emblem of a distinctive social system and set of cultural values and as a result it has been the subject of study of a variety of disciplines But what is architectural history and how should we read it Reading Architectural History examines the historiographic and socio cultural implications of the mapping of British architectural history with particular reference to eighteenth and nineteenth century Britain Discursive essays consider a range of writings from biographical and social histories to visual surveys and guidebooks to examine the narrative structures of histories of architecture and their impact on perception adn understanding of the architecture of the past Alongside this each chapter cites canonical histories juxtaposed with a range of social and cultural theorists to reveal that these writings are richer than we have perhaps recognised and that architectural production in this period can in interrogated in the same way as that from more recent past and can be read in a variety of ways The essays and texts combine to form an essential course reader for methods and critical approached to architectural history and more generally as examples of the kind of evidence used in the formation of architectural histories while also offering a thematic introduction to architecture in Britain and its social and cultural meaning   *Picturing Indian Territory* B. Byron Price,2016-10-10 Throughout the nineteenth century the land known as Indian Territory was populated by diverse cultures troubled by shifting political boundaries and transformed by historical events that were colorful dramatic and often tragic Beyond its borders most Americans visualized the area through the pictures produced by non Native travelers artists and reporters all with differing degrees of accuracy vision and skill The images in Picturing Indian Territory and the eponymous exhibit it accompanies conjure a wildly varied vision of Indian Territory s past Spanning nearly nine decades these artworks range from the scientific illustrations found in English naturalist Thomas Nuttall s journal to the paintings of Frederic Remington Henry Farny and Charles Schreyvogel The volume s three essays situate these works within the historical narratives of westward expansion the creation of an Indian Territory separate from the rest of the United States and Oklahoma s eventual statehood in 1907 James Peck focuses on artists who produced images of Native Americans living in this vast region during the pre Civil War era In his essay B Byron Price picks up the story at the advent of the Civil War and examines newspaper and magazine reports as well as the accounts of government functionaries and artist travelers drawn to the region by the rapidly changing fortunes of the area s traditional Indian cultures in the wake of non Indian settlement Mark Andrew White then looks at the art and illustration resulting from the unrelenting efforts of outsiders who settled Indian and Oklahoma Territories in the decades before statehood Some of the artworks featured in this volume have never before been displayed some were produced by more than one artist others are anonymous Many were completed by illustrators on site as the events they depicted unfolded while other artists relied on written accounts and vivid imaginations Whatever their origin these depictions of the people places and events of Indian Country defined the region for contemporary American and European audiences Today they provide a rich visual record of a key era of western and Oklahoma history and of the ways that art has defined this important cultural crossroads   *A Short*
