**Environmental Risk and the Press** Peter M. Sandman, 1987-01-01 Toxic spills acid rain poor air quality scarcely a day goes by without a report in the press on an environmental risk issue Nowhere is this more prevalent than in New Jersey a leading state in the production of chemicals and the state with the largest number of Superfund cleanup sites How accurate and how extensive is environmental risk reporting in the New Jersey press and what can be done to improve the quality of its coverage of environmental risk And what can we learn from the New Jersey experience Environmental Risk and the Press sets out to answer these questions The authors explore the strengths and weaknesses of environmental risk reporting in New Jersey by evaluating the state s best environmental risk stories They find that even the best stories have a number of problems and they develop a number of concrete recommendations for reporters and editors on how to improve their coverage in this area The authors also investigate the feasibility of various methods for getting environmental risk information to reporters and into their newspapers They recommend three ways to improve the quality of environmental risk information available to journalists The first is nationwide distribution of environmental press kits that include a directory of news sources a glossary of technical terms and briefings by experts on strategies for covering particular types of environmental risk situations The second is continuing education programs on environmental risk for reporters and editors The third is creating collections of relevant reference books in the offices of newspapers and broadcast stations The authors report on initial actions taken to implement these recommendations and plans for others They conclude that the broader availability of environmental risk information to the media will result in better reporting of environmental problems This book is a first step toward enhancing journalists appreciation of the importance of risk as an issue in environmental news coverage and providing them with the tools to help them act upon that heightened awareness Environmental Risk and the Press Peter M. Sandman, Michael Greenberg, David B. Sachsman, Toxic spills acid rain poor air quality scarcely a day goes by without a report in the press on an environmental risk issue Nowhere is this more prevalent than in New Jersey a leading state in the production of chemicals and the state with the largest number of Superfund cleanup sites How accurate and how extensive is environmental risk reporting in the New Jersey press and what can be done to improve the quality of its coverage of environmental risk And what can we learn from the New Jersey experience Environmental Risk and the Press sets out to answer these questions The authors explore the strengths and weaknesses of environmental risk reporting in New Jersey by evaluating the state s best environmental risk stories They find that even the best stories have a number of problems and they develop a number of concrete recommendations for reporters and editors on how to improve their coverage in this area The authors also investigate the feasibility of various methods for getting environmental risk information to reporters and into their newspapers They recommend three ways to improve the quality of environmental risk information available to journalists The first is nationwide distribution of environmental press kits that include a directory of news sources a glossary

of technical terms and briefings by experts on strategies for covering particular types of environmental risk situations The second is continuing education programs on environmental risk for reporters and editors The third is creating collections of relevant reference books in the offices of newspapers and broadcast stations The authors report on initial actions taken to implement these recommendations and plans for others They conclude that the broader availability of environmental risk information to the media will result in better reporting of environmental problems This book is a first step toward enhancing journalists appreciation of the importance of risk as an issue in environmental news coverage and providing them with the tools to help them act upon that heightened awareness

**But is it True?** Aaron B. Wildavsky, 1995 Amid the chaos of questions and conflicting information Aaron Wildavsky arrives with just what the beleaguered citizen needs a clear fair and factual look at how the rival claims of environmentalists and industrialists work what they mean and where to start sorting them out

*The Environment and the Press* Mark Neuzil, 2008-07-16 This history of environmental journalism looks at how the practice now defines issues and sets the public agenda evolving from a tradition that includes the works of authors such as Pliny the Elder John Muir and Rachel Carson It makes the case that the relationship between the media and its audience is an ongoing conversation between society and the media on what matters and what should matter

Christopher Rootes, 2003 Based upon an analysis of the protest events reported in one quality newspaper in each of eight countries during the ten years 1988 to 1997 this is the first systematically comparative study of environmental protest in a representative cross section of EU member states It breaks entirely new ground in the study of environmental politics in Europe and is a major contribution to the study of protest events

**The Routledge Handbook of Environment and Communication** Anders Hansen, Robert Cox, 2015-03-05 This Handbook provides a comprehensive statement and reference point for theory research and practice with regard to environment and communication and it does this from a perspective which is both international and multi disciplinary in scope Offering comprehensive critical reviews of the history and state of the art of research into the key dimensions of environmental communication the chapters of this handbook together demonstrate the strengths of multi disciplinary and cross disciplinary approaches to understanding the centrality of communication to how the environment is constructed and indeed contested socially politically and culturally Organised in five thematic sections The Routledge Handbook of Environment and Communication includes contributions from internationally recognised leaders in the field The first section looks at the history and development of the discipline from a range of theoretical perspectives Section two considers the sources communicators and media professionals involved in producing environmental communication Section three examines research on news entertainment media and cultural representations of the environment The fourth section looks at the social and political implications of environmental communication with the final section discussing likely future trajectories for the field The first reference Handbook to offer a state of the art comprehensive overview of the emerging field of environmental communication research this authoritative text is a must for

*The Symbolic Earth* James G. Cantrill, Christine L. Oravec, 2021-10-21 The core dilemma in environmental advocacy may be illustrated by the question When we communicate about the world should we stress what we know or what we feel The contributors to *The Symbolic Earth* argue that it is more important to decide how we should talk about what we know and feel In their view the environment is largely a product of how we talk about the world Because the environment is a social construction the only hope we have of preserving it is to understand and alter the fundamental ways we discuss it This collection first examines the ways in which discourse creates environment perceptions Subjects discussed range from the description of natural scenery to the advocacy of political interest groups from the everyday interactions of citizens facing environmental crises to the greenwashing of corporate imagemakers and from the psychology of the mass public to the social constructions of the mass media The authors include nationally known scholars of environmental history rhetorical theory ethnography communication and journalism studies public policy and media criticism

**Environmental Sociology** John A. Hannigan, 1995 John Hannigan argues that society's unwillingness to recognize and solve environmental problems rests primarily upon the claims making activities of a number of issue entrepreneurs in science mass media and politics

*Risky Business* Michael D. Mehta, 2005-01-01 This David and Goliath story chronicles and analyzes how a small under funded public interest group Durham Nuclear Awareness of Oshawa Ontario mobilized opposition to the December 1994 re licensing of the Pickering Nuclear Generating Station Michael D Mehta explores the struggle between Durham Nuclear Awareness and Canada's nuclear establishment to illustrate how risk as a concept can be used to understand contemporary political conflicts

**Disaster Forensics** Anthony J. Masys, 2016-09-03 This book aims to uncover the root causes of natural and man made disasters by going beyond the typical reports and case studies conducted post disaster It opens the black box of disasters by presenting forensic analysis approaches to disasters thereby revealing the complex causality that characterizes them and explaining how and why hazards do or do not become disasters This yields systemic strategies for managing disasters

Recently the global threat landscape has seen the emergence of high impact low probability events Events like Hurricane Katrina the Great Japan Earthquake and tsunami Hurricane Sandy Super Typhoon Haiyan global terrorist activities have become the new norm Extreme events challenge our understanding regarding the interdependencies and complexity of the disaster aetiology and are often referred to as Black Swans Between 2002 and 2011 there were 4130 disasters recorded that resulted from natural hazards around the world In these 1 117 527 people perished and a minimum of US 1 195 billion in losses were reported In the year 2011 alone 302 disasters claimed 29 782 lives affected 206 million people and inflicted

damages worth a minimum of estimated US 366 billion      **Environmental Protest in Western Europe** Chris Rootes, 2003-12-11 A major contribution to the study of protest events this text is a systematically comparative study of environmental protests in a representative cross section of EU member states      **Mercury Pollution** Sharon L. Zuber, Michael C.
