Environmental Groups:

Directory of Environmental Groups in the U. S. Environmental Protection Agency's Region II United States. Environmental Protection Agency. Region II.,1976 *Environmental Groups and Legal Expertise* Carolyn Abbot ,Maria Lee ,2021-03-04 Environmental Groups and Legal Expertise explores the use and understanding of law and legal expertise by environmental groups Rather than the usual focus on the court room it scrutinises environmental NGO advocacy during the extraordinarily dramatic Brexit process from the referendum on leaving the EU in June 2016 to the debate around the new Environment Bill in the first half of 2020 There is generally a weak understanding of both the complexity and the potential of legal expertise in the environmental NGO community Legal expertise can be more than a tool for campaigners and more than litigation it provides distinctive ways of both seeing the world and changing the world The available legal resource in the sector is not just a practical limit on what can be done but spills into the very understanding of what should be done and what resource is needed Mutually reinforcing links between capacity understanding culture and investment affect legal expertise across the board There are however pockets of sophisticated legal expertise in the community and legal expertise was heavily and often effectively used in the anomalously law heavy Brexit environment debate The ability to call on thinly spread legal expertise in a crisis was in part due to effective NGO collaboration around Brexit environment

Environmental Pressure Groups in Transition Peter Rawcliffe,1998 Presents a detailed study of the changing nature of environmental pressure groups since the 1980s The book concentrates on the most important national campaigning groups through which environmental pressure has been channelled in Britain *The Greenpeace Guide to Anti-environmental Organizations* Carl Deal,Greenpeace USA.,1993 Since most Americans today consider themselves environmentalists ecologically destructive industries are now creating elaborate front groups that masquerade as environmental organizations In this ground breaking book Greenpeace writer Carl Deal lists these groups their real agendas and where possible their corporate sponsors An eye opener for anyone who s concerned about the environment

Environment and Conservation in Energy Research and Development Council on Environmental Quality (U.S.),1976 *Agriculture, Trade, And The Environment* Maury E. Bredahl,2019-03-13 In this timely volume an international group of economists trade negotiators and environmentalists brings diverse perspectives to bear on the contentious issue of international trade and the environment Providing a conceptual framework to help assess the issues the contributors discuss three themes the dimensions of the economic and political **British Politics and the Environment** John McCormick,2013-11-05 Britain has an immense range of environmental law and the reputation for largely ignoring it John McCormick describes the fascinating story of the political growth of that law and the pressures the compromises the parliamentary and civil service opportunism that allowed the edifice to grow over the greater part of a century He tells the story of the absolute change in political climate over the last ten years and deciphers the nature of Thatcher s conversion to

greenery He explains why everyone who cared about the environment became embattled and above all how the old methods of sensible compromise were banished probably for ever not least because of the government's obsession with secrecy What then are the new political means of compelling change on a reluctant parliament Everything is at stake from welfare to water from forests to fishing Where are we now What are the likely pressures both internal and from Europe and the rest of the world to make Britain pass more environmentally sound laws and perhaps more importantly to observe them McCormick provides a gripping picture of the central issues of the system and of the battleground Originally published in 1991

Local Environmental Movements Pradyumna Karan, Unryu Suganuma, 2008-07-25 In light of increasing evidence demonstrating the irreparable damage humans have inflicted on the planet some have adopted a defeatist attitude toward environmental crises Local Environmental Movements A Comparative Study of the United States and Japan illustrates how local groups in both Japan and the United States are refusing to surrender the earth to a depleted and polluted fate Drawing on a series of case studies a team of scholars from across the world discusses the efforts by grassroots organizations to promote sustainable development that respects the need for environmental protection and cultural preservation

American Environmentalism J. Michael Martinez, 2013-06-20 Protecting the natural environment and promoting sustainability have become important objectives but achieving such goals presents myriad challenges for even the most committed environmentalist American Environmentalism Philosophy History and Public Policy examines whether competing interests can be reconciled while developing consistent cohe

Public Policymaking in Hong Kong Eliza W.Y. Lee, Elaine Y.M. Chan, Joseph C.W. Chan, Peter T.Y. Cheung, Wai Fung Lam, Wai Man Lam, 2013-02-11 Why and how has civic engagement emerged in the policy process of Hong Kong as an Asian semi democratic state This book attempts to answer this question through examining six cases that straddle diverse policy domains It identifies three explanatory factors namely the profile of a policy domain the structure of societal interest and the strength of the civil society sector as important in shaping the state's strategy in managing society hence its propensity to engage These factors affect the outcome through dynamic interaction between the state and societal actors The findings outlined in the book show that the development of civic engagement in Hong Kong consists of both society led and state led cases Society led development brought about a high degree of openness and inclusiveness whereas state led civic engagement practices tended to be tactics utilized by the state for appeasing or depoliticizing civil society Compared with other Asian regimes the use of transgressive contention as a way to compel the state to engage society is a feature that stands out in the liberal autocratic regime in Hong Kong

A Green Dimension for the European Community David Judge, 2014-03-05 First Published in 1993 A Green Dimension for the European Community is a collection of nine essays from a range of contributors separated into two parts political issues and processes The theme discusses the idea that the introduction of the Single Market marks a particularly appropriate time to consider the political issues and processes affecting environmental policy in the European Community EC

The contributors argue that at such a time and in the face of such threats an understanding of the green dimension of the EC is more than an academic exercise This title concludes with a comprehensive index *Trade and Environment* United States. Congress. Office of Technology Assessment,1992 *Natural Resources and the Environment* Mark Kanazawa,2021-05-18 *Natural Resources and the Environment* Economics Law Politics and Institutions provides a new approach to the study of environmental and natural resource economics It augments current contributions from the fields of public choice law and economics and the burgeoning field of what used to be called the New Institutional Economics to describe explain and interpret how these new developments have been applied to better understand the economics of natural resources and the environment This textbook takes a multi disciplinary approach which is essential for understanding complex environmental problems and examines the issue from not only an economic perspective but also taking into account law politics and institutions In doing so it provides students with a realistic understanding of how environmental policy is created and presents a comprehensive examination of real world environmental policy The book provides a comprehensive coverage of key issues including renewable energy climate change agriculture water resources land conservation and fisheries with each chapter accompanied by learning resources such as recommended further reading discussion questions and exercises This textbook is essential reading for students and scholars seeking to build an interdisciplinary understanding of natural resources and the environment **Social Organizations and the Authoritarian State in China** Timothy Hildebrandt,2013-02-18 Received wisdom suggests that social organizations such as non government organizations NGOs have the power to upend the political status quo However in many authoritarian contexts such as China NGO emergence has not resulted in this expected regime change In this book Timothy Hildebrandt shows how NGOs adapt to the changing interests of central and local governments working in service of the state to address social problems In doing so the nature of NGO emergence in China effectively strengthens the state rather than weakens it This book offers a groundbreaking comparative analysis of Chinese social organizations across the country in three different issue areas environmental protection HIV AIDS prevention and gay and lesbian rights It suggests a new way of thinking about state society relations in authoritarian countries one that is distinctly co dependent in nature governments require the assistance of NGOs to govern while NGOs need governments to extend political economic and personal opportunities to exist *Environmental Quality* Council on Environmental Quality (U.S.),1971 **Understanding Political Participation** Lynn Bennie,2017-05-15 Developing a framework of analysis which enables a detailed empirical investigation of Scottish Green Party membership this is a detailed assessment of why people become members of a green party The questions are particularly relevant in the light of declining political participation Lynn Bennie responds to the gap in the literature on green and small parties and builds on the work of other researchers who have used similar methods to explore membership of the larger parties The volume incorporates an extensive review of participation literature details the history of the Scottish Green Party documents

extensive survey data of party members and develops an understanding of motivations behind membership of a green party It will prove ideal for courses on political behaviour and green politics and be of interest to sociologists and political science researchers

EU Enlargement and the Environment JoAnn Carmin, Stacy D. VanDeveer, 2023-05-31 This volume focuses attention on key environmental and institutional changes associated with eastern expansion of the European Union assessing and challenging prevailing views about the outcomes and processes of this historic development Looking at four central themes capacity changes and limitations the EU s mixed messages and conflicting priorities non state actor roles and developments and the exchange of ideas and information the volume shows that enlargement will change the EU not just make it bigger and that EU officials and programs are improving aspects of environmental policy in CEE countries even as they are making others less sustainable This book was previously published as a special issue of the journal Environmental Politics

Encyclopedia of Business Ethics and Society Robert W. Kolb, 2008 This encyclopedia spans the relationships among business ethics and society with an emphasis on business ethics and the role of business in society Business Ethics and Corporate Governance Fernando A.C., 2010-09
