## Internet Video:

**Internet Video Data Streaming** Ye Tian, Min Zhao, Xinming Zhang, 2017-10-20 This book investigates the problem of reducing operating cost for a video streaming content delivery network CDN including both the CDN's energy and traffic costs. It first introduces the key issues and design choices of representative real world CDNs and discusses the energy saving techniques for data centers and CDNs. Then based on a measurement study on a large video streaming CDN it reveals an inherent conflict between improving a video streaming CDN's energy efficiency for energy saving and maintaining the CDN's ISP friendly server selection policy. Further it discusses a cost aware capacity provisioning algorithm that not only allows the service capacity of a CDN's server clusters in numerous ISPs to be dynamically planned but also means that the overall operating cost including both the energy consumptions and the cross ISP traffics can be further optimized. In addition it uses the workload derived from real world measurement and also implements real values of the actual power and bandwidth prices to evaluate the capacity provisioning algorithm showing that it can significantly reduce the overall operating cost of a video streaming CDN and effectively avoid frequent server switches. Lastly the book outlines a number of potential research directions regarding cost aware content delivery. The measurement analysis and optimization methodologies and results presented in this book are of particular interest to researchers in the Internet and networking area. *IPTV and Internet*

*Internet Video Culture in China* Marc L Moskowitz, 2019-05-08 Examining Internet culture in the People's Republic of China Taiwan Hong Kong and the US this book analyzes videos which entertain both English and Chinese speaking viewers to gain a better understanding of cultural similarities and differences. Each of the chapters in the volume studies streaming videos from YouTube and its Chinese counterparts Tudou and Youku with the book using a combination of interpretative analysis of content commentary and ethnographic interviews. Employing a diverse range of examples from Michael Jackson

musical mash ups of Cultural Revolution visuals to short clips of Hitler ranting about twenty first century issues with Chinese subtitles this book goes on to explore the ways in which traditional beliefs regarding gender romance religion and politics intersect Looking at how these issues have changed over the years in response to new technologies and political economies it also demonstrates how they engage in regional transnational and global dialogues Comparing and incorporating the production of videos with traditional media such as television and cinema Internet Video Culture in China will be useful to students and scholars of Internet and digital anthropology as well as Cultural Studies and Chinese Studies more generally

**Ecologies of Internet Video** John Hondros,2018-05-24 This book explores the complex dynamic and contested webs of relationships in which three different groups of video makers found themselves when distributing their work on the Internet It draws upon both the Deleuzian notion of assemblage and Actor Network Theory which together provide a rich conceptual framework for characterizing and analysing these webs The groups examined are a UK video activist project a community of film and television fans originating in the US and an association of US community television producers Rather than taking YouTube as its point of departure this book centres on the groups themselves contextualizing their contemporary distribution practices within their pre Internet histories It then follows the groups as they drew upon various Internet technologies beyond YouTube to create their often complex video distribution assemblages a process that entangled them in these webs of relationships Through the analysis of detailed ethnographic fieldwork conducted across a period of several years this book demonstrates that while the groups found some success in achieving their various goals as video makers their situations were often problematic and their agency limited with their practices contested by both human and technological actors within their distribution assemblages
