The Elephant's Rope and the Untethered Spirit Lynne Picard, 2021-07-23 This book will move even the hardened skeptic It confirms that suppressed anger and stress can impact health in subtle yet ultimately severe ways and then goes on to demonstrate that real miracles happen when body mind and spirit are integrated through the use of both conventional and unconventional healing methods Lynne Picard s story is that of a courageous woman who learns how to strike an effective balance between traditional treatment and natural healing What makes this book unique is that she is not biased toward either quite the contrary She understands that sometimes both are necessary in order to achieve true holistic healing During her battle with cancer there were several periods of remission followed by recurrences Conventional treatments surgery and chemotherapy bought Lynne the time she need to discover true healing She followed alternate paths not always understanding their purpose at the outset Some of these paths led to radical treatments whose results she could hardly believe even though her own body was evidence The Elephant s Rope and the Untethered Spirit is a book that offers real hope and real guidance for all who wish to heal themselves of illness to gain and maintain good health and to achieve an integration of body mind and spirit

Jung's Technique of Active Imagination and Desoille's Directed Waking

Dream Method Laner Cassar, 2020-06-07 Jung's Technique of Active Imagination and Desoille's Directed Waking Dream

Method brings together Carl Jung's active imagination and Robert Desoille's rêve veillé dirigé directed waking dream method RED. It studies the historical development of these approaches in Central Europe in the first half of the 20th century and explores their theoretical similarities and differences proposing an integrated framework of clinical practice. The book aims to study the wider European context of the 1900s which influenced the development of both Jung's and Desoille's methods. This work compares the spatial metaphors of interiority used by both Jung and Desoille to describe the traditional concept of inner psychic space in the waking dreams of Jung's active imagination and Desoille's RED. It also attempts a broader theoretical comparison between the procedural aspects of both RED and active imagination by identifying commonalities and divergences between the two approaches. This book is a unique contribution to analytical psychology and will be of great interest for academics, researchers and postgraduate students interested in the use of imagination and mental imagery in analysis, psychotherapy and counselling. The book's historical focus will be of particular relevance to Jungian and Desoillian scholars since it is the first of its kind to trace the connections between the two schools and it gives a detailed account of Desoille's early life and his first written works. This book was a Gradiva Award nominee for 2021.

Trauma

Muriel Prince, Muriel Warren, 2004 In this post 9/11 world, therapists need to expand their toolboxes to deal with trauma and its effects. This book provides a new way of dealing with the devastating emotional residue of a traumatic event. It centers on the innovative application of hypnotherapy to help trauma victims self-actualize, regain their lives and move forward again. This book outlines the effects of trauma on mind and body and provides comprehensive systems and treatment plans for the mental disorders caused or exacerbated by trauma. Many people are familiar with the famous fight or flight responses to trauma, but few know about the freeze response. Freeze is the most dangerous of the trio since it inhibits any reaction and leaves the victim immobile. It can lead directly to Post-traumatic Stress Disorder. Also included is a brief survey of brain research and its implications. Dr. Warren takes readers on a brief journey of self-discovery to unlock their full self-potential and raise it to a new level.
