*The Politics of Climate Change Knowledge* Nowrin Tabassum, 2022-03-03 This book addresses political knowledge of climate change and its relation to labelling people affected by climate change either as climate refugees or as climate change induced displaced people or migrants By questioning the knowledge of climate change and subsequent labelling of people this book will spark debate in studies of global climate politics and transnational policy networks Rather than considering the issue of climate change as a given phenomenon the author explores how the politicized knowledge of climate change has been produced in international negotiations and how that knowledge is transmitted from global forums to local country levels via climate change action plans and resilience projects This book introduces the concept of multi-scalar knowledge brokers MKBs individual actors who work at multiple levels local national and international to transmit the knowledge of climate change from global level to local level The author uses the primary case study of Bangladesh to demonstrate how the dominant actors in global climate politics the Intergovernmental Panel on Climate Change IPCC the United Nations Framework Convention on Climate Change UNFCCC and the World Bank as well as the USA and the UK interact with the government and local NGOs in Bangladesh regarding

transmitting the knowledge of climate change labelling the uprooted people and implementing resilience projects This book will be of interest to students scholars and practitioners of international relations environmental politics climate change studies political ecology political geography and migration and displacement studies The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license Thanks to the support of libraries working with Knowledge Unlatched [www.knowledgeunlatched.org](http://www.knowledgeunlatched.org)

**Environmental Management of Marine Ecosystems** Md. Nazrul Islam, Sven Erik Jorgensen, 2018-03-09 Ecosystem Based Management EBM is one of the most holistic approaches to protecting marine and coastal ecosystems as it recognizes the need to protect entire marine ecosystems instead of individual species After decades of pollution habitat degradation and overfishing now climate change and ocean acidification threaten the health of the ocean in unprecedented way Environmental Management of Marine Ecosystems illustrates the current status trends and effects of climate natural disturbances and anthropogenic impacts on marine ecosystems It demonstrates how to integrate different management tools and models in an up to date multidisciplinary approach to environmental management This indispensable guide provides several case studies from around the world and creates a framework for identifying management tools and their applications in coral reefs fisheries migratory species marine islands and associated ecosystems such as mangroves and sea grass beds It discusses the physical and chemical compositions of marine ecosystems along with the threats and actions needed to protect them The application of model framework to several contemporary management issues include the modelling of harmful algal bloom dynamics understanding the dispersal of sea lice and the possible impacts on intertidal communities of the provision of novel offshore habitat The results of extensive research by an international team of contributors the Environmental Management of Marine Ecosystems is designed to inform scientists practitioners academics government and non government policymakers on the particularities of marine ecosystems and assist them in understanding the EBM approaches in means of mitigation and adaptation of human activities that result in sustainability These practices will help change the current methodologies used for resource assessment and the future regulations of marine resources [Climate Change, Disasters, and Internal Displacement in Asia and the Pacific](#) Matthew Scott, Albert Salamanca, 2020-11-15 This book examines how states in eight countries across Asia and the Pacific address internal displacement in the context of disasters and climate change The Asia and the Pacific region accounts for the majority of global disaster related displacement but the experience of the millions of individuals displaced differs according to gender age ethnicity disability caste and so forth and is dependent on the legal administrative social and economic structures and processes in place to support them This book adopts a human rights based approach investigating the role of law and policy in preventing displacement protecting people who are displaced and engendering durable solutions across cases drawn from Thailand Cambodia Indonesia the Philippines Nepal Bangladesh Vanuatu and the Solomon Islands The specific cases in the book also reflect critically on the term

displacement and the wider normative framework within which this phenomenon is conceptualised and addressed The book will be of interest to students researchers and practitioners working at the intersection of human rights human mobility development disaster risk reduction and management and climate change adaptation      *Selected Water Resources Abstracts* ,1991      **World Water Resources at the Beginning of the Twenty-First Century** I.
