Handbook of Alternative Theories of Economic Development Erik S. Reinert, Jayati Ghosh, Rainer Kattel, 2016-09-28

The Handbook of Alternative Theories of Economic Development explores the theories and approaches which over a prolonged period of time have existed as viable alternatives to today's mainstream and neo-classical tenets. With a total of 40 specially commissioned chapters written by the foremost authorities in their respective fields, this volume represents a landmark in the field of economic development. It elucidates the richness of the alternative and sometimes misunderstood ideas which in different historical contexts have proved to be vital to the improvement of the human condition. The subject matter is approached from several complementary perspectives. From a historical angle, the Handbook charts the mercantilist and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment. From a geographical angle, it includes chapters on African, Chinese, Indian, and Muslim approaches to economic development. Different schools are also explored and discussed, including nineteenth-century US development theory, Marxist, Schumpeterian, Latin American structuralism, regulation theory, and world systems theories of development. In addition, the Handbook has chapters on important events and institutions, including The League of Nations, The Havana Charter, and UNCTAD, as well as on particularly influential development economists. Contemporary topics such as the role of finance, feminism, the agrarian issue, and ecology and the environment are also covered in depth. This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development. It should be read by all serious scholars, teachers, and students of development studies, and indeed anyone interested in alternatives to development orthodoxy.
