Educating for Sustainability in Primary Schools Neil Taylor, Frances Quinn, Chris Eames, 2015-06-17 Education for Sustainability is a key priority in today's schools as our society seeks to find a balance between environmental social cultural political and economic imperatives that affect our future As young children will become the next generation of adults it is vital that they are educated about sustainability issues so that they can learn to make informed decisions and take positive action for a sustainable world Teachers are ideally placed to educate for sustainability issues and indeed have a responsibility to do so However they often lack support and experience in this area and constraints of current curriculum priorities can inhibit Education for Sustainability being taught effectively in many classrooms Educating for Sustainability in Primary Schools Teaching for the Future addresses this problem by showing how Education for Sustainability can be developed within and across all areas of the primary curriculum in the Australian and New Zealand contexts The book provides a range of educational approaches and examples of activities to support teachers in addressing national requirements for teaching the major primary curriculum learning areas while simultaneously educating for sustainability This integrative approach to primary education can promote knowledge of positive attitudes towards and suitable action for sustainability in relevant meaningful enjoyable and creative ways This book is a valuable resource for all primary teachers who wish to make a real difference to educating children for the future

**Resources in Education**, 1997 *The Presented Past* B. L. Molyneux, P. G. Stone, 2003-09-02 The Presented Past is concerned with the differences between the comparatively static well understood way in which the past is presented in schools museums and at historic sites compared to the approaches currently being explored in contemporary archaeology It challenges the all too frequent representation of the past as something finished understood and objective rather than something that is constructed and therefore open to co existing interpretations and constant re interpretation Central to the book is the belief that the presentation of the past in school curricula and in museum and site interpretations will benefit from a greater use of non documentary sources derived

from archaeological study and oral histories The book suggests that a view of the past incorporating a larger body of evidence and a wider variety of understanding will help to invigorate the way history is taught The Presented Past will be of interest to teachers archaeologists cultural resource managers in fact anyone who is concerned with how the past is presented Bhutan, Towards Sustainable Development in a Unique Environment Bhutan. National Environmental Secretariat,1992 **Humanities in the Primary School** R. J. Campbell,Vivienne Little,1989 This work examines the principles on which a curriculum in primary school humanities might be based The political and cultural context of curriculum development in the humanities is not avoided and many of the contributions to this book deal with children s encounters with controversial issues
