

Democracy

Introduction

Democracy is mainly a Greek word which means people and their rules, here peoples have the to select their own government as per their choice. Greece was the first democratic country in the world. India is a democratic country where people select their government of their own choice, also people have the rights to do the work of their choice. There are two types of democracy: direct and representative and hybrid or semi-direct democracy. There are many decisions which are made under democracies. People enjoy few rights which are very essential for human beings to live happily.

Our country has the largest democracy. In a democracy, each person has equal rights to fight for development. After the independence, India has adopted democracy, where the people vote those who are above 18 years of age, but these votes do not vary by any caste; people from every caste have equal rights to select their government. Democracy, also called as a rule of the majority, means whatever the majority of people decide, it has to be followed or implemented, the representative winning with the most number of votes will have the power. We can say the place where literacy people are more there shows the success of the democracy even lack of consciousness is also dangerous in a democracy. Democracy is associated with higher human accumulation and higher economic freedom. Democracy is closely tied with the economic source of growth like education and quality of life as well as health care. The constituent assembly in India was adopted by Dr B.R. Ambedkar on 26th November 1949 and became sovereign democratic after its constitution came into effect on 26 January 1950.

Kevin Boyle, 2009-01-01 Presents a selection of questions and answers covering the principles of democracy including human rights free and fair elections open and accountable government and civil society **The Global 1980s** Jonathan Davis, 2019-03-28 The Global 1980s takes an international perspective on the upheaval across the world during the long 1980s 1979 1991 with the end of the Cold War a move towards a free market economic system and the increasing connectedness of the world The 1980s was a decade of unimaginable change At its start dictatorships across the world appeared stable the state was still seen as having a role to play in ensuring people s well being and the Cold War seemed set to continue long into the future By the end of the decade dictatorships had fallen globalisation was on the march and the opening of the Berlin Wall paved the way for the end of the Cold War Divided into four chronological parts sixteen chapters on themes including domestic politics the global spread of democracy international relations and global concerns including AIDS acid rain and nuclear war explore how world wide change was initiated both from above and below The book covers such topics as ideological changes in the liberal democratic west and socialist east protests against nuclear weapons and for democratic governance global environmental worries and the end of apartheid in South Africa Offering an overview of a decade in transition as the global order established after 1945 broke down and a new globalised world order emerged and supported by case studies from across the world this truly global book is an essential resource for students and scholars of the long 1980s and the twentieth century more generally *The Works of Orestes A. Brownson: Explanations and index* Orestes Augustus Brownson, 1887 **One Road to Riches?** Haakon Gjerløw, Carl Henrik Knutsen, Tore Wig, Matthew Charles Wilson, 2022-04-07 Building effective state institutions before introducing democracy is widely presumed to improve

different development outcomes Conversely proponents of this stateness first argument anticipate that democratization before state building yields poor development outcomes In this Element we discuss several strong assumptions that different versions of this argument rests upon and critically evaluate the existing evidence base In extension we specify various observable implications We then subject the stateness first argument to multiple tests focusing on economic growth as an outcome First we conduct historical case studies of two countries with different institutional sequencing histories Denmark and Greece and assess the stateness first argument e g by using a synthetic control approach Thereafter we draw on an extensive global sample of about 180 countries measured across 1789 2019 and leverage panel regressions preparametric matching and sequence analysis to test a number of observable implications Overall we find little evidence to support the stateness first argument

Angle, Yutang Jin, 2024-11-25 In the spring of 2017 US based Confucian philosopher

Stephen C Angle took part in a series of dialogues with Chinese Confucians in Beijing The dialogues engage with topics like the relation between Confucianism and modernity whether Confucianism should be understood as philosophy religion or chief ingredient in a distinctively Chinese culture the status of pivotal modern Confucians like Kang Youwei and Mou Zongsan and more generally the prospects for what Angle calls Progressive Confucianism The present book offers translations of those dialogues into English together with epilogues by the two editors reflecting on what the dialogues tell us about the contemporary prospects for Confucianism

State Capacity and Growth Regimes Patrick A. Imam, Jonathan R. W. Temple, 2025-01-17 Can high levels of state capacity protect countries from slow growth and deepening output collapses Using data for 108 developing countries we classify five year periods using a two dimensional state space based on growth regimes and levels of state capacity We model transitions between them using a finite state Markov chain and then extend this to take political institutions into account We find that high state capacity helps to sustain growth and limit output collapses but these effects are sometimes less striking than the benefits of democracy

Handbook of Revolutions in the 21st Century Jack A. Goldstone, Leonid Grinin, Andrey Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume

demonstrates the kind of open minded systematic analysis that the field of revolutionary studies requires Prof George Lawson Department of International Relations Australian National University Canberra **Society in Focus** William E. Thompson, Joseph V. Hickey, Mica L. Thompson, 2018-11-13 Society in Focus An Introduction to Sociology Ninth Edition is intended for the introduction to sociology course taught at the freshman sophomore level **Political Islam, World Politics and Europe** Bassam Tibi, 2014-07-11 The new and updated edition of Political Islam World Politics and Europe focusses on the shift within political Islam in light of 9 11 and the events of the Arab Spring from a jihadist struggle to institutional Islamism Refuting what has often been referred to by commentators as the moderation of Islamism the second edition of this book introduces the concept of institutional Islamism a process which Tibi argues was accelerated in the aftermath of the Arab Spring Both jihadist and institutional Islamism pursue the same goal of an Islamist state but disagree fundamentally on the strategy for achieving it Whilst jihadism is committed to the idea of a violent Islamic world revolution institutional Islamism embraces political institutions as a means to an end Turning to the events of the Arab Spring in Tunisia Libya and Egypt this book attempts to determine whether an abandonment of violence is enough to underpin a shift to genuine democracy Analysing the fall of Morsi in particular Tibi questions what lessons can be learnt from his presidency and argues that this event will not change the overall trend of development from jihadism to institutional Islamism A timely addition to existing literature this book will be of interest to students and scholars studying Middle Eastern and European Politics Political Islam and International Relations Perspectives in Higher Education M. Boobesh Guptha, Dr. A. Nelson, 2017-11-01 This title was first published in 2001 This series brings together the most significant journal articles to appear in the field of comparative politics since the 1970s The aim is to render accessible to teachers researchers and students an extensive range of essays as a basis for understanding established terrain and new ground **Deformations of Democracy** Helen Beetham, John Schwarzmantel, 2025-02-28 Academics and activists debate current problems of democratic politics and seek ways to renew the ideals of democracy in a climate of disillusionment and cynicism Taking their inspiration from the work of David Beetham an eminent scholar of democracy in theory and practice they analyse features of democratic

crisis today from the rise of authoritarianism to the decline of trust in parliaments They also introduce Beetham s work to a contemporary readership There are new analyses of his writings on Weber Marxism fascism and legitimacy as well as fresh perspectives on his definition of democracy as popular control and equal voice a definition he founded on shared human rights As those rights come under threat from war climate change and advanced techno capitalism as well as from authoritarian politics and direct threats to democratic institutions this book provides a guide to everyone concerned with democracy and its prospects
