A Theory

of Narrative Drawing Simon Grennan, 2017-06-29 This book offers an original new conception of visual story telling proposing that drawing depictive drawing and narrative drawing are produced in an encompassing dialogic system of embodied social behavior It refigures the existing descriptions of visual story telling that pause with theorizations of perception and the articulation of form The book identifies and examines key issues in the field including the relationships between vision visualization and imagination the theoretical remediation of linguistic and narratological concepts the systematization of discourse the production of the subject idea and institution and the significance of resources of the body in depiction representation and narrative It then tests this new conception in practice two original visual demonstrations clarify the particular dialectic relationships between subjects and media in an examination of drawing style and genre social consensus and self conscious constraint The book s originality derives from its clear articulation of a wide range of sources in proposing a conception of narrative drawing and the extrapolation of this new conception in two new visual demonstrations

Everyday Memory Svein Magnussen, Tore Helstrup, 2007-05-07 This book presents an authoritative overview of memory in everyday contexts Written by an expert team of international authors it gathers together research on some of the more neglected but revealing areas of memory to provide a comprehensive overview of remembering in real life situations Contributions from leading experts deal with a variety of important questions concerning everyday memory from under researched areas such as memory for odours to more well known areas like collective memory Topics covered also include Beliefs about memory and the metaphors used to discuss memory The relation between self referent beliefs and actual memory performance The development of autobiographical memory Everyday Memory summarises current knowledge and presents new interpretations and hypotheses to be explored by future research It discusses aspects of human memory which are frequently ignored or dealt with only very briefly by ordinary textbooks and as a result will have a broad appeal for researchers and students

Blind Vision Zaira Cattaneo, Tomaso Vecchi, 2011-03-04 An investigation of the effects of blindness and other types of visual deficit on cognitive abilities Can a blind person see The very idea seems paradoxical And yet if we conceive of seeing as the ability to generate internal mental representations that may contain visual details the idea of blind vision becomes a concept subject to investigation In this book Zaira Cattaneo and Tomaso Vecchi examine the effects of blindness and other types of visual deficit on the development and functioning of the human cognitive system Drawing on behavioral and neurophysiological data Cattaneo and Vecchi analyze research on mental imagery spatial cognition and compensatory mechanisms at the sensorial cognitive and cortical levels in individuals with complete or profound visual impairment They find that our brain does not need our eyes to see Cattaneo and Vecchi address critical questions of broad importance the relationship of visual perception to imagery and working memory and the extent to which mental imagery depends on normal vision the functional and neural relationships between vision and the other senses the specific aspects of the visual experience that are crucial to cognitive development or specific cognitive mechanisms and the extraordinary

plasticity of the brain as illustrated by the way that in the blind the visual cortex may be reorganized to support other perceptual or cognitive functions. In the absence of vision the other senses work as functional substitutes and are often improved. With Blind Vision Cattaneo and Vecchi take on the tyranny of the visual pointing to the importance of the other senses in cognition. *Aesthetics and the Sciences of Mind* Gregory Currie, Matthew Kieran, Aaron Meskin, Jon Robson, 2014

How far should philosophical accounts of the value and interpretation of art be sensitive to the scientific approaches used by psychologists, sociologists and evolutionary thinkers? A team of experts urge different answers to this question and explore how empirical inquiry can shed light on problems traditionally regarded as philosophical. *Cognitive Psychology* Michael W. Eysenck, Mark T. Keane, 2013-09-11

Theatres of Thought Daniel Watt, 2021-02-19 Theatre fundamentally makes things appear Philosophy fundamentally makes things appear Philosophy is at work in all disciplines The issue is less about bringing them together but rather articulating the fact that they like science and art have never been truly apart Theatre has been gradually increasing its theoretical articulation over decades fascinated by the possibility of transforming thought into spectacle The essays collected in this volume address these issues from wide ranging perspectives and approaches They arise from meetings of the Theatre Performance and Philosophy working group at the 2005 and 2006 conferences of TaPRA Theatre and Performance Research Association and from papers presented under the auspices of CTPP Centre for Theatre Performance and Philosophy at Aberystwyth University

The Phenomenology of Embodied Subjectivity
Rasmus Thybo Jensen, Dermot Moran, 2014-01-09 The 17 original essays of this volume explore the relevance of the phenomenological approach to contemporary debates concerning the role of embodiment in our cognitive emotional and

practical life The papers demonstrate the theoretical vitality and critical potential of the phenomenological tradition both through critically engagement with other disciplines medical anthropology psychoanalysis psychiatry the cognitive sciences and through the articulation of novel interpretations of classical works in the tradition in particular the works of Edmund Husserl Maurice Merleau Ponty and Jean Paul Sartre The concrete phenomena analyzed in this book include chronic pain anorexia melancholia and depression Expanding the Boundaries of Health and Social Science Frank Kessel,Patricia Rosenfield,Norman Anderson,2008-03-11 It is now widely recognized that research on human health requires more than a focus on human biology and disease entities Lifestyles attitudes stress education income all are now understood to contribute to the spread of disease the effectiveness of curative therapies and the prevention of illness as well as to good health and an enhanced sense of well being However despite such developments and the rise of interdisciplinary research there is still considerable debate about how best to conduct research and shape policies that insightfully integrate concepts and methods drawn from the full range of the health social and behavioral sciences Moreover scholars and researchers who wish to engage in such interdisciplinary inquiry have no texts that serve as substantive and practical guides to the most effective avenues This volume fills this unfortunate gap by presenting a series of case studies that provide a variety of illustrative models of how best to undertake interdisciplinary research on health All the authors have successfully carried out innovative collaborative research programs they give compelling accounts of the benefits of interdisciplinary research and the central strategies required for successfully achieving such benefits This volume will be an invaluable resource for scholars and scientists as well as for decision makers in academic settings foundations and government agencies seeking to develop and promote interdisciplinary programs that expand the boundaries of research dedicated to improving human health and well being Interdisciplinary Research : Case Studies from Health and Social Science Frank Kessel,Patricia Rosenfield Carnegie Corporation of New York,Norman Anderson American Psychological Association,2008-03-11 Interdisciplinary research now receives a great deal of attention because of the rich creative contributions it often generates But a host of factors institutional interpersonal and intellectual also make a daunting challenge of conducting research outside one s usual domain This newly updated and revised edition of Interdisciplinary Research is a substantive and practical guide to the most effective avenues for collaborative and integrative research in the social behavioral and bio medical sciences It provides answers to questions such as what is the best way to conduct interdisciplinary research on topics related to human health behavior and development Which are the most successful interdisciplinary research programs in these areas How do you identify appropriate collaborators How do you find dedicated funding streams How do you overcome peer review and publishing challenges This is the only book that provides answers directly from researchers who have carried out successful interdisciplinary programs The editors give a concise of account of the lessons that can be taken from the book and then present a series of case studies that reveal the most successful interdisciplinary research programs These programs provide

a variety of models of how best to undertake interdisciplinary research Each of the chapter authors has carried out innovative collaborative programs and all give compelling accounts of the benefits of interdisciplinary research and the central strategies required to achieve them
