Introduction to Geography Arthur Getis,Judith Getis,Jerome David Fellmann,1998-08 The purpose of the book is to introduce students to the breadth and spatial insights of the field of geography The content is organized around the four major research traditions of the discipline those of earth science culture environment location and area analysis Each of the four parts of the book centres on one of these perspectives The first three parts contain chapters devoted to the subfields of geography The tradition of area analysis regional geography is presented in a single final chapter the regional concept that draws upon the preceding traditions and themes and is integrated with them by cross references Its case studies and examples illustrate the regional geographic application of the systematic themes developed by the earlier chapters

University of Michigan Official Publication ,1965 *Geographies of the Book* Charles W.J. Withers,2016-04-15 The geography of the book is as old as the history of the book though far less thoroughly explored Yet research has increasingly pointed to the spatial dimensions of book history to the transformation of texts as they are made and moved from place to place from authors to readers and within different communities and cultures of reception Widespread recognition of the significance of place of the effects of movement over space and of the importance of location to the making and reception of print culture has been a feature of recent book history work and draws in many instances upon studies within the history of science as well as geography *Geographies of the Book* explores the complex relationships between the making of books in certain geographical contexts the movement of books epistemologically as well as geographically and the ways in which they are received **Catalogue of the Educational Division of the South Kensington Museum** ,1876 **The Bookseller** ,1913 **Shipboard Literary Cultures** Susann Liebich,Laurence Publicover,2022-01-01 The essays collected within this volume ask how literary practices are shaped by the experience of being at sea and also how they forge that experience Individual chapters explore the literary worlds of naval ships whalers commercial vessels emigrant ships and troop transports from the seventeenth to the twentieth first century revealing a rich history of shipboard reading writing and performing

Contributors are interested both in how literary activities adapt to the maritime world and in how individual and collective shipboard experiences are structured through and framed by such activities In this respect the volume builds on scholarship that has explored reading as a spatially situated and embodied practice As our contributors demonstrate the shipboard environment and the ocean beyond it place the mind and body under peculiar forms of pressure and these determine acts of reading and of writing and performing in specific ways
