Udhayakumar, K. Vellaichamy, English as a global language plays a vital role in every one's life Students think that English language opens the door of the world for their future life But as an alien language the learners find it very difficult to understand the language Not only to understand but to read write and speak A social language may be learnt quickly as there are many chances to encounter with public people who speak this as their mother tongue or a community language But English is not a social language so all learners face difficulty This difficulty may be eased out by adopting different methodology for learning English language This could be possible only for educational institutions In India and non English speaking countries English could be learnt only in schools colleges and Universities So it is very important that methodology for English teaching should be often checked and updated Earlier chalk and talk method was adopted In due course it underwent many changes and it now has become student centric and the teacher has become a facilitator for the students in teaching learning process The classroom once a four wall room with a single board and small chalk piece has now become a smart classroom with white smart board and an electronic pen stick Even an LKG classroom is connected to the world and with one click the whole world comes into the classroom through internet services and displayed on the white board If Shakespeare is taught his manuscript of the text is displayed and his life is shown as a video film If the Universe is taught to the students the video of the Universe is shown and the real scientists are explaining the doubts of the students and they chat with the learners As we are living in such a modern and advanced period teaching methodology for English teaching should be updated to meet the challenges of today's world Education is the only way for the humanity to live happily and peacefully Education connects the whole world for the benefit of the human race which is not possible for animal beings and other creatures also In this process English language plays a crucial role and an edition of book chapters may benefit the student and teaching community to update the teaching methodology of English language So this edition is brought to fulfill

Taj Mohammad, Soada Idris, 2022-05-16 *ELT METHODS AND APPROACHES EXPERIMENTS AND OBSERVATIONS* narrates the experiments and observations of different methodological approaches in English Language Teaching. The beginning of each chapter provides a conceptual framework of each method and approach supported by well known critics and scholars in the field. Such a theoretical background to most of the methods and approaches in English Language Teaching may attract students, research scholars and classroom teachers. The book shares personal experiences in writing this book, an amalgam of theory and practice in English Language Teaching. They emphasize the application of those methods and approaches in a particular EFL/ESL situation. That is what seemed to motivate me to write this book, a different source in that it not only provides the conceptual framework of different methods, approaches and techniques but also executes and experiments with them in EFL/ESL situations. The work is unique as it not only experiments with different methods and approaches but also observes what practical challenges learners and teachers face during their implementation as well as how these difficulties can be addressed and overcome. This text has provided adequate scope for learners, the target group to integrate them into the research. They have actively participated in the creation and formation of this book. The book has positively included learners' feedback on the execution, approach and technique. Their feedback is important in assessing whether a method or approach is successful in a specific EFL/ESL environment. Learners' feedback has assisted the authors as they present, discuss and assess the advantages and disadvantages of each method. We have shared personal experiences with different EFL/ESL learners in three countries: the United States of America, Saudi Arabia and India.

*Methodology in Language Teaching* Jack C. Richards, Willy A. Renandya, 2002-04-08 An overview of current approaches, issues and practices in the teaching of English to speakers of other languages. The paperback edition provides an overview of current approaches, issues and practices in the teaching of English to speakers of other languages. The anthology, a broad collection of articles published primarily in the last decade, offers a comprehensive overview to the teaching of English and illustrates the complexity underlying many of the practical planning and instructional activities it involves. These activities include teaching English at elementary, secondary and tertiary levels, teacher training, language testing, curriculum and materials development, the use of computers and other technology in teaching as well as research on different aspects of second language learning. Organized into 16 sections, the book contains 41 seminal articles by well known teacher trainers and researchers. Also included are two sets of discussion questions: a pre-reading background set and a post-reading reflection set.
