recommendations for procedural improvements and the treatment of the corrupt and incompetent and incidentally of those suspected of political and religious dissent Additionally the book presents a body of statistical data on the customs revenue actually collected at individual ports in the 1670s and 1680s and surveys the extent and nature of the maritime trade of the ports Culliford examined It thus not only throws light on the history of the customs service but provides a rare insight into the interactions of economic social and political issues in the later seventeenth century and makes a valuable contribution to the particular histories of the ports and maritime districts visited by this energetic and tenacious investigator State Transport Review ,1959

Selling British Columbia Michael Dawson,2007-10-01 Selling British Columbia is an entertaining examination of the development of the tourist industry in British Columbia between 1890 and 1970 Michael Dawson argues that in order to understand the roots of the fully fledged consumer culture that emerged in Canada after the Second World War it is necessary to understand the connections between the 1930s 1940s and the postwar era Cultural producers such as tourism promoters and the state infrastructure played important roles in fostering consumer demand particularly during the Depression the Second World War and throughout the postwar era Dawson draws upon promotional pamphlets newspapers advertisements and films as well as archival sources regarding government civic and international tourism organizations Central to his book is an examination of the representation of popular imagery and of how aboriginal and British cultures were commodified and marketed to potential tourists He also looks at the gendered aspect of these promotional campaigns particularly during the 1940s and challenges earlier interpretations regarding the relationship between tourism and nature in Canada Historians have tended to focus on either the first wave of consumerism from the 1880s to the 1920s or else on the era of economic expansion that followed World War Two As Dawson shows the 1930 45 period in particular was an important and dynamic one in the creation of Canadian and British Columbian consumer culture Michael Dawson s highly readable and engaging account of the development of the British Columbia tourist industry will be welcomed by British Columbian and Canadian historians as well as other scholars of tourism and consumerism
