**Strategies for Inclusive Growth and Sustainable Economic Development** Prof. G. Sudarsana Reddy, Prof. B. Shekhar Prof. P. Paramashivaiah, **The Future of Entrepreneurship in Southern Africa** Patient Rambe, Robert Ebo Hinson, 2024-06-01 This edited collection examines the impact of new technologies and new managerial and policy perspectives on entrepreneurial development in Southern Africa, paying particular attention to small and medium-sized enterprises which contribute significantly to GDP and employment but often find it difficult to survive beyond the first five years. Chapters are divided in two parts: the first covering technological perspectives and the second managerial perspectives. Africa's cultural and geographic diversity is taken into account with authors from Ghana, Lesotho, South Africa, and Zimbabwe providing regional case studies and the editors synthesising these discussions in a concluding chapter that touches on sustainability and development to working lives and livelihoods across the region. Exploring critical issues of entrepreneurial human capital development, innovation, technology, legislative frameworks, and marketing strategies, this book will be of great interest to researchers, students, and policymakers.

**Integral Innovation** Odeh Rashed Al-Jayyousi, 2017-04-21 Technology plays a critical role in transforming societies and economies through enhancing efficiency, connectivity, and access to resources and services. The challenge remains how to harness technologies to achieve sustainable development without causing harm to human and natural capitals. Professor Odeh Rashed Al-Jayyousi argues that science, technology, and innovation (STI) are underpinned by social choices and hence a transition to a sustainable green economy is defined by individuals and institutions' decisions on how to use and apply these STI developments. It is therefore important to examine closely the ways in which social institutions and processes in the integral worlds; the different perspectives of reality shape the priorities of technologies and the conditions under which their potential benefits can be reaped. He states that in order for technological innovation to provide a guarantee of sustainable economic development, it is necessary that a transfer of technology to developing countries becomes a basic principle of national development policies and that they in turn are open to adopting an explicit long-term application of technological innovation. **Integral Innovation: New Worldviews** presents a conceptual framework for the evolution of technology and innovation from a historical and cultural perspective. It provides an analysis of the role of innovation and technology in sustainable development and introduces a number of international case studies which shed light on the social learning processes for knowledge co-creation and innovation culture. It is essential reading for those interested in innovation and technology management.
