Edengone J.P. Dold,2019-10-25 Mike intends to continue in the quiet and peaceful life of a philosophy professor but his friend Ron seems dead set on rewriting the laws of physics As Ron delves deeper into a hair brained theory of his own he discovers another world invisible and intangible to us but existing in the same space as our world Ron persuades Mike to join him and together they traverse the harsh conditions of an alien world locked in war At that moment I was no longer Michael I was no longer intellectual or diplomatic The time for that was gone Now it was the time to act Now was the time of reckoning I became a force I became death and destruction I became blood and fire My heart pounded to the beat of an instinctive primitive and intrinsic war drum I was prosecutor judge jury and executioner I was the tribunal The crime had been committed Justice required punishment And I was there to deliver Deliver I did My battle cry delivered the accusation My weapon served the verdict And the rounds fired from my gun executed the sentence Do I look back on my actions with pride

No Would I have spared them if there was another way Yes I wish I could have spared them I wish I could have let them be But they would not let Edengone be Then can I reflect on my choices and look virtue and justice in the eye with confidence Yes a resounding and emphatic yes The correct action is not always a pleasant or happy one but it is necessary and always the best action How do I justify my actions That is between me and the powers I answer to Let the world think of me as they will I was trained to destroy but more importantly I was trained to know when to destroy I do not reflect on my actions with any pride but I do not reflect with any doubt either

Stuff We All Should Know Brien Roche,2021-03-08 This book is a book of knowledge It is not intended to go into depth in any one subject matter Rather it gives an overview of many different subject areas such as the sciences history philosophy and literature With that type of an overview one can then focus on specific areas of interest and make a decision either then to become a subject matter expert in a specific area or simply to broaden one s knowledge in a multitude of areas The first part of the book deals with the basics The basics are such things as physics chemistry biology weather the oceans astronomy the human body language writing and money With an understanding of those basics hopefully the reader will have a better appreciation of the interaction between chemistry physics and biology Hopefully the reader will have a keener appreciation of how weather oceans and astronomy are interrelated The reader will also have a better understanding of not only how the human body works but also how the human brain deals with language and has developed writing Finally as part of the basics there is a chapter that deals with the economy and how money works Part II deals with history and in particular the role of freedom As one of the professors in this book states the role of freedom is probably overrated in the course of human history Many historians espouse the idea that all people crave freedom Rather what they really crave is order food on the table and a roof over their head If they have those things then they have the luxury of seeking to be free The final part of the book deals with specific people of the world including the Vikings the Mongolians the Chinese and many more
