Introduction To British Licenses:

A Collection of the Ordinances Passed by the Council of Government and the Proclamations Mauritius, 1923

Ordinances Mauritius, Sir Francis Taylor Piggott, Louis Arthur Thibaud, Francis Taylor Piggott, 1905 Argument Licensing and Agreement Claire Halpert, 2016 The strikingly unrestricted syntactic distribution of nouns in many Bantu languages often leads to proposals that syntactic case does not play an active role in the grammar of Bantu This book offers a different conclusion that the basis of Zulu that Bantu languages have not only a system of structural case but also a complex system of morphological case that is comparable to systems found in languages like Icelandic By comparing the system of argument licensing found in Zulu to those found in more familiar languages Halpert introduces a number of insights onto the organization of the grammar First while this book argues in favor of a case licensing analysis of Zulu it locates the positions where case is assigned lower in the clause than what is found in nominative accusative languages In addition Zulu shows evidence that case and agreement are two distinct operations in the language located on different heads and operating independently of each other Despite these unfamiliarities there is evidence that the timing relationships between operations mirror those found in other languages Second this book proposes a novel type of morphological case that serves to mask many structural licensing effects in Zulu the effects of this case are unfamiliar Halpert argues that its existence is expected given the current typological picture of case Finally this book explores the consequences of case and agreement as dissociated operations showing that given this situation other unusual properties of Bantu languages such as hyper raising are a natural result This exploration yields the conclusion that some of the more unusual properties of Bantu languages in fact result from small amounts of variation to deeply familiar syntactic principles such as case agreement and the EPP

British Contested History Caroline Donnellan,2024-07-25 This book examines the issues arising from British contested history by looking at how it came to be constructed how it developed and how attitudes over time have begun to change towards it It considers how this narrative was first created through the writing of British history It explores the private spaces of the court the political places of the state and the public places of the street Beyond British shores this history has also been enacted through international heritage sites when

objects were removed and taken back to Britain Conclusively it explores how the historic spaces of a maritime city has further entrenched an already complex history of the nation How this research brings new insights into this field is by looking at it through the lens of place space and the spatial turn The underlining research questions are What role does place and space play in historical constructions of the past How do place and space contribute to contested history How can these places and spaces be re appropriated and reused and endowed with new meanings

Pre-legislative scrutiny of the draft Gambling (Licensing and Advertising) Bill Great Britain: Parliament: House of Commons: Culture, Media and Sport Committee,2013-05-01 Around 80% of online gambling in the UK is conducted with operators which are not licensed here In December 2012 the Government published a very short draft Gambling Licensing and Advertising Bill to require overseas gambling operators to obtain a Gambling Commission licence The overseas based remote gambling operators generally opposed the Bill on the grounds it was unnecessary for consumer protection might drive consumers to cheaper unlicensed operators and was principally intended to bring overseas operators within the UK s tax regime Much of the UK based gambling industry sports bodies and organisations working to combat problem gambling supported the principle of the Bill Almost all those who gave oral or written evidence to the Committee raised the issue that the enforcement regime would have to be rigorous in order to provide any of the benefits to consumers The Committee supports the principle that gambling should be regulated on a point of consumption basis The Committee also notes the concerns raised about taxation of the online industry The Government stated that the ability to bring all operators serving UK consumers within the tax net is a consequence but not the prime motivation of the draft legislation The Committee notes in this regard that in setting a tax rate for remote gambling the Treasury should bear in mind that too high a rate would be liable to drive customers and companies into the unregulated black market
