**Proceedings of the 2005 Northeastern Recreation Research Symposium**, 2006 *Behavior and Environment* T.

Garling, R.G. Golledge, 1993-01-28 Active researchers in the areas of geography and psychology have contributed to this book. Both fields are capable of increasing our scientific knowledge of how human behavior is interfaced with the molar physical environment. Such knowledge is essential for the solution of many of today's most urgent environmental problems. Failure to constrain use of scarce resources, pollution due to human activities, creation of technological hazards and deteriorating urban quality due to vandalism and crime are all well known examples. The influence of psychology in geographical research has long been appreciated but it is only recently that psychologists have recognized they have something to learn from geography. In identifying the importance of two-way interdisciplinary communication, a psychologist and a geographer have been invited to each write a chapter in this book on a designated topic so that close comparisons can be drawn as to how the two disciplines approach the same difficulties. Since the disciplines are to some extent complementary, it is hoped that this close collaboration will have synergistic effects on the attempts of both to find solutions to environmental problems through an increased understanding of the many behavior-environment interfaces. **The Behavioural Environment** F.W.

Boal, D.N. Livingstone, 2003-09-02 Placing human action and perception at the centre of the subject, this book considers the effects of mankind on the environment, drawing particularly from William Kirk's work on the behavioural environment model. Reviewing Kirk's original model in light of recent ideological debate and extensive new evidence, this collection of essays from leading names in the field shows that a behavioural approach is essential in understanding human geography and man's relationship with the ecological environment. **General Technical Report NE**, 1980 **The Aesthetics Of Human**

**Environments** Arnold Berleant, Allen Carlson, 2007-05-24 *The Aesthetics of Human Environments* is a companion volume to Carlson's and Berleant's *The Aesthetics of Natural Environments*. Whereas the earlier collection focused on the aesthetic appreciation of nature, *The Aesthetics of Human Environments* investigates philosophical and aesthetics issues that arise from our engagement with human environments, ranging from rural landscapes to urban cityscapes. Our experience of public spaces such as shopping centers, theme parks and gardens, as well as the impact of our personal living spaces on the routine activities of our everyday life, are discussed in terms of their aesthetic value and the nature of our aesthetic appreciation. This volume will appeal to any reader concerned about the aesthetic quality of the world in which we live. *The Geographies of*

*Young People* Stuart C Aitken, 2005-07-08 *The Geographies of Young People* traces the changing scientific and societal notions of what it is to be a young person and argues that there is a need to rethink how we view childhood spaces, child development and the politics of growing up. This book brings coherency to the growing field of children's geographies by arguing that although most of it does not prescribe solutions to the moral assault against young people, it nonetheless offers

Williams,2013-04-17 An important challenge for our world is to understand how cultural understanding and geographical education can be linked and used to improve the global society We readily accept that our world is constituted by numerous groups of people who are organised

by committees tribes regions nations or continental entities How these groups interact show concern for each others well being and progress is still an unpredictable activity Intercultural tensions racial conflicts and religious clashes have all led to the challenges for enacting a constructive world Fundamental perspectives challenge moderate ones and the resulting tensions produce elements of fear doubt and distrust The extremist views of terrorist groups exaggerate these tensions to the extent that some different cultural groups do not prefer to live in peace with their neighbours Deep seated intercultural tensions predominate over peaceful co existence Such challenges may easily dominate the interaction between racial groups tribes indigenous peoples and colonisers However we know that through the sound practice of intercultural understanding cultural groups in different contexts around the world can interact and co exist successfully and productively In fact they can work together to seek to improve their society This does not mean that one group will dominate the other Rather it means that both groups work together to improve their collective lives Education has played an important role in the long term achievement of such harmony This volume has been developed to demonstrate that geographical education can be a potent force in the development of cultural understanding in different societies
