**A History of Modern Political Thought in East Central Europe** Balázs Trencsényi, Maciej Janowski, Monika Baar, Maria Falina, Michal Kopecek, 2016-02-26 A History of Modern Political Thought in East Central Europe is a two volume project authored by an international team of researchers and offering the first ever synthetic overview of the history of modern political thought in East Central Europe Covering twenty national cultures and languages the ensuing work goes beyond the conventional nation centered narrative and offers a novel vision especially sensitive to the cross cultural entanglement of discourses Devising a regional perspective the authors avoid projecting the Western European analytical and conceptual schemes on the whole continent and develop instead new concepts patterns of periodization and interpretative models At the same time they also reject the self enclosing Eastern or Central European regionalist narratives and instead emphasize the multifarious dialogue of the region with the rest of the world Along these lines the two volumes are intended to make these cultures available for the global market of ideas and also help rethinking some of the basic assumptions about the history of modern political thought and modernity as such The first volume deals with the period ranging from the Late Enlightenment to the First World War It is structured

along four broader chronological and thematic units Enlightenment reformism Romanticism and the national revivals late nineteenth century institutionalization of the national and state building projects and the new ideologies of the fin de siècle facing the rise of mass politics Along these lines the authors trace the continuities and ruptures of political discourses They focus especially on the ways East Central European political thinkers sought to bridge the gap between the idealized Western type of modernity and their own societies challenged by overlapping national projects social and cultural fragmentation and the lack of institutional continuity [A History of Western Public Law](#) Bruno Aguilera-Barchet,2014-12-31 The book outlines the historical development of Public Law and the state from ancient times to the modern day offering an account of relevant events in parallel with a general historical background establishing and explaining the relationships between political religious and economic events *Enlightened Absolutism* Hamish M. Scott,1990 An examination of 18th century absolutism

**Catherine the Great** Simon Dixon,2015-10-23 Neither a comprehensive life and times nor a conventional biography this is an engaging and accessible exploration of rulership and monarchical authority in eighteenth century Russia Its purpose is to see how Catherine II of Russia conceived of her power and how it was represented to her subjects Simon Dixon asks essential questions about Catherine's life and reign and offers new and stimulating arguments about the Enlightenment the power of the monarch in early modern Europe and the much debated role of the great individual in history [Liberty](#) Chana B.

Cox,2006-01-01 Liberty God's Gift to Humanity is a defense of liberalism the political philosophy which holds that governments should be established for the protection of individual liberty By means of revisiting the thinking of the men who created liberal theory over the past three centuries author Chana Cox has demonstrated that historically the bond between liberalism and religion has been strong and that liberals have embraced virtue encouraged social control and increased the common good **Enlightenment: Oxford Bibliographies Online Research Guide** Oxford University Press,2010-06-01

monopoly provides an excellent case study of state society relationships This is especially true of the tobacco monopoly in colonial Mexico whose revenues in the later half of the eighteenth century were second only to the silver tithe as the most valuable source of government income This comprehensive study of the tobacco monopoly illuminates many of the most important themes of eighteenth century Mexican social and economic history from issues of economic growth and the supply of agricultural credit to rural relations labor markets urban protest and urban workers class formation work discipline and late colonial political culture Drawing on exhaustive research of previously unused archival sources Susan Deans Smith examines a wide range of new questions Who were the bureaucrats who managed this colonial state enterprise and what policies did they adopt to develop it How profitable were the tobacco manufactories and how rational was their organization What impact did the reorganization of the tobacco trade have upon those people it affected most the tobacco planters and tobacco workers This research uncovers much that was not previously known about the Bourbon government's management of the tobacco monopoly and the problems and limitations it faced Deans Smith finds that there was as much continuity as change after the monopoly's establishment and that the popular response was characterized by accommodation as well as defiance and resistance She argues that the problems experienced by the monopoly at the beginning of the nineteenth century did not originate from any simmering entrenched opposition Rather an emphasis upon political stability and short term profits prevented any innovative reforms that might have improved the monopoly's long term performance and productivity With detailed quantitative data and rare material on the urban working poor of colonial Mexico *Bureaucrats Planters and Workers* will be important reading for all students of social economic and labor history especially of Mexico and Latin America

*Ideas of poverty in the Age of Enlightenment* Niall O'Flaherty, Robin Mills, 2024-04-16 This collection of essays examines the ways in which poverty was conceptualised in the social political and religious discourses of eighteenth century Europe It brings together experts with a wide range of expertise to offer pathbreaking discussions of how eighteenth century thinkers thought about the poor Because the theme of poverty played important roles in many critical issues in European history it was central to some of the key debates in Enlightenment political thought throughout the period including the controversies about sovereignty and representation public and private charity as well as questions relating to crime and punishment The book examines some of the most important contributions to these debates while also ranging beyond the canonical Enlightenment thinkers to investigate how poverty was conceptualised in the wider intellectual culture as politicians administrators and pamphlet writers grappled with the issue

**Saints & Sinners** Antti P. Balk, 2008 This unique look at history elaborately recounts the birth of human civilization through the vehicle of ancient Egyptian deities albeit in light of the most recent knowledge on archaeology anthropology comparative religion linguistics sociology and general history It moves quickly but seamlessly to Greece via Crete revealing the relatively young age of Continental European and by extension all Western culture science art and religion and their highly derivative nature a point subtly

repeated throughout this stunningly wide ranging work A book of contrasts it constantly compares not only the Saints and the Sinners but the East and the West be the issues dealt with political or religious in most cases the one cannot be separated from the other It does not however presume to pass judgement only to relate the events as they happened the facts as they stand even if many of them are little known ones conspicuous by their absence in standard school history books
