**Anaphora Resolution** Ruslan Mitkov, 2014-02-24 Teaching computers to solve language problems is one of the major challenges of natural language processing. There is a large amount of interesting research devoted to this field. This book fills an existing gap in the literature with an up to date survey of the field including the author's own contributions. A number of different fields overlap in anaphora resolution: computational linguistics, natural language processing, NLP, grammar, semantics, pragmatics, discourse analysis, and artificial intelligence. This book begins by introducing basic notions and terminology, moving onto early research methods and approaches, recent developments and applications, and future directions. It addresses various issues related to the practical implementation of anaphora systems such as rules employed, algorithms implemented, or evaluation techniques used. This is an ideal reference book for students and researchers in this particular area of computational linguistics. Since anaphora resolution is vital for the development of any practical NLP system, the book will be of interest to readers from both academia and industry.

**Grammar of Spoken and Written English** Douglas Biber, Stig Johansson, Geoffrey N. Leech, Susan Conrad, Edward Finegan, 2021-11-15 The completely redesigned Grammar of Spoken and Written English is a comprehensive corpus based reference grammar. GSWE describes the structural characteristics of grammatical constructions in English as do other reference grammars. But GSWE is unique in that it gives equal attention to describing the patterns of language use for each grammatical feature based on empirical analyses of grammatical patterns in a 40 million word corpus of spoken and written registers. Grammar in use is characterized by three inter related kinds of information: frequency of grammatical features in spoken and written registers, frequencies of the most common lexico grammatical patterns, and analysis of the discourse factors influencing choices among related grammatical features. GSWE includes over 350 tables and figures highlighting the results of corpus based investigations. Throughout the book authentic examples illustrate all research findings. The empirical descriptions document the lexico grammatical features that are especially common in face to face conversation compared to those that are especially common in academic writing. Analyses of fiction and newspaper articles are included as further benchmarks of language use. GSWE contains over 6 000 authentic examples from these four registers illustrating the range of lexico grammatical features in real world speech and writing. In addition, comparisons between British and American English reveal specific regional differences. Now completely redesigned and available in an electronic edition, the Grammar of Spoken and Written English remains a unique and indispensable reference work for researchers, language teachers, and students alike.

**Self-Reflexive Journalism** Anna Marchi, 2019-03-21 This book develops a corpus assisted approach to the study of self reflexivity in journalism and examines the ways in which news workers and subsequently news organizations choose to promote an identity for themselves and the ideologies that accompany them. Using The Guardian as a case study, the volume draws on its Corpus Assisted Discourse Studies (CADS) to explore ways in which a newspaper can reflect upon itself, including how newspapers conceptualize the role of the media, how they define

good vs bad journalism what they see as professional values how they attempt to cement community membership amongst their readers how they construct and project their overall identity and role as newspapers and also how they see their position within the larger community A chapter on the book's methodological framework reflects on critical aspects of CADS including triangulation objectivity and subjectivity total accountability and replicability CADS methods are applied in the analysis chapters with accompanying reflections on what we learn about the strengths and also maybe about some of the limitations of corpus methodology A summarizing chapter ties these strands together to make the case for a CADS approach to journalism and media studies and look to the future at how the digital age has shaped the journalism landscape With its focus in extending a CADS approach to other aspects of journalism scholarship this volume is key reading for graduate students and researchers in corpus linguistics discourse analysis media studies and journalism studies **New**
