*Guilds of Galyndor* K.S. Crooks, 2014-07-26 In *Guilds of Galyndor* Guild members have the exceptional ability to harness many powerful forces that exist in the world There are four Guild disciplines each different in their abilities nevertheless the same in their intentions Guild Masters serve as peacekeepers protectors of the land even as warriors when the need arises The four Guilds are Shoguns who have the ability to enhance their physical attributes and senses Elementals who are capable of manipulating the basic elements of nature water fire lightning earth and air Ethereals who have the ability to manipulate light control their shadows and access an alternate realm using mirrors Shamans who are capable of manipulating life auras allowing them to affect plants animals and positively influence human health Kendra Wyatt Garrick and Naomi four new Guild students will become a team and great friends In the face of tragedy they take on the challenge of saving the life of a fellow student Their quest takes them throughout Galyndor to new destinations and shows them sights and creatures they did not know existed To overcome the tremendous perils of their undertaking each of them will need to discover new strengths and abilities or their friend will perish

**The Guilds of Florence** Edgcumbe Staley, 1906 *Craft Guilds in the Early Modern Low Countries* Catharina Lis, Hugo Soly, 2017-03-02 In the half millennium of their existence guilds in the Low Countries played a highly significant role in shaping the societies of which they were a part One key aspect that has been identified in recent historical research to explain the survival of the guilds for such a long time is the guilds continued adaptability to changing circumstances This idea of flexibility is the point of departure for the essays in this volume which sheds new light on the corporate system and identifies its various features and regional variances The contributors explore the interrelations between economic organisations and political power in late medieval and early modern towns and address issues of gender religion and social welfare in the context of the guilds This cohesive and focussed volume will provide a stimulus for renewed interest and further research in this area It will appeal to scholars and students with an interest in early modern economic social and cultural history in particular but will also be valuable to those researching into political religious and gender history

**The European Guilds** Sheilagh Ogilvie, 2021-06-15 Guilds ruled many crafts and trades from the Middle Ages to the Industrial Revolution and have always attracted debate and controversy They were sometimes viewed as efficient institutions that guaranteed quality and skills But they also excluded competitors manipulated markets and blocked innovations Did the benefits of guilds outweigh their costs Analyzing thousands of guilds that dominated European economies from 1000 to 1880 *The European Guilds* uses vivid examples and clear economic reasoning to answer that question Sheilagh Ogilvie's book features the voices of honorable guild masters underpaid journeymen exploited apprentices shady officials and outraged customers and follows the stories of the vile encroachers Women migrants Jews gypsies bastards and many others desperate to work but hunted down by the guilds as illicit competitors She investigates the benefits of guilds but also shines a light on their dark side Guilds sometimes provided important services but they also

manipulated markets to profit their members They regulated quality but prevented poor consumers from buying goods cheaply They fostered work skills but denied apprenticeships to outsiders They transmitted useful techniques but blocked innovations that posed a threat Guilds existed widely not because they corrected market failures or served the common good but because they benefited two powerful groups guild members and political elites Rabat de la jaquette

**Guilds in the Middle Ages** Georges François Renard,1919

**Guilds, Labour and the Urban Body Politic** Bert De Munck,2017-12-01

This book presents a new view on the relation between labour and community through a focus on craft guilds In the Southern Netherlands occupational guilds were both powerful and governed by manufacturing masters enabling the latter to imprint their mark upon urban society in an economic socio cultural and political way While the urban community was deeply indebted to a corporative spirit and guild ethic originating in medieval Germanic and Christian traditions guild based artisans succeeded in being accepted as genuine political and hence rational actors their political identity and agency being based upon their skills and trustworthiness In the long run this corporative spirit and power inexorably waned Yet this book shows that an adequate understanding of the development of European modernity i e proletarianisation and the emergence of a modern economy and modern economic and political thinking requires taking seriously the ruins upon which it is build These histories can actually be recounted as purifications of sorts in which the economic was separated from the political the individual from the social and the transcendent from the material While the religiously inspired corporative nature of the urban body politic waned the urban artisans lost their credibility as political and rational actors

**Innovation and Creativity in Late Medieval and Early Modern European Cities** Karel Davids,Bert De Munck,2016-05-23 Late medieval and early modern cities are often depicted as cradles of artistic creativity and hotbeds of new material culture Cities in renaissance Italy and in seventeenth and eighteenth century northwestern Europe are the most obvious cases in point But how did this come about Why did cities rather than rural environments produce new artistic genres new products and new techniques How did pre industrial cities evolve into centres of innovation and creativity As the most urbanized regions of continental Europe in this period Italy and the Low Countries provide a rich source of case studies as the contributors to this volume demonstrate They set out to examine the relationship between institutional arrangements and regulatory mechanisms such as citizenship and guild rules and innovation and creativity in late medieval and early modern cities They analyze whether in what context and why regulation or deregulation influenced innovation and creativity and what the impact was of long term changes in the political and economic sphere
