Values Barbara A. Anderson, Lisa R. Roberts, 2023-03-20 This book uniquely explores American cultural values as a factor in maternal health It looks beyond the social determinants of health as primarily contributing to the escalating maternal morbidity and mortality in the United States The United States is an outlier with poor maternal health outcomes and high morbidity mortality in comparison to other high resource and many mid level resource nations While the social determinants of health identify social and environmental conditions affecting maternal health they do not answer the broader underlying

question of why many American women in a high resource environment experience poor maternal health outcomes. Frequent near misses. High levels of severe childbearing related morbidity and high maternal mortality are comparable to those of lower resource nations. This book includes contributions from recognized medical and cultural anthropologists and diverse clinical and public health professionals. The authors examine American patterns of decision making from the perspectives of intersecting social cultural and medical values influencing maternal health outcomes. Using an interdisciplinary critical analysis approach, the work draws upon decision making theory and life course theory. Topics explored include Cultural values as a basis for decision making, Social regard for motherhood, Immigrants, refugees and undocumented mothers, Cultural conflicts and maternal autonomy, Health outcomes among justice involved mothers, Maternal Health and American Cultural Values. Beyond the Social Determinants is an essential resource for clinical and public health practitioners and their students, providing a framework for graduate level courses in public health, the health sciences, women's studies and the social sciences. The book also targets anthropologists, sociologists and women studies scholars seeking to explain the links between American cultural decision making and health outcomes. Policy makers, ethicists, journalists and advocates for reproductive health justice also would find the text a useful resource.

Adolescence Simon Meyerson, 2015-12-22. In this volume and its companion *Adolescence and Breakdown* originally published in 1975, members of the Adolescent Department at the Tavistock Clinic and of the Tavistock Institute of Human Relations together with other leading experts on the subject present a unique study of adolescence. Of all living species, only human beings go through a period of adolescence and because the conflicting influences that adolescents encounter both within themselves and in the outside world are so complex, even normal adolescence is a time of crises and adjustment. While *Adolescence and Breakdown* traces what happens when these crises are not sufficiently well negotiated, the present volume is devoted to the dynamics and complexities of normal adolescence. The topics debated and explored include the nature of puberty, family relationships, change and personality, adolescent sexuality, adolescents and authority, protest and politics, adolescence and creativity, groups, subcultures and countercultures in the adolescent world.

Tuning into Mom Michal Clements, Teri Lucie Thompson, 2011-10-15. American mothers are household CFOs in charge of an estimated 2.45 trillion in direct spending. They are also an important influence on other family members' buying habits. Many organizations have identified moms as an important customer group, but the broad age-based definitions these companies work with mask an array of different consumer behaviors. Written by two leading marketers, this book provides a new approach to understanding the American Mom market, examining the effect of age of the eldest child on women's values and attitudes to food, exercise, education, health technology and fashion. The authors examine the mom's influence on or control of the purchasing habits of children of all ages, from infants and toddlers to young adults. In doing so, it brings focus to the frequently overlooked purchase influence of moms on teenagers. The authors combine large-scale quantitative research of more than 4,700 mothers with qualitative case studies from individual

participants The authors also draw on decades of real world experience to combine their research with implementable examples of best practice Highly recommended for practitioners in retailing and product development this book will also be a valuable supplemental text for college courses in consumer behavior and marketing strategy **Women of the Somali Diaspora** Joanna Lewis,2021-12-01 This book is about Somali mothers and daughters who came to Britain in the 1990s to escape civil war Many had never left Somalia before followed nomadic traditions did not speak English were bereaved and were suffering from PTSD Their stories begin with war and genocide in the north followed by harrowing journeys via refugee camps then their arrival and survival in London Joanna Lewis exposes how they rapidly recovered mobilising their networks social capital and professional skills Crucial to the recovery of the now breakaway state of former British Somaliland these women bore a huge burden but inspired the next generation with many today caught between London and a humanitarian impulse to return home Lewis reveals three histories Firstly the women s personal history helping us to understand resilience as an individual lived historical process that is both positive and negative and both inter and intra generational Secondly a collective history of refugees as rebuilders offering insight into the dynamism of the Somali diaspora Finally the forgotten history and hidden legacies of Britain s colonial past which have played a key role in shaping this dramatic sometimes upsetting but always inspiring story the power of women to heal the scars of war An Occupational Therapist's Guide to Home Modification Practice Elizabeth Ainsworth,Desleigh De Jonge,2011 Occupational therapists require skills to access the daily living skills of their clients This book uses a transactional approach to examine the home environment and the client Current and future needs are assessed and this book addresses concerns and suggests solutions which will assist in helping the client remain in their own home Working Mother ,2001-04 The magazine that helps career moms balance their personal and professional lives
