## **Environmental Renaissance:**

**Environmental Renaissance** Andrew McMurry, 2003 Through contemporary environmental philosophy and emerging paradigms in complex systems theory Andrew McMurry presents a new reading of Emerson Thoreau and the green tradition in American thought McMurry analyzes Emerson and Thoreau's foundational roles in the formation of the two main currents in American environmentalism the managerial or shallow and the radical or deep The author draws in particular on Humberto Maturana and Francisco Varela's theory of autopoiesis and the social systems theory of Niklas Luhmann These theories says McMurry give us the conceptual tools to update Emerson and Thoreau's philosophies of nature literary aesthetics and attitudes toward pastoralism for the current age of environmental risk and uncertainty McMurry's systems approach helps us to recast essentialist ultimately debilitating binaries such as nature culture wilderness civilization and wild tame along the lines of a suppler richer distinction that between self organizing systems like language or society and their environments defined simply as whatever cannot communicate with the system Such an undertaking also allows McMurry to reflect on the systemic obstacles that ecocriticism as a genre enabling positive environmental practices must confront if it is to be theoretically coherent Sophisticated and socially relevant Environmental Renaissance is both a call for critics to broaden their parameters and a warning about rhapsodizing on nature while our very life support systems are crumbling

**Environmental Renaissance**, 2022      **The Environmental Rights Revolution** David R. Boyd, 2011-11-29 The right to a healthy environment has been the subject of extensive philosophical debates that revolve around the question Should rights to clean air water and soil be entrenched in law David Boyd answers this by moving beyond theoretical debates to measure the practical effects of enshrining the right in constitutions His pioneering analysis of 193 constitutions and the laws and court decisions of more than 100 nations in Europe Latin America Asia and Africa reveals a positive correlation between constitutional protection and stronger environmental laws smaller ecological footprints superior environmental performance and improved quality of life      *Routledge Handbook of Ecocriticism and Environmental Communication* Scott Slovic, Swarnalatha Rangarajan, Vidya Sarveswaran, 2019-02-01 Ecocriticism and environmental communication studies have for many years co existed as parallel disciplines occasionally crossing paths but typically operating in separate academic spheres These fields are now rapidly converging and this handbook aims to reinforce the common concerns and methodologies of the sibling disciplines The Routledge Handbook of Ecocriticism and Environmental Communication charts the history of the relationship between ecocriticism and environmental communication studies while also highlighting key new paradigms in information studies diverse examples of practical applications of environmental communication and textual analysis and the patterns and challenges of environmental communication in non Western societies Contributors to this book include literary film and religious studies scholars communication studies specialists environmental historians practicing journalists art critics linguists ethnographers sociologists literary theorists and others but all focus their discussions on key

issues in textual representations of human nature relationships and on the challenges and possibilities of environmental communication The handbook is designed to map existing trends in both ecocriticism and environmental communication and to predict future directions This handbook will be an essential reference for teachers students and practitioners of environmental literature film journalism communication and rhetoric and well as the broader meta discipline of environmental humanities

**The Art and Craft of International Environmental Law** Daniel Bodansky, Harro van Asselt, 2024 In countless ways we are affected by international environmental norms some social others legal some quite general others very specific For example the norms limiting the refrigerants used in air conditioners have been agreed upon in legal form internationally and are mandated and enforced by national governments The sustainable fishery and forestry standards used by Carrefour and Ikea were developed more informally by environmental groups and businesses and are applied to producers through supply chain contracts without any government involvement The reluctance to eat tuna fish or own elephant ivory reflects more general social norms disseminated through education and culture How and why do these norms arise In what ways do they affect behavior Do they change what states and individuals actually do and if so why How effective are they in solving international environmental problems In the second edition of *The Art and Craft of International Environmental Law* Daniel Bodansky and Harro van Asselt explore these and other questions Revisions cover the numerous developments spanning the 13 years since the first edition was published New chapters address the growing role of environmental NGOs and the increasingly complex architecture of environmental law involving multiple institutions levels of governance and actors Recent research has been incorporated on treaty design and policy implementation and effectiveness and greater attention has been given to the role of the judiciary in standard setting implementation and enforcement A sophisticated yet highly readable introduction to how international environmental law works and sometimes doesn't work this book is essential reading for a wide audience

**Encyclopedia of the Environment in American Literature** Geoff Hamilton, Brian Jones, 2014-01-10 This encyclopedia introduces readers to American poetry fiction and nonfiction with a focus on the environment broadly defined as humanity's natural surroundings from the discovery of America through the present The work includes biographical and literary entries on material from early explorers and colonists such as Columbus Bartolome de Las Casas and Thomas Harriot Native American creation myths canonical 18th and 19th century works of Jefferson Emerson Thoreau Whitman Hawthorne Twain Dickinson and others to more recent figures such as Jack London Ernest Hemingway Norman Mailer Stanley Cavell Rachel Carson Jon Krakauer and Al Gore It is meant to provide a synoptic appreciation of how the very concept of the environment has changed over the past five centuries offering both a general introduction to the topic and a valuable resource for high school and university courses focused on environmental issues

*Underdogma* Michael Prell, 2011-02-01 Analyzing and refuting the common assumptions of anti Americanism is a critical contribution to the global political debate Thank goodness for this effort UN Ambassador John Bolton author of *Surrender* is

Not an Option David versus Goliath the American Revolutionaries The Little Engine That Could Team USA's Miracle on Ice the Star Wars Rebel Alliance Rocky Balboa the Jamaican bobsled team and the meek inheriting the Earth Everyone it seems loves an underdog Why is that We begin life tiny and helpless at the mercy of those who are bigger and more powerful than us parents and guardians who tell us what to eat what to wear how to behave even when to sleep and wake up From childhood into adulthood we're told what to do by those who wield more power our parents teachers bosses government So naturally we have a predisposition to resent the overdogs and root for the little guy But this tendency which international political consultant and human rights activist Michael Prell calls underdogma can be very dangerous both to America and to the world at large In Underdogma Prell who has worked world leaders including Israeli Prime Minister Benjamin Netanyahu the Australian and Canadian prime ministers and the Dalai Lama explores our love hate relationship with power within our culture and our politics Underdogma explains seeming mysteries such as why Almost half of Americans blamed President Bush for the attacks of 9/11 even while the American media described the architect of these attacks as thoughtful about his cause and craft and folksy Gays and lesbians protest those who protect gay rights America Israel while championing those who outlaw and execute homosexuals Palestine Environmentalists focus their rage on America even though China is the largest emitter of greenhouse gases The United Nations elevates countries such as Sudan to full membership on the UN's Commission on Human Rights even as the ethnic cleansing of Darfur proceeds Tracing the evolution of this belief system through human history ancient Greece to Marxism to the dawn of political correctness Prell shows what continuing with this collective mindset means for our future While America and its president increasingly exalt the meek and apologize for their power America's competitors and enemies are moving in a different direction China is projected to overtake the U.S. economically by 2027 and is ready to move into the position of hegemon and radical Islamists are looking to extend their global territory taking any sign of weakness as a chance to attack America must return to its founding spirit and underdogma must stop now our nation depends on it

experiment how might humanity's enhanced relationship with the natural world generate a new kind of sustaining and sustainable social order beyond the traditional boundaries of the church the state and the biological family Challenging the current scholarly consensus that reads Walton's how to manual as a conservative polemic camouflaged by fishlore Marjorie Swann examines this richly complicated portrayal of the natural world through an ecocritical lens and explores other neglected aspects of Walton's writings including his depictions of social hierarchy gender and sexuality In the process Swann analyzes a host of noncanonical environmental texts and provides a groundbreaking reappraisal of Charles Cotton's Part II of *The Compleat Angler* This study extends the hydrological turn in early modern ecocriticism and demonstrates how as a genre angling manuals provide new insights into the environmental cultural social and literary history of early modern England Taking its place alongside landmark works of ecocriticism such as *Green Shakespeare* and *Milton and Ecology* this fresh and timely reassessment of *The Compleat Angler* rightly ranks Izaak Walton among the most important environmental writers of the early modern era *New Land for Old* Stephen J. book examines the ecological concerns that naturalist narratives reflect such as land and water use waste management and environmental pollution previously unaddressed in a book length study     *Taiwan Recent Economic and Political Developments Yearbook* IBP USA,2013-08 2011 Updated Reprint Updated Annually Taiwan Recent Economic and Political Developments Yearbook     **Regulation and Planning** Yvonne Rydin,Robert Beauregard,Marco Cremaschi,Laura Lieto,2021-09-30 In Regulation and Planning planning scholars from the United Kingdom France Italy Sweden Canada Australia and the United States explore how planning regulations are negotiated amid layers of normative considerations It treats regulation not simply as a set of legal guidelines to be compared against proposed actions but as a social practice in which issues of governmental legitimacy cultural understandings materiality and power are contested Each chapter addresses an actual instance of planning regulation including among others a dispute about a proposed Apple store in a public park in Stockholm the procedures by which building codes are managed by planners in Napoli the role that design plays in regulating the use of public space in a new Paris neighbourhood and the influence of plans on the regulation of development in Malm and Cambridge Collectively the volume probes the institutions and practices that give meaning and consequence to planning regulations For planning students learning about what it means to plan planning researchers striving to understand the influence of planners on urban development and planning practitioners interested in reflecting on practices that occupy a great deal of their time this is an indispensable book
