Spurious Coin Bernadette Longo,2000-05-04 Spurious Coin constructs a cultural history of technical writing in the United States and the system of scientific knowledge and power it controls Embedded in this history are tensions between scientific and liberal arts knowledge making that render technical writing both the genuine and counterfeit coin of scientific knowledge within our culture When scientific knowledge is made by scientists and engineers it can circulate as genuine

currency in an economy where communication makes knowledge When scientific knowledge is made by liberal arts trained technical writers however it circulates as spurious currency and threatens the purity of the knowledge economy Because the stability of the scientific knowledge economy is at stake scientists and technical writers often find themselves at odds over the value of scientific knowledge minted by non scientists Longo constructs this cultural history around a framework of five intellectual trends the use of clear correct English maximum efficiency of production and operation the need to contribute to a general fund of scientific knowledge for the betterment of the human condition the tension between the role of science and art within a culture and a redemptive urge to purify language and standardize practice She also explores the role of mechanical engineers in designing management systems which rely on technical writing to control operations and profits

,1986 **Workers, Managers, and Technological Change** Daniel B. Cornfield,2013-11-11 Workers Managers and Technological Change Emerging Patterns of Labor Relations contributes significantly to an important subject Technological change is one of the most powerful forces transforming the American industrial relations In fact the synergistic relationships between technology and indus system trial relations are so complex that they are not well or completely understood We know that the impact of technology while not independent of social forces already has been profound it has transformed occupations creating new skills and destroying others altered the power relationships between workers and managers and changed the way workers learn and work Tech nology also has made it possible to decentralize some economic activities out of large metropolitan areas and into small towns rural areas and other coun tries Most important information technology

makes it possible for international corporations to operate on a global basis. Indeed, some international corporations, especially those based in the United States, are losing their national identities, detaching the welfare of corporations from that of particular workers and communities. Internationalization facilitated by information technology has transformed industrial relations systems. A major objective of the traditional American industrial relations system was to take labor out of competition.
