## **Enlightenment And Its Shadows:**

*Shadows and Enlightenment* Michael Baxandall, 1997-01-01 Shadows are holes in light We see them all the time and sometimes we notice them but their part in our visual experience of the world is mysterious In this book an art historian draws on contemporary cognitive science eighteenth century theories of visual perception and art history to discuss shadows and the visual knowledge they can offer The Enlightenment and Its Shadows Peter Hulme, L. J. Jordanova, 1990-01-01

**Inventing the American Primitive** Helen Carr, 1996-07 Inventing the American Primitive examines a body of work both literary and anthropological that describes inscribes translates and transforms Native American myths and poetry Drawing on post colonial and feminist theory as well as ethnography s recent textual turn Carr reveals the conflicts and ambivalence in these texts Through their writings the writers and anthropologists studied were attempting to preserve a culture which their country with their help or connivance sought to destroy The contradictions and tensions of this position run throughout their work Although there is no simple narrative of progress in this story as it moves from the eighteenth century primitivism to twentieth century modernism the book shows the process by which the richness and complexity of Native American traditions came to be acknowledged The Sciences in Enlightened Europe William Clark, Jan Golinski, Simon

Schaffer, 1999-07 Radically reorienting our understanding of the Enlightenment this book explores the complex relations between enlightened values and the making of scientific knowledge Here monsters and automata barometers and botanical gardens polite academics and boisterous clubs plans for violent wars and for universal peace are all relocated in the landscape of enlightened Europe The contributors show how changing forms of discipline machinery and instrumentation affected the emergence of new kinds of knowledge consider how institutions of public taste and conversation helped provide a common frame for the study of human and nonhuman natures and explore the regional operations of scientific culture at the geographical fringes of Europe Covering a wide range of scientific disciplines both in the principal European countries and in areas peripheral to Europe the book also includes ample illustrations and an extensive bibliography Implicated in the rise of both fascism and liberal secularism the moral and political values that shaped the Enlightenment remain controversial today Through careful scrutiny of how these values influenced and were influenced by the concrete practices of its sciences this book gives us an entirely new sense of the Enlightenment from back cover The Shadow and Its Shadow Paul Hammond, 1991 *Expanding Fields of Architectural Discourse and Practice* Matthew Butcher, Megan

O'Shea, 2020-11-27 Expanding Fields of Architectural Discourse and Practice presents a selection of essays architectural experiments and works that explore the diversity within the fields of contemporary architectural practice and discourse Specific in this selection is the question of how and why architecture can and should manifest in a critical and reflective capacity as well as to examine how the discipline currently resonates with contemporary art practice It does so by reflecting on the first 10 years of the architectural journal P E A R 2009 to 2019 The volume argues that the initial aims of the journal

to explore and celebrate the myriad forms through which architecture can exist are now more relevant than ever to contemporary architectural discourse and practice Included in the volume are architectural practitioners design researchers artists architectural theorists historians journalists curators and a paleobiologist all of whom contributed to the first seven issues of the journal Here they provide a unique presentation of architectural discourse and practice that seeks to test new ground while forming distinct relationships to recent and more longstanding historical legacies Praise for Expanding Fields of Architectural Discourse and Practice The story told by the authors of this work can thus be considered as the central tool of an architectural transgression Critique d art *Coloniality in Discourse Studies* Solange Maria de Barros, Viviane Resende, 2022-08-29 The volume examines the discourse based critique of coloniality It brings together an extensive interdisciplinary dialogue that reveals what different research fields such as sociology of language social psychology history and political science among others have to say about discourse criticism and de coloniality In doing so it also invites a critique of critical thinking acknowledging the relevance of dissonant voices that arise from this debate The essays in this volume discuss possibilities to decolonize discursive studies without losing sight of its contradictions The book delves into how one can as an intellectual who enjoys the privileges of coloniality in academic environments of the Global North deal with the limitations and paradox of a radical critique through discourse It discusses how ideas entrenched in privilege can be extracted shared and applied while ensuring the radicality of their local contextualization These ideas then must not only make sense within themselves but also resonate with other contexts readings and peoples in the South without repeating the mistakes of hermetic scholarly lexicons A key reading on decoloniality critical thinking methodologies ideas ideologies language and critical discourse analysis this volume will be of immense interest to scholar and researchers of language and literature political science the social sciences and Global South Studies **In the Spirit of Hegel** Robert C.
