Collisional Narrowing and Dynamical Decoupling in a Dense Ensemble of Cold Atoms Yoav Sagi, 2012-05-23 Ultra cold atomic ensembles have emerged in recent years as a powerful tool in many body physics research quantum information science and metrology This thesis presents an experimental and theoretical study of the coherent properties of trapped atomic ensembles at high densities which are essential to many of the aforementioned applications The study focuses on how inter particle interactions modify the ensemble coherence dynamics and whether it is possible to extend the coherence time by means of external control The thesis presents a theoretical model which explains the effect of elastic collision of the coherence dynamics and then reports on experiments which test this model successfully in the lab Furthermore the work includes the first implementation of dynamical decoupling with ultra cold atomic ensembles It is demonstrated experimentally that by using dynamical decoupling the coherence time can be extended 20 fold This has a great potential to increase the usefulness of these ensembles for quantum computation

Numerical Partial Differential Equations for Environmental Scientists and Engineers Daniel R. Lynch, 2006-06-02 This book concerns the practical solution of Partial Differential Equations We assume the reader knows what a PDE is that he or she has derived some and solved them with the limited but powerful arsenal of analytic techniques We also assume that s he has gained some intuitive knowledge of their solution properties either in the context of specific applications or in the more abstract context of applied mathematics We assume the reader now wants to solve PDE s for real in the context of practical problems with all of their warts awkward geometry driven by real data variable coefficients

nonlinearities as they arise in real situations The applications we envision span classical mathematical physics and the engineering sciences fluid mechanics solid mechanics electricity and magnetism heat and mass transfer wave propagation Of course these all share a joyous interdisciplinary unity in PDE s The material arises from lectures at Dartmouth College for first year graduate students in science and engineering That audience has shared the above motivations and a mathematical background including ordinary and partial differential equations a first course in numerical analysis linear algebra complex numbers at least at the level of Fourier analysis and an ability to program modern computers Some working exposure to applications of PDE s in their research or practice has also been a common denominator This classical undergraduate preparation sets the stage for our First Practical Course Naturally the practical aspect of the course involves computation

Computing, Control, Information and Education Engineering Hsiang-Chuan Liu, Wen-Pei Sung, Wenli

Yao, 2015-08-18 This proceedings set contains selected Computer Information and Education Technology related papers from the 2015 International Conference on Computer Intelligent Computing and Education Technology CICET 2015 to be held April 11-12, 2015 in Guilin P R China The proceedings aims to provide a platform for researchers engineers and academics

A Primer on Pseudorandom Generators Oded Goldreich, 2010 The primer assumes basic familiarity with the notion of efficient algorithms and with elementary probability theory but provides a basic introduction to all notions that are actually used as a result the primer is essentially self contained although the interested reader is at times referred to other sources for more detail Book Jacket

Numerical Weather Prediction and Data Assimilation Petros Katsafados, Elias Mavromatidis, Christos Spyrou, 2020-07-16 This book has as main aim to be an introductory textbook of applied knowledge in Numerical Weather Prediction NWP which is a method of weather forecasting that employs A set of equations that describe the flow of fluids translated into computer code combined with parameterizations of other processes applied on a specific domain and integrated in the basis of initial and domain boundary conditions Current weather observations serve as input to the numerical computer models through a process called data assimilation to produce atmospheric properties in the future e g temperature precipitation and a lot of other meteorological parameters Various case studies will be also presented and analyzed through this book

[Essays on the Performance of Baroque Music](#) Mary Cyr, 2024-10-28 In this collection of essays Mary Cyr explores some of the written and unwritten performance conventions that applied to French and English music of the 17th and early 18th centuries Using composers own notations marks added by 18th century performers historical treatises and pictorial evidence she investigates both vocal and instrumental genres including opera cantatas instrumental

chamber music and solo music for the viol and violin Some of the performance conventions remain controversial such as the use of gesture by the French opera chorus and others are still little known such as the use of the double bass for rhythmic and harmonic support in early 18th century French opera As many of these essays demonstrate French Baroque music allowed performers a wider latitude of nuance and expression than is often assumed today The essays in this volume will be of particular interest to scholars and performers who are interested in adopting a historically informed approach to performing music by Henry Purcell lisabeth Claude Jacquet de La Guerre Jean Philippe Rameau and their contemporaries Several studies also deal with attributions sources and the discovery of a cantata by Rameau
