been a profoundly inspirational mathematician with groundbreaking contributions to algebra category theory linguistics theoretical physics logic and proof theory This Festschrift was put together on the occasion of his 90th birthday The papers in it give a good picture of the multiple research areas where the impact of Jim Lambek's work can be felt The volume includes contributions by prominent researchers and by their students showing how Jim Lambek's ideas keep inspiring upcoming generations of scholars *Logic, Language, Information and Computation* Daniel Leivant, Ruy de Queiroz, 2007-07-04 The 14th International Workshop on Logic Language Information and Computation focused on foundations of computing and programming novel computation models and paradigms broad notions of proof and belief formal methods in software and hardware development logical approach to natural language and reasoning logics of programs actions and resources and foundational aspects of information organization search flow sharing and protection *Logic, Language, and Method* Kuno Lorenz, 2010 Papers from more than three decades reflect the development of thinking over the dialogical framework that shapes verbal expression of comprehending experience and that has to be exhibited in responsible argumentations With dialogical reconstructions of experience owing to the methodical constructivism of the Erlangen School it is possible to uncover the origin of many conceptual oppositions in traditional philosophical talk like natural vs artificial cultural subjective vs objective etc and to

solve philosophical riddles connected with them *Logic, Language, Information, and Computation* Rosalie Iemhoff, Michael Moortgat, Ruy de Queiroz, 2019-06-23 Edited in collaboration with FoLLI the Association of Logic Language and Information this book constitutes the refereed proceedings of the 26th Workshop on Logic Language Information and Communication WoLLIC 2019 held in Utrecht The Netherlands in July 2019 The 41 full papers together with 6 invited lectures presented were fully reviewed and selected from 60 submissions The idea is to have a forum which is large enough in the number of possible interactions between logic and the sciences related to information and computation and yet is small enough to allow for concrete and useful interaction among participants **Logic, Language and Reasoning** Hans Jürgen Ohlbach, U. Reyle, 2012-12-06 This volume is dedicated to Dov Gabbay who celebrated his 50 birthday in October 1995 Dov is one of the most outstanding and most productive researchers we have ever met He has exerted a profound influence in major fields of logic linguistics and computer science His contributions in the areas of logic language and reasoning are so numerous that a comprehensive survey would already fill half of this book Instead of summarizing his work we decided to let him speak for himself Sitting in a car on the way to Amsterdam airport he gave an interview to Jelle Gerbrandy and Anne Marie Mineur This recorded conversation with him which is included gives a deep insight into his motivations and into his view of the world the Almighty and of course the role of logic In addition this volume contains a partially annotated bibliography of his main papers and books The length of the bibliography and the broadness of the topics covered there speaks for itself Logic, Language, Information, and Computation Agata Ciabattoni, Elaine Pimentel, Ruy J. G. B. de Queiroz, 2022-09-08 Edited in collaboration with FoLLI the Association of Logic Language and Information this book constitutes the refereed proceedings of the 28th Workshop on Logic Language Information and Computation WoLLIC 2022 Iasi Romania in September 2022 The 25 full papers presented included with 8 extra abstracts 5 invited talks and 3 tutorials were fully reviewed and selected from 46 submissions The conference aims fostering interdisciplinary research in pure and applied logic *Logic, Language, Information, and Computation* Lev D. Beklemishev, Ruy de Queiroz, 2011-04-28 This book constitutes the refereed proceedings of the 18th Workshop on Logic Language Information and Communication WoLLIC 2011 held in Philadelphia PA USA in May 2011 The 21 revised full papers presented were carefully reviewed and selected from 35 submissions Among the topics covered are various aspects of mathematical logic computer science logics philosophical logics such as complexity theory model theory partial order Hoare logics hybrid logics Turing machines etc *Logic Programming* Maria Garcia Banda, Enrico Pontelli, 2008-12-02 This book constitutes the refereed proceedings of the 24th International Conference on Logic Programming ICLP 2008 held in Udine Italy in December 2008 The 35 revised full papers together with 2 invited talks 2 invited tutorials 11 papers of the co located first Workshop on Answer Set Programming and Other Computing Paradigms ASPOCP 2008 as well as 26 poster presentations and the abstracts of 11 doctoral consortium articles were carefully reviewed and selected from 177 initial submissions The papers cover all issues of current research in logic programming they are

organized in topical sections on applications algorithms systems and implementations semantics and foundations analysis and transformations CHRs and extensions implementations and systems answer set programming and extensions as well as constraints and optimizations

Logic - Language - Ontology Urszula B. Wybraniec-Skardowska, 2022-12-01 How should we think about the meaning of the words that make up our language How does reference of these terms work and what is their referent when these are connected to abstract objects rather than to concrete ones Can logic help to address these questions This collection of papers aims to unify the questions of syntax and semantics of language which span across the fields of logic philosophy and ontology of language The leading motif of the presented selection is the differentiation between linguistic tokens material concrete objects on the one hand and linguistic types ideal abstract objects on the other Through a promenade among articles that span over all of the Author's career this book addresses the complex philosophical question of the ontology of language by following the crystalline conceptual tools offered by logic At the core of Wybraniec Skardowska's scholarship is the idea that language is an ontological being characterized in compliance with the logical conception of language proposed by Ajdukiewicz The application throughout the book of tools of classical logic and set theory results fosters the emergence of a general formal logical theory of syntax semantics and of the pragmatics of language which takes into account the duality token type in the understanding of linguistic expressions Via a functional approach to language itself logic appears as ontologically neutral with respect to existential assumptions relating to the nature of linguistic expressions and their extra linguistic counterparts The book is addressed to readers both at the graduate and undergraduate level but also to a more general audience interested in getting a firmer grip on the interplay between reality and the language we use to describe and understand it

Logic, Language, and Computation Guram Bezhanishvili, Sebastian Löbner, Vincenzo Marra, Frank Richter, 2013-03-14 This book constitutes the refereed proceedings of the 9th International Tbilisi Symposium on Logic Language and Computation TbiLLC 2011 held in Kutaisi Georgia in September 2011 The book consists of summaries of 3 tutorials presented at the symposium together with 13 full papers that were carefully reviewed and selected from the submissions The papers are organized in two sections one on Language and one on Logic and Computation The range of topics covered in the Language section includes natural language syntax semantics and pragmatics frames in natural language semantics linguistic typology and discourse phenomena The papers in the Logic and Computation section cover such topics as constructive modal algebraic and philosophical logic as well as logics for computer science applications

Logic, Language, Information, and Computation Leonid Libkin, Ulrich Kohlenbach, Ruy de Queiroz, 2013-08-15 Edited in collaboration with FoLLI the Association of Logic Language and Information this book constitutes the refereed proceedings of the 20th Workshop on Logic Language Information and Communication WoLLIC 2013 held in Darmstadt Germany in August 2013 The 17 contributed papers presented together with 6 invited lectures were carefully reviewed and selected from 30 submissions The scope of the workshop spans the theoretical and practical aspects of formal logic computing and

programming theory and natural language and reasoning **Logic, Language, and Meaning, Volume 1** L. T. F. Gamut, 1991 Although the two volumes of Logic Language and Meaning can be used independently of one another together they provide a comprehensive overview of modern logic as it is used as a tool in the analysis of natural language Both volumes provide exercises and their solutions Volume 1 Introduction to Logic begins with a historical overview and then offers a thorough introduction to standard propositional and first order predicate logic It provides both a syntactic and a semantic approach to inference and validity and discusses their relationship Although language and meaning receive special attention this introduction is also accessible to those with a more general interest in logic In addition the volume contains a survey of such topics as definite descriptions restricted quantification second order logic and many valued logic The pragmatic approach to non truthconditional and conventional implicatures are also discussed Finally the relation between logic and formal syntax is treated and the notions of rewrite rule automation grammatical complexity and language hierarchy are explained Composing Model-Based Analysis Tools Robert Heinrich, Francisco Durán, Carolyn Talcott, Steffen Zschaler, 2021-12-02 This book presents joint works of members of the software engineering and formal methods communities with representatives from industry with the goal of establishing the foundations for a common understanding of the needs for more flexibility in model driven engineering It is based on the Dagstuhl Seminar 19481 Composing Model Based Analysis Tools which was held November 24 to 29 2019 at Schloss Dagstuhl Germany where current challenges their background and concepts to address them were discussed The book is structured in two parts and organized around five fundamental core aspects of the subject 1 the composition of languages models and analyses 2 the integration and orchestration of analysis tools 3 the continual analysis of models 4 the exploitation of results and 5 the way to handle uncertainty in model based developments After a chapter on foundations and common terminology and a chapter on challenges in the field one chapter is devoted to each of the above five core aspects in the first part of the book These core chapters are accompanied by additional case studies in the second part of the book in which specific tools and experiences are presented in more detail to illustrate the concepts and ideas previously introduced The book mainly targets researchers in the fields of software engineering and formal methods as well as software engineers from industry with basic familiarity with quality properties model driven engineering and analysis tools From reading the book researchers will receive an overview of the state of the art and current challenges research directions and recent concepts while practitioners will be interested to learn about concrete tools and practical applications in the context of case studies *Logic, Language and Meaning* Maria Aloni, Harald Bastiaanse, Tiki de Jager, Katrin Schulz, 2010-09-21 This book contains the revised papers presented at the Amsterdam Colloquium 2009 held in Amsterdam The Netherlands in December 2009 The 41 thoroughly refereed and revised contributions presented together with the revised abstracts of 5 invited talks are organized in five sections the first section contains extended abstracts of the talks given by the invited speakers the second third and fourth

sections contain invited and submitted contributions to the three thematic workshops hosted by the colloquium the Workshop on Implicature and Grammar the Workshop on Natural Logic and the Workshop on Vagueness the final section consists of submissions to the general program The topics covered range from descriptive syntactic and semantic analyses of all kinds of expressions to theoretical logical and computational properties of semantic theories philosophical foundations evolution and learning of language
