Hazards Focus On Geography:

Environmental Hazards and Disasters Bimal Kanti Paul, 2011-11-30 Environmental Hazards and Disasters Contexts Perspectives and Management focuses on manifested threats to humans and their welfare as a result of natural disasters The book uses an integrative approach to address socio cultural political and physical components of the disaster process Human and social vulnerability as well as risk to environmental hazards are explored within the comprehensive context of diverse natural hazards and disasters In addition to scientific explanations of disastrous occurrences people and governments of hazard prone countries often have their own interpretations for why natural disasters occur In such interpretations they often either blame others in order to conceal their inability to protect themselves or they blame themselves attributing the events to either real or imagined misdeeds The book contains a chapter devoted to the neglected topic of such reactions and explanations Includes chapters on key topics such as the application of GIS in hazard studies resiliency disasters and poverty climate change and sustainability and development This book is designed as a primary text for an interdisciplinary course on hazards for upper level undergraduate and Graduate students Although not targeted for an introductory hazards course students in such a course may find it very useful as well Additionally emergency managers planners and both public and private organizations involved in disaster response and mitigation could benefit from this book along with hazard researchers It not only includes traditional and popular hazard topics e g disaster cycles disaster relief and risk and vulnerability it also includes neglected topics such as the positive impacts of disasters disaster myths and different accounts of disasters and disasters and gender

Evolving Approaches to Understanding Natural Hazards Burrell E. Montz, Graham A. Tobin, 2015-10-05 The 21st century presents many challenges to the hazard manager dynamic climatic conditions combined with population growth rapid urbanization and changing socio economic relationships are reshaping disaster impacts community responses and social safety mechanisms Indeed human vulnerability is constantly restructured by the ongoing interplay of physical social economic and political forces At the same time reducing vulnerability and enhancing community resilience require policies aimed at mitigating the consequences of disasters as they affect different locations and different groups requiring sound scientifically based research to further an understanding of the forces at play and to devise appropriate means to counter them It is within this context that this book examines evolving approaches to natural hazards Research into natural hazards has a long tradition beginning with a focus on physical processes and evolving into an interdisciplinary agenda that incorporates interactions between the physical and human environments embracing initiatives ranging from the physical to the socio economic and political It utilises various methodological approaches and technological advances employing both quantitative and qualitative procedures The papers included in this book offer insights into the development of applied hazards research as they build on previous work evolving technologies improved understandings of the factors involved and increased awareness of the needs of those who manage hazards This volume shows an appreciation

for the foundation that has been set and will inspire future researchers as they look to address these very pressing social issues

International Perspectives on Teaching about Hazards and Disasters John Lidstone, 1996 Discussing international perspectives on teaching about hazards and disasters this volume features examples from Germany France South Africa New Zealand Hong Kong and Nigeria

Cultures and Disasters Fred Krüger, Greg Bankoff, Terry Cannon, Benedikt Orłowski, E. Lisa F. Schipper, 2015-04-24 Why did the people of the Zambesi Delta affected by severe flooding return early to their homes or even choose to not evacuate How is the forced resettlement of small scale farmers living along the foothills of an active volcano on the Philippines impacting on their day to day livelihood routines Making sense of such questions and observations is only possible by understanding how the decision making of societies at risk is embedded in culture and how intervention measures acknowledge or neglect cultural settings The social construction of risk is being given increasing priority in understand how people experience and prioritize hazards in their own lives and how vulnerability can be reduced and resilience increased at a local level Culture and Disasters adopts an interdisciplinary approach to explore this cultural dimension of disaster with contributions from leading international experts within the field Section I provides discussion of theoretical considerations and practical research to better understand the important of culture in hazards and disasters Culture can be interpreted widely with many different perspectives this enables us to critically consider the cultural boundedness of research itself as well as the complexities of incorporating various interpretations into DRR If culture is omitted related issues of adaptation coping intervention knowledge and power relations cannot be fully grasped Section II explores what aspects of culture shape resilience How have people operationalized culture in every day life to establish DRR practice What constitutes a resilient culture and what role does culture play in a society s decision making It is natural for people to seek refuge in tried and trust methods of disaster mitigation however culture and belief systems are constantly evolving How these coping strategies can be introduced into DRR therefore poses a challenging question Finally Section III examines the effectiveness of key scientific frameworks for understanding the role of culture in disaster risk reduction and management DRR includes a range of norms and breaking these through an understanding of cultural will challenge established theoretical and empirical frameworks

Disaster Deaths Bimal Kanti Paul, 2020-12-30 This book conducts a systematic inquiry into the tragic deaths caused by natural disasters at different geographic scales It employs key disaster concepts and classification of disasters to understand the high mortality rates and the various factors associated with these deaths Deaths are the direct and immediate impact of disaster events which have remained a major concern for disaster managers and policy makers all over the world Using primary research and secondary data this book provides a comprehensive analysis of various facets of disaster deaths such as trends circumstances and causes and determinants at global regional national and subnational scales It offers a holistic perspective on disaster mortality which has been lacking for some time The book not only fills this research gap but also suggests important policy implications for disaster managers

and policy makers working in multilateral bilateral local and international nongovernmental organizations NGOs These policies include effective strategies to significantly reduce the risk of deaths caused by natural disasters which are explored through chapters written in a clear and accessible style Drawing together the case studies on past major disasters as well as recent ones the book provides new and critical insights into deaths precipitated by natural disasters Suitable for both technical and nontechnical readers the book has a broader appeal and will thus be useful for practitioners researchers students as well as activists in the area of hazards and disasters who are interested in studying mortality due to extreme natural events

Observing the Volcano World Carina J. Fearnley, Deanne K. Bird, Katharine Haynes, William J. McGuire, Gill Jolly, 2018-07-13 This open access book provides a comprehensive overview of volcanic crisis research the goal being to establish ways of successfully applying volcanology in practice and to identify areas that need to be addressed for future progress It shows how volcano crises are managed in practice and helps to establish best practices Consequently the book brings together authors from all over the globe who work with volcanoes ranging from observatory volcanologists disaster practitioners and government officials to NGO based and government practitioners to address three key aspects of volcanic crises First the book explores the unique nature of volcanic hazards which makes them a particularly challenging threat to forecast and manage due in part to their varying spatial and temporal characteristics Second it presents lessons learned on how to best manage volcanic events based on a number of crises that have shaped our understanding of volcanic hazards and crises management Third it discusses the diverse and wide ranging aspects of communication involved in crises which merge old practices and new technologies to accommodate an increasingly challenging and globalised world The information and insights presented here are essential to tapping established knowledge moving towards more robust volcanic crises management and understanding how the volcanic world is perceived from a range of standpoints and contexts around the globe

Geospatial Techniques in Urban Hazard and Disaster Analysis Pamela S. Showalter, Yongmei Lu, 2009-11-11 This book is the second in a series that examines how geographic information technologies GIT are being implemented to improve our understanding of a variety of hazard and disaster situations The main types of technologies covered under the umbrella of GIT as used in this volume are geographic information systems remote sensing not including ground penetrating or underwater systems and global positioning systems Our focus is on urban areas broadly defined in order to encompass rapidly growing and densely populated areas that may not be considered urban in the conventional sense The material presented here is also unabashedly applied our goal is to provide GIT tools to those seeking more efficient ways to respond to recover from mitigate prevent and or model hazard and disaster events in urban settings Therefore this book was created not only with our colleagues in the academic world in mind but also for hazards professionals and practitioners We also believe graduate students will find the material presented here of interest as may upper division undergraduate students

Disciplines, Disasters and Emergency Management David A. McEntire, 2007 Disasters such as the 9 11 terrorist attacks

the Indian Ocean Tsunami and Hurricane Katrina illustrate the salience and complexity of disasters Both scholars and practitioners therefore agree that we must take a more proactive and holistic approach to emergency management which should logically be derived from a sound understanding of the academic literature and the most pressing concerns facing professionals in the field today

Disciplines Disasters and Emergency Management reviews what is known about catastrophic events from the standpoint of various academic areas of study The introduction

Regions of Risk Kenneth Hewitt, 2014-09-19 An introduction to hazards human vulnerability and disaster paying particular attention to the more severe or novel risks and disaster that affect the general public The book is split into two parts the first of which gives an overview of the field of risk and disaster in terms of three perspectives hazards perspective vulnerability perspective and the active perspective The second part illustrates and develops these ideas in relation to some of the more severe dangers and disasters of the twentieth century for example earthquake risk cities at risk and the civil disasters of war

Popularizing Scholarly Research Patricia Leavy, 2021-08-17 A scholar's guide for to conducting ethical research with various communities Though the arena of scholarship grows and changes collaboration and community remain vital aspects of research and public scholarship

Popularizing Scholarly Research Working with Nonacademic Stakeholders Teams and Communities contextualizes research methods and practices for popularizing research involving teams communities and nonacademic stakeholders Patricia Leavy introduces the move toward making scholarship more accessible outside of academic settings Drawing from the authoritative Oxford Handbook of Methods for Public Scholarship a diversified list of interdisciplinary contributors cover social movements ethical issues working with vulnerable populations outsider insider issues citizens juries community based research participatory action research community art making theatre cross cultural research decolonizing methods team research and disaster research Further supplemental materials included at the end of the book make this title an important addition to any modern researcher's bookshelf

Disasters and Changes in Society and Politics Giuseppe Forino, 2024-01-16 From earthquakes to oil spills Italy is recurrently affected by different kinds of disasters This book brings a critical perspective to post disaster reconstruction and recovery which can impact in both the short and long term upon society politics and organizations It is often assumed that disaster hit areas return to normality or even build back better thanks to the interventions of experts Giuseppe Forino considers the complexities of disaster recovery and the sometimes radical changes in individual and collective behaviours that persist following such events Bringing together the impacts of natural hazards including climate change and the COVID 19 pandemic this edited book will stimulate debate on policy and practice in disaster recovery

Risk, Vulnerability and Tourism in Developing Countries Martina Shakya, 2009 IEE Institute of Development Research and Development Policy Ruhr Universit at Bochum Cover

Disasters Kathleen Tierney, 2019-05-20 Disasters kill maim and generate increasingly large economic losses But they do not wreak their damage equally across populations and every disaster has social dimensions at its very core This important book sheds light on the social conditions

and on the global national and local processes that produce disasters Topics covered include the social roots of disaster vulnerability exposure to natural hazards such as hurricanes and tsunamis as a form of environmental injustice and emerging threats Written by a leading expert in the field this book provides the necessary frameworks for understanding hazards and disasters exploring the contributions of very different social science fields to disaster research and showing how these ideas have evolved over time Bringing the social aspects of recent devastating disasters to the forefront Tierney discusses the challenges of conducting research in the aftermath of disasters and critiques the concept of disaster resilience which has come to be seen as a key to disaster risk reduction Peppered with case studies research examples and insights from very different disciplines this rich introduction is an invaluable resource to students and scholars interested in the social nature of disasters and their relation to broader social forces

The Distributed Functions of Emergency Management and Homeland Security David A. McEntire, 2023-07-19 The Distributed Functions of Emergency Management and Homeland Security outlines the roles and responsibilities of various individuals and agencies involved in homeland security and all aspects of emergency management Each chapter focuses on the practical and applied aspects of a range of public servants in various departments and the organizations that they represent Rather than presenting a theoretical exploration alone the book examines the practical knowledge and hands on skills related to various functions and how their decisions and actions play into the larger framework of safety and security in the public private and nonprofit sectors Every professional has a unique and integral part to play in fulfilling their roles and obligations whether it be in relation to prevention mitigation preparedness response or recovery operations Personnel that frequently come to mind in such scenarios include emergency managers geographers and land use planners EMTs and paramedics fire fighters police officers public health officials nurses public administrators and public information officers And while these individuals are integral to homeland security and emergency management there are other professionals that also perform essential duties that while they aren't first to mind are vital to efforts relating to terrorism and disasters this includes pilots in the aviation sector the military attorneys psychologists and forensic professionals serving in pathology DNA and dentistry roles Chapters provide a holistic rendering of the homeland security and emergency management landscape to present all these various professional capabilities and contributions This includes how current functions are coordinated as well as how future efforts might change relative to a more proactive all hazards and holistic approach As such the book will be a useful resource for students and practitioners to understand the dynamic professions and various disciplines and fields that impact disaster and terrorism preparedness and response capabilities

Religious Responses to Earthquake and Volcanic Eruption Disasters David Chester, Angus Duncan, John Duncan, 2024-07-26 This book argues that although secular and religious perspectives on disasters have often conflicted today there are grounds for believing that the world's major faiths have much to contribute to the processes of post disaster recovery and future disaster risk reduction DRR It seeks to demonstrate how contemporary dialogues between

theologians disaster scholars and policymakers are defining new ways of working together These explore how the resources of religious communities e g buildings human resources and finance may be used to foster successful policies of DRR particularly in the aftermath of earthquakes and volcanic eruptions Musing on the relationships between religion and disasters has occurred for millennia and has affected many societies worldwide In societies where the world s major religions Buddhism Christianity Hinduism Islam Judaism and Shinto have been and remain dominant attempting to find supernatural explanations for disasters has occurred throughout history and there have been many theologies seeking to explain why people suffer losses It is argued that developments both within these traditions of faith and in how disasters are understood by the hazard research community of researchers and planners have allowed a new *modus vivendi* to emerge which emphasises both a recognition of religious worldviews by academic writers and disaster planners on the one hand and a desire by people of faith and their leaders to be more fully committed to the goals of DRR The book will appeal to those who are interested in the interface between disasters and theology across the principal religions of the world This includes researchers and students in geology geography theology and religious studies It will also be useful for specialist academic audience and the educated general reader

Ecosystem-Based Disaster Risk Reduction and Adaptation in Practice Fabrice G. Renaud, Karen Sudmeier-Rieux, Marisol Estrella, Udo Nehren, 2016-08-19 This book is a compilation of recent developments in the field of ecosystem based disaster risk reduction and climate change adaption Eco DRR CCA globally It provides further evidence that ecosystem based approaches make economic sense and showcases how research has progressively filled knowledge gaps about translating this concept into practice It presents a number of methods and tools that illustrate how Eco DRR CCA has been applied for various ecosystems and hazard contexts around the world It also discusses how innovative institutional arrangements and policies are shaping the field of Eco DRR CCA The book is of relevance to scientists practitioners policy makers and students in the field of ecosystem management for disaster risk reduction and climate change adaptation

The Phoenix of Natural Disasters Kathryn Gow, Douglas Paton, 2008 This book encompasses discussions between Kathryn Gow and Douglas Paton both psychologists who have researched stress burnout trauma and recovery in natural disasters They suggest that few books have been written for health professionals and persons directly involved with leading and managing emergency teams on what constitutes resilience in individuals and groups in communities and how they differ in response and recovery The outcome is a three part book with contributors from the field research institutions emergency service sectors support agencies and the media Its main purpose is to focus on the resilience of people and communities following NDs and to educate the sectors already involved in natural disasters

Mining and Natural Hazard Vulnerability in the Philippines William N. Holden , R. Daniel Jacobson, 2013-10-15 The archipelago of the Philippines is well endowed with nonferrous mineral resources and in recent years the Philippine government acting under the influence of the dominant and seemingly ubiquitous neoliberal development paradigm has

liberalized its mining laws in order to accelerate economic development Yet the Philippines is also a country highly prone to a variety of natural hazards that have the ability to interact adversely with mining's potential for environmental degradation Thus there are great dangers inherent in pursuing such a development paradigm earthquakes can destabilize tailings storage facilities typhoons can flood tailings ponds and mine pit dewatering can enhance the competition for groundwater resources during droughts This study explores how these hazards amplify the environmental harm prevalent in mining and reveals the substantial threat posed to the livelihoods of the archipelago's poor as well as the inadequacies of the very institutions designed to protect their environment

International Perspectives on Natural Disasters: Occurrence, Mitigation, and Consequences Joseph P. Stoltman, John Lidstone, Lisa M. DeChano, 2007-03-11 Reports of natural disasters fill the media with regularity Places in the world are affected by natural disaster events every day Such events include earthquakes cyclones tsunamis wildfires the list could go on for considerable length In the 1990s there was a concentrated focus on natural disaster information and mitigation during the International Decade for Natural Disasters Reduction IDNDR The information was technical and provided the basis for major initiatives in building structures designed for seismic safety slope stability severe storm warning systems and global monitoring and reporting Mitigation or planning in the event that natural hazards prevalent in a region would suddenly become natural disasters was a major goal of the decade long program During the IDNDR this book was conceptualized and planning for its completion began The editors saw the need for a book that would reach a broad range of readers who were not actively or directly engaged in natural disasters relief or mitigation planning but who were in decision making positions that provided an open window for addressing natural disaster issues Those people were largely elected public officials teachers non governmental organization staff and staff of faith based organizations Those people for the most part come to know very well the human and physical characteristics of the place in which they are based With that local outreach in mind the editors intended the book to encourage readers to 1
