Justice Community And Dialogue In International Relations:

Justice, Community and Dialogue in International Relations Richard Shapcott, 2001-11-08 Shapcott investigates the question of justice in a culturally diverse world asking if it is possible to conceive of a universal or cosmopolitan community in which justice to difference is achieved Justice to difference is possible according to Shapcott by recognising the particular manner in which different humans identify themselves Such recognition is most successfully accomplished through acts of communication and in particular conversation The accounts of understanding developed by H G Gadamer provide a valuable way forward in this field The philosophical hermeneutic account of conversation allows for the development of a level of cosmopolitan solidarity that is both thin and universal and which helps to provide a more just resolution of the tension between the values of community and difference Students and scholars of international relations international ethics and philosophy will be interested in this original study

Justice, Community and Dialogue in International Relations Richard Shapcott, 2001 Communitarian International Relations Emanuel Adler, 2005 Emanuel Adler is one of the leading IR theorists of his generation This volume brings together a collection of his articles including four new and previously unpublished chapters

Justice and World Order George Andreopoulos, Henry F Carey, 2022-04-28 This book critically assesses the impact of Richard A Falk's scholarship which has spanned nearly six decades and addressed key issues at the intersections of international law and relations Falk has offered powerful insights on the nature and reach of international law international relations and the structure of their respective processes in order to assess the main challenges to the creation of a just world order the path breaking concept which he has helped to develop Continuing in the critical spirit that has informed Richard's work as a scholar and a public intellectual this book reflects a multiplicity of perspectives and approaches in the analysis and assessment of these selected themes This volume looks at four key themes of Falk's work International Law and International Relations Theories and Concepts War Peace and Human Security Social and Political Justice and The Scholar as Citizen and Activist This will be a useful book for scholars and students of international law global governance political theory and international relations theory and for those studying human security international organizations and transnational activism

Justice and Reconciliation in World Politics Catherine Lu, 2017-11-07 This book examines how justice and reconciliation in world politics should be conceived in response to the injustice and alienation of modern colonialism

Diplomatic Interventions K. Fierke, 2005-04-22 Diplomatic Interventions argues that war is a social construction In so doing it unsettles the definition of intervention as a coercive interference by one state in the affairs of another to examine the range of communicative or diplomatic practices which through their presence modify the experience of war The tension between claims that war is pervasive and that war is a social construct is analysed in relation to a range of moral legal military economic cultural and therapeutic interventions The concluding chapter highlights how the book itself is a critical intervention that requires us look at again from a new angle at international practice

International Relations Bilal Karabulut, 2024-03-29 International Relations Theories Concepts and Organizations analyzes the changing dynamics of world politics on a rational scale It presents the conceptual and theoretical codes of International Relations IR to academics journalists politicians and thinkers In addition to concepts and theories intergovernmental and non governmental organizations NGOs that have an important place in IR are examined Under the influence of the globalization process radical changes are taking place in world politics Increasingly complex world politics is transforming into a multi layered structure This book has been prepared to make IR understandable and accessible clearly

Reconstructing Human Rights Joe Hoover, 2016-05-27 We live in a human rights world The language of human rights claims and numerous human rights institutions shape almost all aspects of our political lives yet we struggle to know how to judge this development Scholars give us good reason to be both supportive and sceptical of the universal claims that human rights enable alternatively suggesting that they are pillars of cross cultural understanding of justice or the ideological justification of a violent and exclusionary global order All too often however our evaluations of our human rights world are not based on sustained consideration of their complex ambiguous and often contradictory consequences Reconstructing Human Rights argues that human rights are only as good as the ends they help us realise We must attend to what ethical principles actually do in the world to know their value So for human rights we need to consider how the identity of humanity and the concept of rights shape our thinking structure our political activity and contribute to social change Reconstructing Human Rights defends human rights as a tool that should enable us to challenge political authority and established constellations of political membership by making new claims possible Human rights mobilise the identity of humanity to make demands upon the terms of legitimate authority and challenges established political memberships In this work it is argued that this tool should be guided by a democratising ethos in pursuit of that enables claims for more democratic forms of politics and more inclusive political communities While this work directly engages with debates about human rights in philosophy and political theory in connecting our evaluations of the value of human rights to their worldly consequences it will also be of interest to scholars considering human rights across disciplines including Law Sociology and Anthropology

Christian Cosmopolitanism Felipe Amin Filomeno, 2024-11-08 Investigates whether and how deliberative dialogues about immigration in Christian congregations can perform a cosmopolitan role *The Cosmopolitanism Reader* Garrett W. Brown, David Held, 2010-12-28 In response to a renewed cosmopolitan enthusiasm this volume brings together 25 essays in the development of cosmopolitan thought by distinguished cosmopolitan thinkers and critics It looks at classical cosmopolitanism global justice culture and cosmopolitanism political cosmopolitanism and cosmopolitan global governance

Justice, Sustainability, and Security E. Heinze, 2013-07-17 Justice Sustainability and Security not only enhances our knowledge of these issues but it teases out our moral dimensions and offer prescriptions for how governments and global actors might craft their policies to better consider their effects on the global human condition *Handbook of Political*

Discourse Piotr Cap, 2023-02-14 Synthesising diverse research avenues for politics discourse and political discourse this cutting edge Handbook examines the formative traditions current theoretical and methodological landscape and genres and domains over which political discourse extends **The Cambridge Companion to Dewey** Molly Cochran, 2010-07-22 John Dewey 1859 1952 was a major figure of the American cultural and intellectual landscape in the first half of the twentieth century The contributors to this Companion examine the wide range of Dewey s thought and provide a critical evaluation of his philosophy and its lasting influence Justice, Community and Dialogue in International Relations Richard Shapcott, 2001-11-08 This book is concerned with the issue of cultural diversity and international morality The author asks whether cultural diversity presents an obstacle to the development of ethical codes which could be acceptable to cultures around the world He argues that the human capacity to engage in conversation and the ability to understand each other despite linguistic and cultural differences can provide the basis for the development of a world wide cosmopolitan moral community Conversation can be a moral act in which participants treat each other as equals despite their differences

Justifying violence Naomi Head, 2017-10-03 When is the use of force for humanitarian purposes legitimate The book examines this question through one of the most controversial examples of humanitarian intervention in the post Cold War period the 1999 NATO intervention in Kosovo Justifying Violence applies a critical theoretical approach to an interrogation of the communicative practices which underpin claims to legitimacy for the use of force by actors in international politics Drawing on the theory of communicative ethics the book develops an innovative conceptual framework which contributes a critical communicative dimension to the question of legitimacy that extends beyond the moral and legal approaches so often applied to the intervention in Kosovo The empirical application of communicative ethics offers a provocative and nuanced account which contests conventional interpretations of the legitimacy of NATO s intervention *Critical Theory of International Politics* Steven C. Roach, 2013-05-13 Critical international theory encompasses several distinct radical approaches that focus on identity difference hegemonic power and order As an applied theory critical international theory draws on critical social theories to shed light on international processes and global transformations While this approach has led to increasing interest in formulating an empirically relevant critical international theory it has also revealed the difficulties of applying critical theory to international politics What are these difficulties and problems And how can we move beyond them This book addresses these questions by investigating the intellectual currents and key debates of critical theory from Kant and Hegel to Habermas and Derrida and the recent work of critical international theory including Robert Cox and Andrew Linklater By drawing on these debates the book formulates an original theory of complementarity that brings together critical theory and critical international theory It argues that complementarity a governing principle in international law and politics offers a conceptual framework for working toward two goals engaging the changing contexts and forms of resistance and redressing some of the difficulties of applying critical theory to international relations In adopting three

critical perspectives on complementarity to analyze the evolving social and political contexts of global justice this book provides an essential resource for undergraduate and graduate students and scholars interested in the application of critical theory to international relations

Constitutive Justice William A. Barbieri, 2015-09-15 Both classical and modern accounts of justice largely overlook the question of how the communities within which justice applies are constituted in the first place This book addresses that problem arguing that we need to accord a place to the theory of constitutive justice alongside traditional categories of distributive and commutative justice

Human Rights and Justice Melissa Labonte, Kurt Mills, 2018-06-27 The relationship between human rights and justice is significant deep and ultimately contested The two terms themselves human rights and justice have experienced both conceptual and operational pushback from many quarters in recent years Although an understanding of justice is inherent in broad human rights discourses there is no clear consensus on how to integrate and reconcile these concepts both as a means of advancing knowledge and as a mechanism for the development of sound and effective policy at the global regional and national levels Further expansions of the boundaries of both human rights and justice make any clear and settled understanding of the relation difficult to ascertain This volume tackles these issues in a coherent and complementary manner It examines a range of philosophical economic and social perspectives that are key to understanding the nature of the linkages between human rights and justice written by scholars who are at varying stages of their careers and whose ongoing work has sparked dialogue and exchange within and across these fields This work will be of interest to students and scholars of human rights international relations and ethics

Norm Dynamics in Multilateral Arms Control Harald Muller, Carmen Wunderlich, 2013-04-01 Efforts to create or maintain rules to contain the risks stemming from an unrestrained multilateral arms race are at the core of a world order based on consensual norms rather than on a pure balance of power Whereas security cooperation is conventionally considered to be motivated primarily by interest and security based factors studies have shown that all actors use moral arguments and are deeply embedded in the normative patterns surrounding their realm of action Norm Dynamics in Multilateral Arms Control based on research conducted by a large PRIF team led by Harald M

Affective Communities in World Politics Emma Hutchison, 2016-03-11 Emotions underpin how political communities are formed and function Nowhere is this more pronounced than in times of trauma The emotions associated with suffering caused by war terrorism natural disasters famine and poverty can play a pivotal role in shaping communities and orientating their politics This book investigates how affective communities emerge after trauma Drawing on several case studies and an unusually broad set of interdisciplinary sources it examines the role played by representations from media images to historical narratives and political speeches Representations of traumatic events are crucial because they generate socially embedded emotional meanings which in turn enable direct victims and distant witnesses to share the injury as well as the associated loss in a manner that affirms a particular notion of collective identity While ensuing political orders often re establish old patterns traumatic events can also

generate new emotional cultures that genuinely transform national and transnational communities
