Guided Discovery Tutoring A Framework For Icai Research:

Guided Discovery Tutoring Mark Elsom-Cook,1990 **Student Modelling: The Key to Individualized**

Knowledge-Based Instruction Jim E. Greer,Gordon I. McCalla,2013-06-29 This book is the result of a NATO sponsored workshop entitled Student Modelling The Key to Individualized Knowledge Based Instruction which was held May 4 8 1991 at Ste Adele Quebec Canada The workshop was co directed by Gordon McCalla and Jim Greer of the ARIES Laboratory at the University of Saskatchewan The workshop focused on the problem of student modelling in intelligent tutoring systems An intelligent tutoring system ITS is a computer program that is aimed at providing knowledgeable individualized instruction in a one on one interaction with a learner In order to individualize this interaction the ITS must keep track of many aspects of the learner how much and what he or she has learned to date what learning styles seem to be successful for the student and what seem to be less successful what deeper mental models the student may have motivational and affective dimensions impacting the learner and so on Student modelling is the problem of keeping track of all of these aspects of a learner's learning

Intelligent Language Tutors V. Melissa Holland,Jonathan D. Kaplan,Michelle R. Sams,2014-01-09 The techniques of natural language processing NLP have been widely applied in machine translation and automated message understanding but have only recently been utilized in second language teaching This book offers both an argument for and a critical examination of this new application with an examination of how systems may be designed to exploit the power of NLP accommodate its limitations and minimize its risks This volume marks the first collection of work in the U S and Canada that incorporates advanced human language technologies into language tutoring systems covering languages as diverse as Arabic Spanish Japanese and English The book is organized into sections that express the levels of analysis dealt with in learning and teaching a language and with the tasks of the student as writer reader conversant and actor in the world These sections bring together research by specialists in linguistics artificial intelligence psychology instructional design and language teaching In addition to providing detailed descriptions of working systems amply illustrated with screens from lesson and authoring interfaces the contributors address a spectrum of common issues What can current NLP technology contribute to computer assisted language instruction and to research on language learning How can this technology meet the demands of pedagogical theory for communicative language teaching in authentic contexts How can designers constrain tutoring environments to ensure accurate analysis of learners language What can NLP based systems teach us about language acquisition about linguistic theory and about theories of language pedagogy What lessons have been learned in using these systems to date Discipline specific issues are illuminated as well the relative merits of the major syntactic frameworks for NLP based language tutoring the adaptation of theories like lexical conceptual structure to support semantic interpretation the integration of input language with visual microworlds and dialogue games the pragmatics of the tutoring discourse the selection of instructional principles to guide system design and the accommodation of design to individual differences and

learner styles A concluding section assesses this work from larger theoretical and practical perspectives experimental psychology and psycholinguistics linguistics language teaching and second language acquisition research **New Directions for Intelligent Tutoring Systems** Ernesto Costa, 2012-12-06 This book is a result of the NATO Advanced Research Workshop on New Directions for Intelligent Tutoring Systems held in Sintra Portugal October 6 10 1990 The main idea behind the workshop was to bring together scientists with different concerns about Intelligent Tutoring Systems ITS in order to discuss the positive and negative aspects of the current architecture paradigm expert module student module instructional module and interface module and eventually propose some modifications or radical changes to it This was a consequence of the increasing malaise felt currently by researchers in the area of artificial intelligence and education and in particular by those concerned with ITS One symptom of this state of affairs is the fact that people have started talking about Intelligent Learning Environments ILE instead of ITS To understand the reasons for this situation we promoted the discussion of questions like To what extent do we need the technology of expert systems in ITS Which other relevant AI techniques and methodologies are urgently needed Is ITS a tool for knowledge communication or is it rather a belief system How can the research already done on interactions among agents be utilized Is it possible to find a formal theory to describe and solve the current problems with ITS The book contains the revised versions of the papers presented at the workshop The new texts reflect the discussions that took place at the meeting Authoring Tools for Advanced Technology Learning Environments T. Murray, S. Blessing, S. Ainsworth, 2013-04-18 This edited book gives a comprehensive picture of the state of the art in authoring systems and authoring tools for advanced technology instructional systems It includes descriptions of fifteen systems and research projects from almost every significant effort in the field The book will appeal to researchers teachers and advanced students working in education instructional technology and computer based education psychology cognitive science and computer science Pedagogy and Learning with ICT Bridget Somekh, 2007-06-11 Bridget Somekh draws on her experience of researching the introduction of ICT into education to look at ICT development over the last twenty years The book provides a fascinating in depth analysis of the nature of learning ICT pedagogies and the processes of change for teachers schools and education systems It covers the key issues relating to the innovation of ICT that have arisen over this period including the process of change educational vision for ICT teacher motivation and engagement the phenomenon of fit to existing practices systemic constraints policy and evaluation of its implementation students motivation and engagement the penetration of ICT into the home online learning and the disembodied teacher Intelligent Tutoring Systems Claude Frasson, Gilles Gauthier, 1992-05-27 This volume of the Encyclopaedia offers a systematic introduction and a comprehensive survey of the theory of complex spaces It covers topics like semi normal complex spaces cohomology the Levi problem q convexity and q concavity It is the first survey of this kind The authors are internationally known outstanding experts who developed substantial parts of the field The book contains seven chapters and an introduction written by

Using Information Technology in Mathematics Education James Tooke, Norma Henderson, 2024-11-15 Computers have changed the ways that mathematics are taught and learned Is your institution taking advantage of what today's technology offers With contributions from researchers and practitioners alike Using Information Technology in Mathematics Education explores the impact of the computer on the curriculum the teaching and learning of mathematics and the professional development of teachers both pre service and in service As editor James Tooke states The connection between mathematics and the computer is obvious Elementary notions of mathematics gave rise to the computer advanced notions gave it a more powerful state As the computer advanced it expanded mathematics allowing the creation of further branches of the field for instance fractal geometry had no reality until the advent of high speed computers In its look at the relationship between mathematics the computer and mathematics education Using Information Technology in Mathematics Education addresses the computer as a vehicle for teaching calculus at Texas A M includes reports from several programs that have utilized the computer when teaching mathematics at lower levels of content than calculus such as intermediate algebra and geometry examines the computer's role in student learning probability discusses the use of computers in the professional development of teachers explores ways to use computers to reduce mathematics anxiety Using Information Technology in Mathematics Education examines the history and impact of computers in mathematics and mathematics education from the early crude computer assisted instruction efforts through LOGO software for elementary schools through MAPLE for the university to the Web based calculus courses now being offered by outstanding universities Use it to facilitate learning and teacher growth in your institution

The Role of Communication in Learning To Model Paul Brna, Michael Baker, Keith Stenning, Andree Tiberghien, 2014-05-12 In this book a number of experts from various disciplines take a look at three different strands in learning to model They examine the activity of modeling from disparate theoretical standpoints taking into account the individual situation of the individuals involved The chapters seek to bridge the modeling of communication and the modeling of particular scientific domains In so doing they seek to throw light on the educational communication that goes on in conceptual learning Taken together the chapters brought together in this volume illustrate the diversity and vivacity of research on a relatively neglected yet crucially important aspect of education across disciplines learning to model A common thread across the research presented is the view that communication and interaction as fundamental to most educational practices and as a repository of conceptual understanding and a learning mechanism in itself is intimately linked to elaborating meaningful coherent and valid representations of the world The editors hope this volume will contribute to both the fundamental research in its field and ultimately provide results that can be of practical value in designing new situations for teaching and learning modeling particularly those involving computers
