

Health And The Environment Environment And Man

United States. Congress

Health And The Environment Environment And Man:

Physiology, Environment, and Man Douglas H. K. Lee, David Minard, 2013-09-11 Physiology Environment and Man is based on a symposium conducted by the National Academy of Sciences National Research Council August 1966 While one might expect a textbook to present its field in organized and comprehensive fashion a symposium necessarily follows more of an illustrative pattern according to the personal interests or even idiosyncrasies of the participants It is interesting to note that in spite of these limitations the presentations did in fact cover the range of physiological concerns with environmental effects from the genetic to the temporal and from the molecular to the holistic The book opens with a discussion of the National Academy of Sciences National Research Council's broad based critical study of the physiological underpinning of current concepts of biological responses to toxic chemicals and physical stresses Subsequent chapters deal with topics such as the metabolic fate of common environmental agents growth and trophic factors in carcinogenesis environmental factors in aging and mortality adaptation to heat and cold and the definition of an optimum environment *Man and His Environment*, 1970 Library of Congress Subject Headings Library of Congress, Library of Congress. Office for Subject Cataloging Policy, 1993 *Interactions of Man and His Environment* Burgess H. Jennings, 2012-12-06 This symposium was a joint effort co sponsored by Northwestern University and Borg Warner Corporation and included representatives of the latter day estates of university industry and government All of these groups were deeply interested in participating since the problems of man and his environment especially his urban environment are ones which can be solved only through a cooperative effort The symposium proceedings present a review of the present position of man and his environment and outline the physical and social science efforts being made to solve the problems posed by man's rapidly changing environment The format of this book is such that Dr Luther L Terry's speech Environmental Health Every body's Business serves as an introduction to the many faceted discussions on the interactions of man and his environment Mr P B Gordon's speech Man and His Environment Where Are We Where Are We Going aptly summarizes this symposium and serves this purpose in this publication Every effort was exerted to make this symposium a general discussion meeting where contributions from both the formal speakers and the audience were received The records of two panel discussions including comments from the floor and replies by the speakers are included in this volume This publication is the result of the coordinated efforts of many contributors the speakers Northwestern University Borg Warner Corporation the Symposium Planning Committee consisting of D W **Library of Congress Subject Headings** Library of Congress.
