## **Logic Law And Ethics:**

**Universal Logic, Ethics, and Truth** Timothy J. Madigan, Jean-Yves Béziau, 2024-05-13 John Corcoran was a very well known logician who worked on several areas of logic He produced decisive works giving a better understanding of two major figures in the history of logic Aristotle and Boole Corcoran had a close association with Alfred Tarski a prominent 20th century logician This collaboration manifested in Corcoran s substantial introduction to Tarski s seminal book *Logic Semantics Metamathematics* 1956 Additionally Corcoran s posthumous editorial involvement in *What are logical notions* 1986 breathed new life into this seminal paper authored by Tarski His scholarly pursuits extended to the intricate explication of fundamental concepts in modern logic including variables propositions truth consequences and categoricity Corcoran s academic curiosity extended further to the intersection of ethics and logic reflecting his contemplation of their interrelation Beyond these theoretical contributions Corcoran was deeply engaged in the pedagogical dimensions of logic instruction This volume serves as a compilation of articles contributed by Corcoran s students colleagues and international peers By encompassing a diverse range of subjects this collection aptly mirrors Corcoran s wide ranging interests offering insights that not only deepen our understanding of his work but also advance the theoretical frameworks he explored **Chambers on Accounting** Raymond John Chambers, Graeme W. Dean, 2000-05 This volume is dedicated to the life work of Ray Chambers who was continually seeking ways to stimulate and advance the development of a demonstrably rigorous and serviceable system of accounting This search for an ideal led Chambers into myriad environments an aspect of his life exhaustively illustrated in his *Aide Memoire* which forms part of this memorial volume *Journal of the American Society for Psychical Research* American Society for Psychical Research, 1926 List of members in v 1 6 12 **The A to Z of Ethics** Harry J. Gensler, Earl Spurgin, 2010-02-12 The A to Z of Ethics covers a very broad range of ethical topics including ethical theories historical periods historical figures applied ethics ethical issues ethical concepts non Western approaches and related disciplines Harry J Gensler and Earl W Spurgin tackle such issues as abortion capital punishment stem cell research and terrorism while also explaining key theories like utilitarianism natural law social contract and virtue ethics This reference provides a complete overview of ethics through a detailed chronology an introductory essay a bibliography and over 200 cross referenced dictionary entries including bioethics business ethics Aristotle Hobbes autonomy confidentiality Confucius and psychology Cadenzas Andrea Poma, 2017-04-24 This book examines the concepts behind a philosophical project on postmodernism the social and cultural condition of our time the age of the achieved capitalism It proposes an original theory of postmodern humanism based on the absence of form and describes the development of philosophical thought as a musical cadenza that produces meaning in the empty space between the past of the modern and the future of the postmodern The book focuses on three main postmodernist themes the denial of identity and the assertion of the differences the shattered subject and the absence of teleology in history and politics **Critical Views of Logic** Mirja

Hartimo, Frode Kjosavik, Øystein Linnebo, 2023-10-31 This book examines positions that challenge the Fregean logic first view. It raises critical questions about logic by examining various ways in which logic may be entangled with mathematics and metaphysics. Is logic topic neutral and general? Can we take the application of logic for granted? This book suggests that we should not be dogmatic about logic but ask similar critical questions about logic as those Kant raised about metaphysics and mathematics. It challenges the Fregean logic first view according to which logic is fundamental and hence independent of any extra logical considerations. Whereas Quine assimilated logic and mathematics to the theoretical parts of empirical science, the present volume explores views that stop short of his thoroughgoing holism but instead take logic to be answerable to or entangled with some particular disciplines. The contributions provide views that assign primacy to mathematical reasons, Kantian metaphysical grounds, Husserlian transcendental phenomenological reflection, or normative considerations about how terms ought to be defined in various fields of empirical science or mathematics. Space is thereby carved out between a Fregean position on the one hand and Quinean holism on the other. *Critical Views of Logic* will be a key resource for academics, researchers, and advanced students of philosophy, linguistics, mathematics, and computer science, as well as those engaged in various fields of empirical science. The chapters in this book, except for chapter 4, were originally published in the journal *Inquiry*.

The Mojing Zhongyuan Sun, 2024-09-02 This book is the first and only English language translation of Sun Zhongyuan's research on Mohist logic. Sun investigates the historical contributions made to the research of logic in China, its modern value, its significance to the world, and how the form of logic developed in China is united with those from the rest of the world, focusing on Mohist logic in particular as its core concern. Sun's work represents a high level of academic merit in the field of logic in China, embodying traditional Chinese culture, reflecting the frontiers of Chinese academia, effectively advocating for Chinese academia to engage with the rest of the world, deepening the academic conversation between China and the rest of the world, furthering the world's understanding of Chinese thought, and strengthening its influence and discursive power.

**Sex and Character** Otto Weininger, 2005-04-14 Otto Weininger's controversial book *Sex and Character*, first published in Vienna in 1903, is a prime example of the conflicting discourses central to its time: antisemitism, scientific racism, and biologism; misogyny, the cult, and crisis of masculinity; psychological introspection versus empiricism; German idealism, the women's movement, and the idea of human emancipation; the quest for sexual liberation and the debates about homosexuality. Combining rational reasoning with irrational outbursts in the context of today's scholarship, *Sex and Character* speaks to issues of gender, race, cultural identity, the roots of Nazism, and the intellectual history of modernism and modern European culture. This new translation presents for the first time the entire text, including Weininger's extensive appendix with amplifications of the text and bibliographical references, in a reliable English translation, together with a substantial introduction that places the book in its cultural and historical context.
