Entangling Relations:

Entangling Relations David A. Lake, 2020-07-21 Throughout what publisher Henry Luce dubbed the American century the United States has wrestled with two central questions Should it pursue its security unilaterally or in cooperation with others If the latter how can its interests be best protected against opportunism by untrustworthy partners In a major attempt to explain security relations from an institutionalist approach David A Lake shows how the answers to these questions have differed after World War I during the Cold War and today In the debate over whether to join the League of Nations the United States reaffirmed its historic policy of unilateralism After World War II however it broke decisively with tradition and embraced a new policy of cooperation with partners in Europe and Asia Today the United States is pursuing a new strategy of cooperation forming ad hoc coalitions and evincing an unprecedented willingness to shape but then work within the prevailing international consensus on the appropriate goals and means of foreign policy In interpreting these three defining moments of American foreign policy Lake draws on theories of relational contracting and poses a general theory of security relationships He arrays the variety of possible security relationships on a continuum from anarchy to hierarchy and explains actual relations as a function of three key variables the benefits from pooling security resources and efforts with others the expected costs of opportunistic behavior by partners and governance costs Lake systematically applies this theory to each of the defining moments of twentieth century American foreign policy and develops its broader implications for the study of international relations

Palgrave Handbook of Inter-Organizational Relations in World Politics Rafael

Biermann, Joachim A. Koops, 2016-11-29 This unique handbook brings together a team of leading scholars and practitioners in order to map, synthesize and assess key perspectives on cooperation and rivalry between regional and global organizations in world politics. For the first time a variety of interdisciplinary theoretical and conceptual perspectives are combined in order to assess the nature, processes and outcomes of inter-organizational partnerships and rivalries across major policy areas such as peace and security, human rights and democratisation as well as finance, development and climate change. This text provides scholars, students and policy makers of International Relations with an exhaustive reference book for understanding the theoretical and empirical dimensions of an increasingly important topic in International Relations, IR, Global Governance and related disciplines. **Realism and Institutionalism in International Studies** Michael Brecher, Frank P.

Harvey, 2009-12-11 Realism and Institutionalism in International Studies represents a unique collection of original essays by foremost scholars in the field of International Studies. Six essays advocate critique or revise Realism, the theoretical paradigm that explains international politics by emphasizing security, competition and war among states. The remaining four essays address Institutionalism, the paradigm that offers explanations for the formation, maintenance, variation and significance of international institutions. The authors reflect on the strengths and weaknesses of these approaches and suggest research agendas for the future. Together this volume provides an accessible and wide-ranging survey of the issues concerning two major paradigms in International Studies. This volume will be of interest to scholars and students alike and will undoubtedly determine the shape of future research. See table of contents and excerpts. Frank P. Harvey is Professor of Political Science and Director of the Centre for Foreign Policy Studies at Dalhousie University. Michael Brecher is the R. B. Angus Professor of Political Science at McGill University and past president of the International Studies Association. *Millennial Reflections on International Studies* This volume is part of the Millennial Reflections on International Studies project in which forty-five prominent scholars engage in self-critical state-of-the-art reflection on international studies to stimulate debates about successes and failures and to address the larger questions of progress in the discipline. Other paperbacks from this project: Conflict, Security, Foreign Policy and International Political Economy, Past Paths and Future Directions in International Studies, Evaluating Methodology, Critical Perspectives in International Studies. The full collection of essays is available in the handbook *Millennial Reflections on International Studies*. Michael Brecher, Frank P.

gaming as scholars are looking beyond the digital and virtual for the first time since the inception of game studies in the 1990s *Material Game Studies* not only supports the importance of the re turn to the analogue but proposes a materiality of play more broadly Recognizing the entanglement of physical materiality with cultural meaning the authors in this volume apply a range of theoretical approaches from material eco criticism to animal studies to examine games and play as existing within worlds of matter Different chapters focus on the material properties of board card and role playing games how they are designed and made how they are touched and played with and how they connect with other human and nonhuman things Bringing together international scholars *Material Game Studies* defines a new field of material game studies and demonstrates how it is a valuable addition to wider debates about the material turn and the place of embodied humans in a material world

Undermining American Hegemony Morten Skumsrud Andersen,Alexander Cooley,Daniel H. Nexon,2021-06-03 Advancing a new approach to the study of international order this book highlights the stakes disguised by traditional theoretical languages of power transitions and hegemonic wars Rather than direct challenges to US military power the most consequential undermining of hegemony is routine bottom up processes of international goods substitution a slow hollowing out of the existing order through competition to seek or offer alternative sources for economic military or social goods Studying how actors gain access to alternative suppliers of these public goods this volume shows how states consequently move away from the liberal international order Examining unfamiliar but crucial cases it takes the reader on a journey from local Faroese politics to Russian election observers in Central Asia to South American drug lords Broadening the debate about the role of public goods in international politics this book offers a new perspective of one of the key issues of our time
