International Seattle Creating A Globally Competitive Community:

Holding the Line Ian Townsend Gault, Heather Nora Nicol, 2005 This volume contains contributions from twenty four scholars concerning the significance and implications of the world's borderlands in economic political and socio cultural contexts Together these essays explore the changing role of borders in a global world Are borders increasingly irrelevant under conditions of globalization or can a case be made to demonstrate their continuing importance at various levels of spatial activity Situating itself within a growing border literature Holding the Line argues that contemporary borders facilitate parallel processes of globalization and localization of political activity As such the essays adopt a holistic approach to understanding the impact of boundaries on both society and space They demonstrate that any attempt to create a methodological and conceptual framework for the understanding of boundaries must be concerned with the process of bounding rather than simply the means through which the physical lines of separation are delimited and demarcated This approach renders the notion of a borderless world highly problematic because the latter ignores the important and ongoing relationship between the functional role of borders in the bounding process and the symbolic role of borders as imagined social political and economic constructions embedded within a geographical text The changing characteristics of political boundaries during an era of globalization has become a great focus of interdisciplinary study and this book will appeal to scholars of political geography border studies and international relations

Exchange Pierre Lagayette, 2005 Recueil de textes sur l change culturel symbolique ou mat riel Les auteurs montrent que les changes peuvent constituer le fondement de l entente entre les peuples Des textes analysent cette pratique dans le cadre de relations ethniques clairant la situation des Indiens notamment en Californie et au Mexique

terraformed Mars In *Imagined Frontiers* urban historian and popular culture scholar Carl Abbott looks at the work of American artists who have used novels film television maps and occasionally even performance art to explore these frontiers the metropolitan frontier of suburban development the classic continental frontier of American settlement and the yet unrealized frontiers beyond Earth Focusing on writers and artists working during the past half century an era of global economic and social reach Abbott describes the dialogue between historians and social scientists seeking to understand these frontier places and the artists reimagining them in written and visual fictions This book offers perspectives on such well known authors as T C Boyle and John Updike and on such familiar movies and television shows as *Falling Down* and *The Sopranos* By putting *The Rockford Files* and the cult favorite *Firefly* in conversation with popular fiction writers Robert Heinlein and Stephen King and literary novelists Peter Matthiessen and Leslie Marmon Silko Abbott interweaves the disparate subjects of western history urban planning and science fiction in a single volume Abbott combines all new essays with others previously published but substantially revised to integrate western and urban history literary analysis and American studies scholarship in a uniquely compelling analysis of the frontier in popular culture North American Cities and the Global Economy Peter Karl Kresl, Gary Gappert, 1995-07-18 As the global economy becomes ever more interconnected what role will North American cities play What challenges will North American cities encounter as they become more integrated in the world economy The contributors to this groundbreaking volume examine these questions and offer a candid analysis of urban economics in a global age Taking a multidisciplinary approach contributors address such salient issues as the politics of international engagement planning strategic linkages between cities cross border interaction and networking in North America wage polarization and urban competitiveness Scholars and students in the fields of urban studies economics international studies and urban planning will find this an invaluable resource In addition this volume will also serve a key resource for city practitioners **The Law and Politics of Global Competition** Christopher Townley, Mattia Guidi, Mariana Tavares, 2022 This book hypothesises that the ICN s structures provide powerful influence mechanisms for strong NCAs and NGAs over the weak and competition experts over wider state interests discussing the legitimacy of this from a political and legal theory perspective and analysing the ICN s effectiveness and efficiency Global Community Akira Iriye, 2002-07-06 How did the global community both as an idea and as a reality originate and develop over time This text examines this concept by looking at the emergence growth and activities of international organizations from the 19th century to the 21st Akira Iriye one of this country s most preeminent historians proposes a significant rereading of the history of the past fifty years suggesting that the central influence on the international scene in this period was not the Cold War but rather a deepening web of international interactions The first systematic study of international organizations by a historian *Global Community* moves beyond the usual framework for studying international relations politics war diplomacy and other interstate affairs as it traces the crucial role played by international organizations in determining the shape of the

Congress. House. Committee on Public Works and Transportation. Subcommittee on Economic Development, 1995 Distributed to some depository libraries in microfiche **PNLA Quarterly** Pacific Northwest Library Association, 1993 **Global Competition or Convergence?** Jan Hornát, Lukáš Kindl, 2018-02-01 The dynamics of internal changes in China whether these changes impact its national economy or its political order and distribution of power have imminent influence on its relations with the rest of the world The important and perhaps less treated question vis vis China s rise is how and to what extent do internal changes in China affect its external behavior and

thus its relations with the current world hegemon the United States In addition this publication asks what the clash of two politically culturally and economically different internal orders of the US and China will mean for their future interactions in the twenty first century The aim of this publication is not to measure and encompass the entirety of the posed question but rather to provide an incursion into this problem through two specific case studies one focusing on the interactions of two distinct political cultures and the other on the economic geopolitical and ideological interplay of the US and China on the African continent As will be demonstrated incompatible as the two regimes and their respective foreign policies may seem they will not necessarily predestine conflicts in mutual relations As America can well coexist with China even if it does not meet the Western standards of a liberal democracy so does the competition in Africa between these two major powers not have to amount to a zero sum game At the end of the day both countries might meet halfway in their respective political interactions
