Enterprise Architecture IT Project The Urbanisation Paradigm:

The Enterprise Architecture IT Project Christophe Longép ,2003-01-01 The basis for an Enterprise Architecture IT project comes from the identification of the changes necessary to implement the enterprise or organisation s strategy and the growing information needs arising from this which increases the demand for the development of the IT system The development of an IT system can be carried out using an urbanisation approach i e building an IT system using the metaphor of a city This concept is based on the fact that in constructing or reorganising information systems the reconstruction and modernisation involves permanent elements as are found in a city Although relatively new this approach has been successfully employed in a number of projects over the past few years The practical approach given in this book allows enterprises or organisations trying to safeguard the efficiency of their IT system while minimising costs and risk to implement the theory and put it into practice

Enterprise Architecture Turnaround Nagesh V. Anupindi, Gerard A. Coady,2011-12-22 To provide structure and transparency to the complex world of IT Enterprise Architecture was created However we created complexities within Enterprise Architecture with Frameworks that are not easily understandable and purposefully implementable In this book Nagesh and Gerry help to turnaround Enterprise Architecture organizations They introduce a

simple IDEA Framework that is based on common practices and investments within IT organizations The Ten deliverables presented in this book bring structure and clarity to IT organizations that are 10 people IT shops and 1000 IT staff enterprises alike This book is not an ivory tower work it is actionable applied Enterprise Architecture It is also a healthy dose of EA tough love If you want to know why EA fails read the second chapter It is introspective it does not blame external forces the not my fault syndrome It also does not blame in fact it hardly mentions technology To be fair the Nagesh and Gerry do recognize external influences however they are viewed as risks that must be managed Most corporations focus on this years budget investments and rewards The same focus rolls downhill to the Information Technology department If the IT department has not successfully communicated the budget and managed to spend it within the limits 10% variance everything else may seem irrelevant Eventually Nagesh and Gerry started looking through current IT systems and IT assets to understand a where the current funds were being invested b how these investments jelled or were mandated because of the previous investments that had been made by IT and c how the companys business priorities aligned with future technology needs including the need to meet compliance requirements Considering and discovering the answers to these three questions led Nagesh and Gerry to develop a definition of Enterprise Architecture that was based on technology investments Investment Driven Enterprise Architecture IDEA Framework The purpose of the IDEA Framework is to provide guidance on how the corporations future technology will be drafted and communicated Its method is to utilize actual systems hardware people and business functions in order to establish boundaries within which the IDEA Framework will work The structure of the IDEA Framework differs from that of many others because it consists of key deliverables that fit into day to day activities and it accommodates an enterprise wide strategic plan It also provides for the much needed interaction between these key deliverables and facilitates contributions from key stakeholders across Business Units and the various IT departments In essence the IDEA Framework takes the key deliverables stakeholders and organizations and demonstrates how they dynamically function together

Landscape Paradigms and Post-urban Spaces Roberto Pasini, 2018-07-07 This book presents 1 an urban studies panorama on the emergence of a built landscape continuum following the anthropic expansion at the geographic scale and the consequent demise of the city/country divide 2 an in depth theoretical analysis of disparate landscape constructs culminating in the proposal of a comprehensive spatial paradigm addressing both manmade and natural contexts 3 the in situ transcription of the proposed spatial paradigm into a landscape installation implementing a territorial narrative in the Sierra Madre Oriental of Mexico. Foreword by Peter G. Rowe and afterword by Elisa C. Cattaneo. By virtue of its openness, fluidity and volatility fluctuating between heterogeneity and diversity, today's built landscape continuum exhibits analogies with distinct notions of landscape. The book determines an open-ended classification of contemporary space-making strategies exceeding the urban and metropolitan ambit through a comparative anatomy of global case studies ranging from hard to soft geotechnics or applied geographies, machinic micro-ecologies, aesthetic prostheses for operative metabolism, cybernetic utopias, atmospheric assemblages, psychic spheres, creole horizons, semiotic landscapes, geopolitical landscapes, geophilosophical excavations. The proposed spatial paradigm accommodating aggregates of artificial and living systems, physical and mental spaces and machinic and cultural landscapes intends to

reconcile the traditionally opposed scientific cognitive metabolist and cultural geophilosophical territorialist visions of the landscape The resulting model transcends the exhausted myths of urban space metropolitanism and their filiations in favor of a new form of urbanity and its attributes Parts of the work were developed in the frame of research projects of Universidad de Monterrey and Parque Ecológico Chipinque and the IDAUP of UniFE and Polis The target audience of the book is researchers teachers and advanced students engaged in landscape and urban studies with a prevalent focus on theory The book can also benefit professional and institutional audiences looking for ethical methodological orientation
