Logic Of Choice:

Logic of Choice and Economic Theory Sidney N. Afriat, 1987

The Logic of Choice Gidon Gottlieb, 2019-10-30

Originally published in 1968 This is a critical study of the concept of rule featuring in law ethics and much philosophical analysis which the author uses to investigate the concept of rationality The author indicates in what manner the modes of reasoning involved in reliance upon rules are unique and in what fashion they provide an alternative both to the modes of logico mathematical reasoning and to the modes of scientific reasoning This prepares the groundwork for a methodology meeting the requirements of the fields using rules such as law and ethics which could be significant for communications theory and the use of computers in normative fields Other substantive issues related to the mainstream of legal philosophy are discussed theories of interpretation the notion of purpose and the requirements of principled decision making The book utilizes examples drawn from English and American legal decisions to suggest how the positions of legal positivism and of natural law are equally artificial and misleading

Being at Genetic Risk Kelly Pender, 2018-10-04 Rhetorics of choice have dominated the biosocial discourses surrounding BRCA risk for decades telling women at genetic risk for breast and ovarian cancers that they are free to choose how and whether to deal with their risk Critics argue that women at genetic risk are in fact not free to choose but rather are forced to make particular choices In *Being at Genetic Risk* Kelly Pender argues for a change in the conversation around genetic risk that focuses less on choice and more on care *Being at Genetic Risk* offers a new set of conceptual starting points for understanding what is at stake with a BRCA diagnosis and what the focus on choice obstructs from view Through a praxiographic reading of the medical practices associated with BRCA risk Pender's analysis shows that genetic risk is not just something BRCA women know but also something that they do It is through this doing that genetic cancer risk becomes a reality in their lives one that we can explain but not one that we can explain away Well researched and thoughtfully argued *Being at Genetic Risk* will be welcomed by scholars of rhetoric and communication particularly those who work in the rhetoric of science technology and medicine as well as scholars in allied fields who study the social ethical and political implications of genetic medicine Pender's insight will also be of interest to organizations that advocate for those at genetic risk of breast and ovarian cancers

Logic of Choice and Economic Theory, The Logic of Care Annemarie Mol, 2008-05-24 Shortlisted for the BSA Sociology of Health and Illness Book Prize 2010 What is good care In this innovative and compelling book Annemarie Mol argues that good care has little to do with patient choice and therefore creating more opportunities for patient choice will not improve health care Although it is possible to treat people who seek professional help as customers or citizens Mol argues that this undermines ways of thinking and acting crucial to health care Illustrating the discussion with examples from diabetes clinics and diabetes self care the book presents the logic of care in a step by step contrast with the logic of choice She concludes that good care is not a matter of making well argued individual choices but is something that grows out of collaborative and continuing attempts to attune knowledge and

technologies to diseased bodies and complex lives Mol does not criticise the practices she encountered in her field work as messy or ad hoc but makes explicit what it is that motivates them an intriguing combination of adaptability and perseverance The Logic of Care Health and the problem of patient choice is crucial reading for all those interested in the theory and practice of care including sociologists anthropologists and health care professionals It will also speak to policymakers and become a valuable source of inspiration for patient activists

Ultralogic as Universal? Richard Routley, 2019-05-08 Ultralogic as Universal is a seminal text in non classical logic Richard Routley Sylvan presents a hugely ambitious program to use an ultramodal logic as a universal key which opens if rightly operated all locks It provides a canon for reasoning in every situation including illogical inconsistent and paradoxical ones realized or not possible or not A universal logic Routley argues enables us to go where no other logic especially not classical logic can Routley provides an expansive and singular vision of how a universal logic might one day solve major problems in set theory arithmetic linguistics

physics and more It circulated in typescript in the late 1970s before appearing as the Appendix to Exploring Meinong's Jungle and Beyond With engaging forceful prose unsparing criticism of entrenched institutions and many tantalizing proof sketches is the Axiom of Choice a theorem of naive set theory Ultralogic has had a major influence on the development of paraconsistent and relevant logic This new edition makes this work available for a modern audience newly typeset and corrected along with extensive notes and new commentary essays Emotions and Values in Equity Crowdfunding Investment Choices 1 Christian Goglin, 2021-02-17 Equity crowdfunding is a new way for seed stage start ups to generate initial capital and as such raises questions around the choices made by investors within this area Understanding it is important for investor protection as investors are generally unaware of the factors that can influence their decisions However investing in equity crowdfunding places the investor in a unique decision making framework in which resources such as images videos and storytelling are all mobilized by entrepreneurs and platforms as tools of persuasion This context thus seems to favor more holistic and emotional decision making rather than a process that is rational and analytical This first volume centers on the emotional and axiological determinants of choice A transdisciplinary theoretical analysis is carried out combining different fields within the social sciences primarily finance marketing and psychology This state of the art leads to the emergence of an original theoretical framework for understanding investment choices in equity crowdfunding

Unsettling Choice Ujju Aggarwal, 2024-03-05 How the Great Recession revealed a system of school choice built on crisis precarity and exclusion What do universal rights to public goods like education mean when codified as individual private choices Is the problem of school choice actually not about better choices for all but rather about the competition and exclusion that choice engenders guaranteeing a system of winners and losers Unsettling Choice addresses such questions through a compelling ethnography that illuminates how one path of neoliberal restructuring in the United States emerged in tandem with and in response to the Civil Rights movement Drawing on ethnographic research in one New York City school district Unsettling Choice traces the contestations that surfaced when in the wake of the 2007 2009 Great Recession public schools navigated austerity by expanding choice based programs Ujju Aggarwal argues that this strategy positioned as saving public schools mobilized mechanisms rooted in market logics to recruit families with economic capital on their side thereby solidifying a public sphere that increasingly resembled the private where contingency was anticipated and rights for some were marked by intensified precarity for poor and working class Black and Latinx families As Unsettling Choice shows these struggles over public schools one of the last remaining universal public goods in the United States were entrapped within neoliberal regimes that exceeded privatization and ensured exclusion even as they were couched in language of equity diversity care and rights And yet this richly detailed and engaging book also tracks an architecture of expansive rights care and belonging built among poor and working class parents at a Head Start center whose critique of choice helps us understand how we might struggle for and reimagine justice and a public that remains to be won Retail e book files for this
