President,1973      Introduction to Public Health for Chiropractors Michael Haneline,William C. Meeker,2010-10-25

Public health is of concern to practicing chiropractors as well as chiropractic students. The vast majority of chiropractors utilize public health concepts every day as an integral part of patient care. For instance, they give advice on risk factors that should be avoided and protective factors to be added by their patients to enhance healing and prevent illness. Public health is also part of the curriculum at all chiropractic colleges and is tested by the National Board. No public health textbooks are available that are specifically designed for the chiropractor. Consequently, college instructors are forced to make do with class notes and generic texts that do not address the specific issues relevant to chiropractic. This book will not only be of interest to chiropractic students but also practicing chiropractors because it will provide information they can utilize to provide better care by positively intervening with their patients and their communities regarding public health matters. **Monthly Catalogue, United States Public Documents**, 1991 **Biological Assessment and Criteria** Wayne S. Davis, Thomas P. Simon, 1995-03-03. *Biological Assessment and Criteria* presents a state of the art overview of the applications of biological assessments and biocriteria for water quality management in fresh waters. The book presents case studies which illustrate how bioassessment has been used to identify and diagnose water quality problems. It also provides examples of the use of qualitative and quantitative biocriteria as regulatory tools to complement water quality criteria and standards. The first book to present the technical foundation, rationale, program and policy relevance and legal basis for the most accurate tools used to assess freshwater natural resource and regulatory efforts, this book provides useful and timely information for water quality managers. *Toxicological profile for methyl parathion*, 2001. The ATSDR toxicological profile succinctly characterizes the toxicology and adverse health effects information for the toxic substance described therein. Each peer reviewed profile identifies and reviews the key literature that describes a substance's toxicological properties. This public health statement tells you about methyl parathion and the effects of exposure.
