Enlarged Europe Regions In Competition:

An Enlarged Europe Louis Albrechts, Sally Hardy, Mark Hart, Anastasios Katos, 2013-12-19 The political and economic geography of Europe is changing the European Community is expanding its boundaries towards EFTA and is resuming a closer association with Central and Eastern European regions engaged in radical restructuring As EC integration accelerates there is the prospect of intensified inter regional competition This book divided into five parts examines in detail the changes and the challenge for policy makers The introduction draws out the central themes of the book addressing EC regional performance and future indicators the enlargement and changing map of Europe and the implications for the EC of Eastern European changes The second part deals with EC issues particularly focusing on the economic and spatial impact of European integration Part 3 addresses Eastern European issues and Part 4 covers the Peripheral Regions The final part is devoted to a policy debate concluding with a policy agenda for the forthcoming decade Industrial and Regional Policies in an Enlarging EU David Bailey, Lisa De Propriis, 2014-10-20 After years of near disrepute in official circles Industrial Policy has made something of a comeback over the last few years and is now very much back on the agenda at national and EU levels driven by concerns over globalisation deindustrialisation unemployment and perceived poor growth in the EU Simultaneously the European Commission's Fourth Report on Economic and Social Cohesion has kicked off the debate over challenges to cohesion the shape of EU Cohesion policy beyond 2013 and how resources should be managed This debate will find added momentum with the imminent mid term review being launched by the Commission Discussions over the success or not of the Lisbon Agenda on going debates over cluster policies and recent developments in policy evaluation have also contributed to a burgeoning academic literature over the last eighteen months This edited volume is especially pertinent given such developments and pulls together a diverse range of contributions from leading authorities in the field to add to these debates and to illustrate connections between them This book was published as a special issue of Policy Studies Modelling Regional Scenarios for the Enlarged Europe Roberta Capello, Roberto P. Camagni, Barbara Chizzolini, Ugo Fratesi, 2008-02-01 Tackling the question of what the European territory will look like over the next fifteen years this volume provides quali quantitative territorial scenarios for the enlarged Europe under different assumptions on future globalisation strategies of BRIC Brazil Russia India and China and East and West European countries The approach is as neutral as possible vis vis the results leading to a new forecasting model the MASST model built by the authors Regional Disparities in the Enlarged European Union Valentina Meliciani, 2015-10-14 The last twenty years have seen an increase in European integration and the emergence of the technological revolution Although tighter integration coupled with technological innovation should facilitate cross regional convergence some European regions have managed to jump ahead while others have been left behind This book examines the regional characteristics that favour growth and analyses the relevance of innovation socio economic and structural factors in shaping regional economic disparities In this book particular attention is devoted to the

EU enlargement towards the East to its consequences on Europe's traditional North-South divide and to the increasing regional disparities in new member states after the transition. It demonstrates the growing importance of innovation and human capital in explaining the increase in income and employment disparities in old EU members particularly after the 2008 financial crisis. It also shows that for newcomers regional disparities are essentially linked to socio-economic factors as capital regions approach Western standards while others, mainly old industrial regions and peripheral ones, lag behind. This book integrates theoretical discussion with empirical evidence and will appeal to regional scientists interested in regional inequalities and to policy makers concerned with devising effective strategies to tackle regional disparities in Europe.

Economics and Policies of an Enlarged Europe Carlo Altomonte, Mario Nava, 2006-01-01. Increasingly, policies and laws commonly agreed within the EU shape the political and economic scenarios of nation states in Europe. However, the same European context is radically changing essentially due to three major recent developments: the adoption of the Euro, EU enlargement to the east and the implementation of the Lisbon Strategy of structural reforms for growth and competitiveness. The book presents a thorough economic analysis of these three events and of their implications for both existing and potential EU policies and objectives. Carlo Altomonte and Mario Nava have written a very rigorous text in an accessible and jargon-free style ensuring easy acquisition of invaluable insights into the European economic set-up and the possible evolution of EU policies, including an update on the reform of the Growth and Stability Pact and of the 2007-13 Financial Perspectives. The accessibility of economic concepts combined with the methodological rigour of this up-to-date text will be of great interest to both policy makers and students.

The Political Economy of Competitiveness in an Enlarged Europe J. Pellegrin, 2016-10-18. Central and Eastern European countries are entering the development race at a crucial juncture in EU enlargement and the wider phenomenon of globalization. In the face of hesitant and controversial EU policy, these countries need to engage sound development strategies. International production networks are expected to be decisive in helping them strengthen their competitiveness and establish knowledge-based economies. In this book, Julie Pellegrin looks at whether and how production networks develop in Central and Eastern European countries and assesses their chances of catching up with the rest of Europe.

EU Enlargement, Region Building and Shifting Borders of Inclusion and Exclusion James Wesley Scott, 2016-04-22. The 2004 entry of 10 Central and Eastern European countries along with Malta and Cyprus into the EU has caused a huge shift in the EU's external boundaries. The socio-economic and political transformations that this shift has caused not only suggest new regional development opportunities but also many potential problems and tensions. While the EU insists that enlargement will not signify new divisions, processes of inclusion and exclusion and the imposition of visa restrictions on non-EU citizens could pose obstacles to co-operation, conjuring fears of an emerging fortress Europe that effectively divides the continent. Illustrated with case studies from Central and Eastern European border areas, this book examines capacities for region building across national borders in within the context of EU enlargement, synthesizing the

various insights provided by local information and suggesting ways forward for the future development of the EU's Wider Europe strategy

Regional Policy and Planning in Europe Paul Balchin, Ludek Sykora, Gregory Bull, 2002-06-01 Regional Policy and Planning in Europe explores the ways regional policy and planning systems across Europe have been influenced by economic and monetary union the impending enlargement of the European Union the devolution of administrative power from central government to regional authorities the increased importance of environmental and urban issues Presenting a comprehensive overview of the economic basis of integration this book examines the evolution of various systems of government planning and forms of devolution

Challenged Borderlands Vera Pavlakovich-Kochi, Barbara J. Morehouse, 2017-03-02 In the early 1990s borders within Europe and between the United States and Mexico began to open The increasing flow of goods capital ideas and people across boundaries promised to reduce physical and cognitive distances Simultaneously challenges to identity have arisen within and between the European nation states driven not only by internal cultural and political dynamics but also by processes of globalization Concurrently the US Mexican border emerged in public consciousness as a location of new opportunities largely due to public perception of the benefits of the North American Free Trade Agreement NAFTA This book explores some of the contradictory yet simultaneous processes affecting border regions A team of leading scientists offers a wide range of perspectives on global national regional and local processes and provides a useful matrix for understanding their complex multilayered implications Key concepts such as globalization borders and identities are illustrated through local and regional case studies

Regional Convergence in the European Union Juan R. Cuadrado-Roura, Marti Parellada, 2013-03-14 The introduction of the single currency in the European economic space constitutes without doubt the most visible step towards monetary and economic integration in the EU Those who boosted the birth of the Common Market in 1957 dreamt that this would one day come about as a logical consequence of the integration process However things have gone much more slowly than possibly imagined although if taken in an adequate historic perspective it is undeniable that the agreements that have led to European Monetary Union signify a really formidable jump in the process of political and economic integration in Europe This is something many doubted would ever happen but which is already a reality although still in need of a period of consolidation The most general economic consequences of the EMU have already been analysed in considerable depth Proof of this is the literature already available In general there is coincidence in affirming that the balance of the results expected is clearly positive Firstly as a result of the anticipated gains in efficiency a consequence of reduction of transaction costs associated to the previous existence of different currencies and of the elimination of exchange rate uncertainties

Growth and Innovation of Competitive Regions Ugo Fratesi, Lanfranco Senn, 2008-12-29 Time Time b a Space Space Time Time c d Space Space Fig 1 Different possible scales for growth and innovation analyses spatial dimension the sectoral dimension and the time dimension are represented In Fig 1a regional development analyses are revealed where the economy is sliced vertically into regions and their dynamics are investigated The

study of the evolution of industries typical of evolutionary industrial economics is represented in Fig 1b where the economy is divided horizontally into sectoral slices This approach has progressed considerably in recent years see Malerba 2006 for a recent survey Modifications of industries have important spatial implications which however are not normally at the core of these analyses even though spatial patterns of innovation differ greatly from sector to sector Breschi 2000 Our approach operates in the manner of Fig 1a and we will focus on regions extending the analysis to industries only where this is regionally and structurally relevant Hence the approach in the book belongs to the tradition of regional development theories but in contrast to the more traditional analyses we will not consider the region as an economic unit per se Rather interactions between and within regions are very relevant to the performance of individual regions in an integrated world and will be at the core of the analyses of the following chapters

The Baltic States and their Region, 2005-01-01 With EU and NATO membership for the Baltic States now a reality this volume examines the relationship of the three countries their constituent peoples and their surrounding region to the wider Europe both historically and in the period since 1991 In particular the contributors seek to locate the Baltic area within the manifold debates surrounding the concepts of new and old Europe including those occasioned by the current conflict in Iraq Covering issues of identity sovereignty minority rights security and relations with Russia the work assesses the likely contribution of this region to an enlarged Euro Atlantic community It will appeal to specialists and students in the fields of area studies history politics and international relations *Situation and Outlook Series*, 1993 Regional Development and Spatial Planning in an Enlarged European Union Neil Adams, 2016-04-01

The expansion of the European Union in 2004 has had significant consequences for both existing and new members of the Union New member states are assimilating into a new institutional and policy framework while the changing geography of Europe provides a different context for policy development in pre 2004 member states One of the more important fields in which these changes are impacting is regional development The admission of the new countries changes patterns of economic and social disparities across the territory of the European Union which in turn demands that existing approaches to regional development are reconsidered An approach which has proved to be one of the most innovative is spatial planning This book brings together a team of academics and policy makers from across the new Europe involved in regional development and spatial planning Providing insights into different approaches it offers a valuable opportunity to compare experiences across European borders

Latin America's Competitive Position in the Enlarged European Market, 1993 **Regional Competitiveness** Ron Martin, Michael Kitson, Peter Tyler, 2012-11-12 There is now a wide spread interest in regions as a key focus in the organization and governance of economic growth and wealth creation This important book considers the factors that influence and shape the competitive performance of regions This is not just an issue of academic interest and debate but also of increasing policy deliberation and action However as the readings in this book make clear the very idea of regional competitiveness is itself complex and contentious Many academics and policy makers have

used the concept without fully considering what is meant by the term and how it can be measured Policy formulation has tended to rush ahead of understanding and analysis and the purpose of this book is to close this important gap in understanding This book was previously published as a special issue of Regional Studies

Integration, Growth, and Cohesion in an Enlarged European Union John Bradley, George G. Petrakos, Julia Traistaru, 2005-12-28 This book contributes fresh theoretical and empirical evidence on patterns of regional production structures specialization regional disparities convergence and divergence processes and evaluation of cohesion policies in both current and future European Union EU member states in the context of increased integration These subjects are addressed in both individual and cross country analyses using innovative methodologies The book is an essential reading for a large audience including researchers and policy makers working in the fields of economic integration transition economics and regional development The thirteen contributions brought together in this book are the result of recent research undertaken in the framework of a larger project initiated and coordinated by the Center for European Integration Studies ZEI of the University of Bonn on determinants of regional specialization growth and convergence in the context of European integration A number of these papers were presented to a conference on European integration regional convergence location of industrial activity and labour market adjustment initiated by the Center for European Integration Studies of the University of Bonn and organized jointly with the Center for European Studies of the University Alexandru Ioan Cuza of Iasi Romania We gratefully acknowledge the financial support from the European Commission Framework Programme and the Center for European Integration Studies of the University of Bonn
