volume is uniquely founded on empirical research      Biomedical-ethical Issues Frank Harron,1983-01-01 The digest is intended to be a supplemental resource to Health and human values a guide to making your own decisions by Frank Harron John Burnside and Tom Beauchamp New Haven Conn Yale University Press 1983 which explores more and broader bioethical issues Introduction      Hospital & Health Services Administration ,1976      **Ethics in Health Care** Silvia Angelina Pera,Susara Van Tonder,2005 Dealing primarily with nursing in South Africa and the particular challenges that the country s nurses encounter this book looks at the ethical questions confronting nurses as well as the moral philosophy behind those considerations Ubuntu the African notion that everyone in a community is responsible for the welfare of its members plays a large part in the moral deliberations of the book as do problems particular to South Africa This second edition is updated with new case studies on the AIDS pandemic as well as new ethical questions stemming from the legalization of abortion in South Africa and the rise in the power of health worker unions      *Xenotransplantation* David K.C. Cooper,Ejvind Kemp,Keith Reemtsma,D.J.G. White,2012-12-06 The cover of this book depicts a Lamassu one of the fabulous beasts of mythology 1 Like many similar creatures such as the Chimera Griffon Hippocamp and Cockatrice the body of the Lamassu was clearly a combination of structures derived from sev eral different species in other words it provides a highly success ful example of xenotransplantation But in selecting a symbol of xenotransplantation to grace the cover of this volume why choose the Lamassu in preference to the other ancient beasts The reason is that the Lamassu appears to have been endowed with a much Fig I Homer described the Chimera as consisting of a lion s foreparts a goat in the middle and a serpent s hind parts VIII Foreword Fig 2 The Griffon had the foreparts of an eagle and the rear tail and hindlegs of a lion Its eagle like head had pointed upstanding ears like those of an ass Feathers grew upon its head neck and chest and the rest of its body was covered in leonine fur more benign and desirable character than many of its mythologi cal associates For example reliable reports state that the Chimera Fig 1 hitherto the animal most commonly selected to symbolize xenografting killed everyone who came within range of its fiery breath Perhaps not surprisingly therefore the Chimera is vari ously described as one of the largest monsters ever born a sav age creature and a symbol of complex evil      **Engage/social Action** ,1983      **Handbook of Healthcare Management** Myron D. Fottler,Donna Malvey,Donna J.Slovensky,2015-09-25 The Handbook of Healthcare Management is a comprehensive examination of key management practices for global healthcare organizations arguing that insight into and implementation of these practices is essential for success and sustainability      **Dietitian's Handbook of Enteral and Parenteral Nutrition** Annalynn Skipper,1998 Health Sciences Nutrition      **Legal Issues in Pediatrics and Adolescent Medicine** Angela Roddey Holder,1985-01-01 This book is one of four publications intended to engage a broad range of persons in informed decision making regarding key health and human value questions Each publication has a usefulness of its own while all four comprise a convenient series      *Bioethical Decision Making for Nurses* Joyce Beebe Thompson,Joyce E. Thompson,Henry O. Thompson,1992 This text reviews theoretical bases for bioethics including definitions
