Entangled Evolutions Media And Democratization In Eastern Europe:

Entangled Evolutions Peter Gross, 2002-05-08 The revolutions of 1989 swept away Eastern Europe's communist governments and created expectations on the part of many observers that post communist media would lead the liberated societies in establishing and embracing democratic political cultures Peter Gross finds that it was utopian to hold such expectations of the media in societies in transition On the one hand those countries media professionals had all learned their jobs under the communist regimes and could not instantly transform themselves into guides for a politically enabled populace Gross argues On the other hand newcomers to the media world even those who were notable literary figures viewed themselves as social and political leaders rather than mere informers and facilitators of the resocialization required to form new democracies The news media have remained highly politicized and partisan So how are the media civil society and political culture related in societies in transition And can changes in these relationships be anticipated To address these questions *Entangled Evolutions* examines media in post 1989 Eastern Europe It studies the effects of privatization of the media journalists relations to political figures institutional structures such as media laws professional journalistic culture and the media's relation to their market Sources include interviews with journalists and politicians sociological and political data from national surveys and media audience studies

East Central Europe since 1989 Sabrina P. Ramet, Lavinia Stan, 2024-12-12 This groundbreaking treatment of post-communist developments in East Central Europe examines politics, economics, media, religious institutions, transitional justice, gender inequality and literature, highlighting the overt functions, latent functions and side effects associated with each sphere. Communism in East Central Europe had cracks from the beginning as uprisings in East Germany in 1953 and Hungary in 1956 demonstrated. But with the establishment of the Independent Trade Union Solidarity in Poland in the Summer of 1980, communism went into steady decline and between 1988 and 1991 crumbled. What followed has been an unsteady transition to various forms of often corrupt pluralism, with democracy doing best in the Czech Republic, with the exception of the years 2017-2021, and Slovenia, and worst in Hungary, Albania, Serbia and Bosnia Herzegovina. Drawing on the functionalist theory of Robert K. Merton, the authors examine what policymakers, communist and post-communist were or are trying to accomplish, the intended and unintended results of these policies and the side effects they have produced. This volume will be of interest not only to specialists in East Central Europe but also to graduate and undergraduate students, members of the diplomatic corps and general readers.

Inside the Mechanisms of Romanian Modernization Florin Grancea, 2006-09-05 This book analyzes in the relation with the Romanian modernity the transformations of the Romanian public sphere political system and journalism from the beginning of the 19th Century up to 2005 The argumentation starts from the idea that the Romanian Enlightenment never had the chance to reach its purpose the creation of the individual as a human category As a consequence of this historical fact the Romanian modernity was not explored in all its dimensions and was not congruent with its western model of development Only after late 90 s signs for a surpassing historical backwardness were seen in Romania and only after the integration into EU become sure From this perspective this book looks onto the change in the modernization engine of Romania in late 90 s This change is happening as a transgression from a three steps modernization model in which the role of the elite is central to a two steps modernization model in which the role of the elite is minimal Because the three steps modernization model fits the idea of an acclamatory public sphere while the two steps modernization engine fits the concept of civil public sphere this book proves that the Romanian democracy is evolving from its totalitarian background to become a participative democracy The only question unanswered yet is if the elite and the mass media are willing to let Romania and its citizens to breakup the ties with the totalitarian past

China's Peaceful Rise in a Global Context Jinghao Zhou, 2010-04-02 China's rise has become inevitable but there is no agreement about whether China will rise peacefully or pose a threat to the United States The author asserts that both theories of China threat and peaceful rise failed to address China's central domestic problem Thus both theories are not convincing This book attempts to develop a third view of China's rise from a domestic perspective and contends that China's potential threat to the existing global order is not derived from her rapid economic growth and military expansion but from her potential domestic chaos A strong democratic China will contribute to the global peace but the collapse of China will gravely threaten Western societies The current Chinese political system directly contributes to this

social instability and could possibly cause China's social crash. China's democratization is the key to ensure China's peaceful rise in a global context. However, the Party is still in power and any attempt to dissolve the one party system in present day China has poor prospects. China must take a two step gradual reform approach to complete the transition from an authoritarian regime to a democratic one. In the two step theory, the first phase for promoting China's democratization includes exercising freedom of media, increasing the consciousness of citizen participation and enacting religious rights. Through all these democratic exercises, China will gradually be able to achieve a fully democratic society. This two step theory is crucial for the United States if it is to enact effective foreign policy toward China and for China to develop a democratic harmonious society.
