Business Organization & Entrepreneurship Dr. Aman Gupta, Dr. Ravita Jain, Prof. Jitendra Charan, The most common interpretation of the word business refers to actual business which can be seen as any endeavour in which a person is engaged There are two categories of pursuits that can keep a man occupied economic and non economic Work or effort that is geared toward the creation of wealth is what is meant by the term economic activity To put it another way the end goal of economic activity is to make a profit A man's economic activity is referred to as his enterprise Therefore the definition of business is the creation or acquisition of products with the intention of reselling them at a profit In addition services that are provided to third parties in exchange for money must be considered part of a business One definition of business describes it as an activity undertaken by a person with the purpose of creating or gaining money by means of the purchase and sale of commodities and services The terms trade and commerce are included under the umbrella word business Trade refers to the activity of purchasing and selling different types of things When conducted within the borders of a nation a transaction of this nature is referred to as home commerce or domestic trade When business is conducted between nations that are geographically distinct from one another it is said to be foreign or international trade Commerce refers to the various services and establishments that are necessary to facilitate commerce and include warehousing grading financing transporting and insuring goods The term industry refers to all of the processes that are responsible for the extraction and manufacture of products that are then marketed for the purpose of either final consumption or future production Consequently we may claim that business equals industry trade and commerce At the end of this class we are going to talk about the many aspects of running a business Business Organization and Management' 2006 Ed.
