Entering The University Second Edition:

Bringing Outsiders In Jennifer Hochschild, John Mollenkopf, 2011-05-02 For immigrants politics can play a significant role in determining whether and how they assimilate In *Bringing Outsiders In* leading social scientists present individual cases and work toward a comparative synthesis of how immigrants affect and are affected by civic life on both sides of the Atlantic Just as in the United States large immigrant minority communities have been emerging across Europe While these communities usually make up less than one tenth of national populations they typically have a large presence in urban areas sometimes approaching a majority That immigrants can have an even greater political salience than their population might suggest has been demonstrated in recent years in places as diverse as Sweden and France Attending to how local and national states encourage or discourage political participation the authors assess the relative involvement of immigrants in a wide range of settings Jennifer Hochschild and John Mollenkopf provide a context for the particular cases and comparisons and draw a set of analytic and empirical conclusions regarding incorporation

Enter the Undead Author George Pate, 2019-03-13 Many narratives of theater history suggest that the 1960s marked the start of a turning away from traditional script based playwright centric production practices Literary studies in this period began exploring the concept of the death of the author along similar lines But the author refused to die quietly and authorship reasserts itself in even revolutionary and avant garde theaters throughout the latter half of the twentieth century The model of authorship valorizing individuality ownership and originality serves to maintain traditional modes of production that reproduce and uphold dominant ideologies even when the products created by those modes of production claim to buck tradition or run counter to cultural currents This ideology of authorship plays a part in playwrights shutting down productions of their own plays in the privileging of individual authorship over joint authorship even in collaborative genres and in the insistence on originality even in performance traditions rooted in a shared repertoire This tension between the theoretical death of the author and the growth of actual authors abilities to control access to and even in some cases interpretations of their work exposes the deftness with which dominant ideologies and their attendant modes of production can repurpose the aesthetics of even countercultural or revolutionary movements in theater

[The Spirit Moves West](#) Rebecca Y. Kim, 2015-01-02

With the extraordinary growth of Christianity in the global south has come the rise of reverse missions in which countries in Asia Africa and Latin America send missionaries to re evangelize the West In *The Spirit Moves West* Rebecca Kim uses South Korea as a case study of how non Western missionaries target Americans particularly white Americans She draws on four years of interviews participant observation and surveys of South Korea s largest non denominational missionary sending agency University Bible Fellowship in order to provide an inside look at this growing phenomenon Known as the Asian Protestant Superpower South Korea is second only to the United States in the number of missionaries it sends abroad approximately 22 000 in over 160 countries Conducting her research both in the US and in South Korea Kim studies the motivations and methods of these Korean evangelicals who have since the 1970s sought to bring the gospel back to America By offering the first empirically grounded examination of this much discussed phenomenon Kim explores what non Western missions will mean to the future of Christianity in America and around the world

The Changing Face of World Cities Maurice Crul, John Mollenkopf, 2012-08-01

A seismic population shift is taking place as many formerly racially homogeneous cities in the West attract a diverse influx of newcomers seeking economic and social advancement In *The Changing Face of World Cities* a distinguished group of immigration experts presents the first systematic data based comparison of the lives of young adult children of immigrants growing up in seventeen big cities of Western Europe and the United States Drawing on a comprehensive set of surveys this important book brings together new evidence about the international immigrant experience and provides far reaching lessons for devising more effective public policies *The Changing Face of World Cities* pairs European and American researchers to explore how youths of immigrant origin negotiate educational systems labor markets gender neighborhoods citizenship and identity on both sides of the Atlantic Maurice Crul and his co authors compare the educational trajectories of second generation Mexicans in Los Angeles with second generation Turks in Western

European cities In the United States uneven school quality in disadvantaged immigrant neighborhoods and the high cost of college are the main barriers to educational advancement while in some European countries rigid early selection sorts many students off the college track and into dead end jobs Liza Reisel Laurence Lessard Phillips and Phil Kasinitz find that while more young members of the second generation are employed in the United States than in Europe they are also likely to hold low paying jobs that barely life them out of poverty In Europe where immigrant youth suffer from higher unemployment the embattled European welfare system still yields them a higher standard of living than many of their American counterparts Turning to issues of identity and belonging Jens Schneider Leo Ch vez Louis DeSipio and Mary Waters find that it is far easier for the children of Dominican or Mexican immigrants to identify as American in part because the United States takes hyphenated identities for granted In Europe religious bias against Islam makes it hard for young people of Turkish origin to identify strongly as German French or Swedish Editors Maurice Crul and John Mollenkopf conclude that despite the barriers these youngsters encounter on both continents they are making real progress relative to their parents and are beginning to close the gap with the native born The Changing Face of World Cities goes well beyong existing immigration literature focused on the United States experience to show that national policies on each side of the Atlantic can be enriched by lessons from the other The Changing Face of World Cities will be vital reading for anyone interested in the young people who will shape the future of our increasingly interconnected global economy *The Athenaeum* ,1901

The Law of Unmanned Aircraft Systems Benjamyn I. Scott,2022-07-12 Aerospace Law and Policy Series Volume 11 In recent years few industries have grown so prodigiously as that of unmanned aircraft systems UAS and as a result developments in national regional and international law and policy are being initiated and implemented This new edition of the definitive survey and guide first published in 2016 reflects the expansion of this sector and the importance placed on it by a diverse range of stakeholders as well as the enlarged regulatory and policy landscape In addition to updating many of the original chapters the second edition covers new topics and moves away from a purely introductory book to a more detailed and critical compendium Authorship has also been extended beyond the original scope of contributors which originally centred around those affiliated with Leiden University s Institute of Air and Space Law and now includes additional experts from all around the world each of whom explores both already existing rules and proposals coming from national regional and international levels As well as broadened discussions on such fundamental legal issues as insurance financing liability accidents investigation privacy cyber security stakeholder organisations and industry standards the second edition takes into account major recent developments in such areas as the following applicability and relevance of international regulatory instruments coming into force of the European Union UAS related laws evolution of different States national law public safety e g design production operation and maintenance development of unmanned traffic management systems commercial operations including urban air mobility e g flying taxis cargo delivery high altitude activities and developments in defence and security e g dual use counter UAS
