entered a sustained period of crisis In order to understand the forces that created our current social world we need the tools provided by a critical sociology This volume draws upon the work of contemporary critical sociologists searching for the roots of our present social and economic problems Both prominent figures and emerging voices in sociology come together to offer insights into our present dilemmas from a critical perspective The questions they ask and attempt to answer include What is critical sociology What is the significance of the new Obama administration What tools do post structuralism postmodernism feminism and new forms of social theory offer critical discourse *Western Europe, Eastern Europe and World Development 13th-18th Centuries* ,2009-10-23 This collection of essays is most welcome The main articles of Marian Ma owist are collected together and in many cases translated into English for the first time Ma owist who is one of the major economic historians of the twentieth century is also a much neglected one Of the eighteen articles here only five were published in English language journals that are widely read by historians and social scientists and even these journals are primarily read by economic historians So most scholars have been missing out on one of the most fertile and cultivated minds who have written on the central issue of our times the wide and widening gulf between the core and the periphery the North and the South western and eastern Europe Immanuel Wallerstein **Profitable Ideas** Micheal O'Flynn,2009 Scholarly attempts to explain the development of liberal individualism over the course of modern history have tended to focus on key principles and doctrines The emergence and spread of individualist ideas has been scrutinised to an extent but with insufficient attention to the manner in which they have been bound up with the opportunities and obstacles to accumulation at different stages of capitalist development To this end this book shows that as the capitalist system develops continuously generating new interests and societal conflicts the theories doctrines and moral precepts comprising liberal individualism change and evolve while its vital social function is preserved The Destiny of Modern Societies Milan Zafirovski,2009 This book is a sociological analysis of the relationship between modern society in particular America and Calvinism in the Weberian tradition While the book continues this tradition it further expands elaborates on and goes beyond earlier sociological analyses The book examines the impact of Calvinism on modern society as a whole thus extending elaborating on and going beyond the previous analyses of the influence of the Calvinist religion only on the capitalist economy It analyzes how Calvinism has determined most contemporary social institutions including political civic cultural and economic in its respective societies particularly through its derivative Puritanism America For that purpose the book applies the idea of the destiny of societies or nations to American society in particular It argues demonstrates and illustrates the Calvinist societal predestination through the Puritan determination of American society Manifesto of the Critical Theory of Society and Religion (3 vols.) Rudolf Siebert,2010-08-16 The Manifesto develops further the Critical Theory of Religion intrinsic to the Critical Theory of Society of the Frankfurt School into a new paradigm of the Psychology Sociology Philosophy and Theology of Religion Its central theme is the theodicy problem The Manifesto approaches this theme in the framework of comparative

religion and critical political theology in a narrative and discursive fashion In search of a solution to the theodicy problem the Manifesto explores trends in civil society toward Alternative Future I the Totally Administered Society Alternative Future II the Militarized Society and Alternative Future III the Reconciled Society in the horizon of the longing for the Wholly Other as perfect justice and unconditional love Toward that goal it relies on both the critical theory of society as developed by Max Horkheimer Ernst Bloch Walter Benjamin Theodor W Adorno and others and on the new political theology of Johannes B Metz Helmut Peukert and Edmund Arens

*Dialectic of Solidarity* Mark Worrell, 2008-07-31 During World War II it appeared that American workers in uniform had all that was required to defend democracy on the battlefields yet on the domestic front the working class as it turned out was ideologically inconsistent when it came to democracy Could battles against tyranny be won abroad only to lose the war back home This was the question the Institute of Social Research the famous Frankfurt School asked in 1944 when it embarked upon an important study of the American working class *Dialectic of Solidarity* draws upon unpublished research reports of the Frankfurt School and represents a unique and multidimensional view of the political imagination of the wartime American worker and the role of antisemitism as the spearhead of fascism
