High Frontiers Kenneth Michael Bauer, 2004-04-07 Dolpo is a culturally Tibetan enclave in one of Nepal's most remote regions The Dolpo pa or people of Dolpo share language religious and cultural practices history and a way of life Agro pastoralists who live in some of the highest villages in the world the Dolpo pa wrest survival from this inhospitable landscape through a creative combination of farming animal husbandry and trade High Frontiers is an ethnography and ecological history of Dolpo tracing the dramatic transformations in the region's socioeconomic patterns Once these traders passed freely between Tibet and Nepal with their caravans of yak to exchange salt and grains they relied on winter pastures in Tibet to maintain their herds After 1959 China assumed full control over Tibet and the border was closed restricting livestock migrations and sharply curtailing trade At the same time increasing supplies of Indian salt reduced the value of Tibetan salt undermining Dolpo's economic niche Dolpo's agro pastoralists were forced to reinvent their lives by changing their migration patterns adopting new economic partnerships and adapting to external agents of change The region has been transformed as a result of the creation of Nepal's largest national park the making of Himalaya a major motion picture filmed on location the increasing presence of nongovernmental organizations and a booming trade in medicinal products High Frontiers examines these transformations at the local level and speculates on the future of pastoralism in this region and across the Himalayas

**On Farm Conservation of Agricultural Biodiversity in Nepal: Managing diversity and promoting its benefits** Bhuwon Ratna Sthapit, 2005

**Himalayan Biodiversity in the Changing World** Pavel Kindlmann, 2011-09-18 This book presents some results on selected taxa in the Himalayan region mainly Nepal pinpoints the threats to their survival and suggests ways how to avoid their extinction Most chapters are based on graduate research projects relatively long term field studies The data presented here can be a good source of updated information on the subject and will prove to be a very useful reference in future studies of Himalayan biodiversity They also tend to pinpoint the existing gaps in our knowledge of this region All the chapters are based on recent trends of biodiversity

and conservation vision so the book can be a potential alternative to the existing relatively older books with outdated vision and information. Its main goal however is to disseminate the information about biodiversity conservation problems in the Himalayan region among the people in the developed world. *Hindu Kush-Himalaya Watersheds Downhill: Landscape Ecology and Conservation Perspectives* Ganga Ram Regmi, Falk Huettmann, 2020-05-04. This book describes the myriad components of the Hindu Kush Himalaya HKH region. The contributors elaborate on challenges, failures and successes in efforts to conserve the HKH, its indigenous plants and animals and the watershed that runs from the very roof of the planet via world rivers to marine estuaries supporting a human population of some two billion people. Readers will learn how the landforms, animal species and humans of this globally fascinating region are connected and understand why runoff from snow and ice in the world's tallest mountains is vital to inhabitants far downstream. The book comprises forty-five chapters organized in five parts. The first section, Landscapes, introduces the mountainous watersheds of the HKH, its weather systems, forests and the 18 major rivers whose headwaters are here. The second part explores concepts, cultures and religions including ethnobiology and indigenous regimes, two thousand years of religious tradition and the history of scientific and research expeditions. Part Three discusses policy, wildlife conservation, management, habitat and biodiversity data as well as the interaction of animals and humans. The fourth part examines the consequences of development and globalization from hydrodams to roads and railroads to poaching and illegal wildlife trade. This section includes studies of animal species including river dolphins, woodpeckers and hornbills, langurs, snow leopards and more. The concluding section offers perspectives and templates for conservation, sustainability and stability in the HKH, including citizen science projects and a future challenged by climate change, growing human population and global conservation decay. A large assemblage of field and landscape photos combined with eye witness accounts presents a 50-year local and wider perspective on the HKH. Also included are advanced digital topics: data sharing, open access, metadata, web portal, databases, geographic information systems, GIS software and machine learning and data mining concepts, all relevant to a modern scientific understanding and sustainable management of the Hindu Kush Himalaya region. This work is written for scholars, landscape ecologists, naturalists and researchers alike and it can be especially well suited for those readers who want to learn in a more holistic fashion about the latest conservation issues. **The Extinction Market** Vanda Felbab-Brown, 2017. Emphasizes the disturbing consequences poaching and trafficking pose globally in terms of both biodiversity and public health. *Field Guide to the Birds of Nepal* Richard Grimmett, Carol Inskipp, Tim Inskipp, Hem Sagar Baral, 2020-08-06. This fully updated edition of *Birds of Nepal* is the most comprehensive guide to the birds of this beautiful Himalayan country.
