Internet and Emotions Tova Benski, Eran Fisher, 2013-11-07 Nothing seems more far removed from the visceral bodily experience of emotions than the cold rational technology of the Internet But as this collection shows the internet and emotions intersect in interesting and surprising ways Internet and Emotions is the fruit of an interdisciplinary collaboration of scholars from the sociology of emotions and communication and media studies It features theoretical and empirical chapters from international researchers who investigate a wide range of issues concerning the sociology of emotions in the context of new media The book fills a substantial gap in the social research of digital technology and examines whether the internet invokes emotional states differently from other media and unmediated situations how emotions are mobilized and internalized into online practices and how the social definitions of emotions are changing with the emergence of the internet It explores a wide range of behaviors and emotions from love to mourning anger resentment and sadness What happens to our emotional life in a mediated disembodied environment without the bodily element of physical co presence to set off emotional exchanges Are

there qualitatively new kinds of emotional exchanges taking place on the internet These are only some of the questions explored in the chapters of this book with quite surprising answers
