Guide To Technical Services Resources:

Library Technical Services Stacey Marien, 2020-08-15 Libraries are experiencing major changes concerning the role of technical services. Technical services librarians also are being challenged about their relevance and role sometimes revealed by a lack of understanding of the contribution technical services librarians make to building and curating library and archival collections. The threats are real: relocation from central facilities, the dramatic shift to electronic resources, budgetary constraints, and outsourced processing. As a result, technical services departments are reinventing themselves to respond to these and similar challenges while embracing innovative methods and opportunities to advance librarianship in the twenty-first century. Library Technical Services provides case studies that highlight difficult realities yet embrace exciting opportunities such as space reclamation, evolving vendor partnerships, metadata retraining, and managing personnel, special collections, and distance education. Written for catalog and metadata librarians and managers of technical services units, this book will inspire and provide practical advice and examples for solving issues many libraries are facing today. **Guide to**

Mary Beth Weber, 2015-04-09 Will library technical services exist thirty years from now? If so, what do leading experts see as the direction of the field? In this visionary look at the future of technical services, Mary Beth Weber, Head of Central Technical Services at Rutgers and editor of Library Resources and Technical Services (LRTS), the official journal of ALA's Association for Library Collections and Technical Services, and one of the top peer-reviewed scholarly technical services journals, has compiled a veritable who's who of the field to answer just these questions. Experts including Amy K. Weiss, Sylvia Hall Ellis, and Sherri L. Vellucci answer vital questions like: Is there a future for traditional cataloging, acquisitions, and technical services? How can librarians influence the outcome of vendor-provided resources such as e-books, licensing, records, sets, and authority control? Will RDA live up to its promise? Are approval plans and subject profiles relics of the past? Is there a need to curate data through its lifecycle? What skills will be needed in the future in technical services jobs? **The Electronic**
