Entrepreneurial Function:

The Entrepreneurial Function LaRue Tone Hosmer, Arnold C. Cooper, Karl H. Vesper, 1977

Sociology: A Systematic

Introduction Harry M. Johnson, 1966-07-12 Harry M Johnson's *Sociology: A Systematic Introduction* stands as a landmark in sociological education blending scholarly rigor with accessibility. Echoing Donald Fleming's ideal of a textbook that channels consensus without stifling innovation, Johnson's book offers a coherent yet flexible account of core sociological principles. It is both a manual for students and a treatise that contributes meaningfully to the discipline. Rather than impose a rigid framework, Johnson draws upon a working consensus in sociology often associated with structural functionalism while avoiding theoretical dogmatism. He integrates a wide range of empirical evidence from diverse sources including anthropology, political science, and economics without ever losing focus on sociological relevance. This is not a superficial or oversimplified text. Instead, Johnson invites readers to think critically, offering a balanced blend of theoretical insight and empirical depth. He presents complex topics like ideology, authority, and bureaucracy with clarity and substance. The annotated bibliographies at the end of each chapter further enrich the text, guiding students toward deeper inquiry. While demanding intellectual effort, the book rewards it with understanding, not rote memorization. Johnson's lucid and graceful writing elevates the student's learning experience, making the book an enduring educational resource. It is a textbook that teaches and inspires by example, preparing students for advanced study and independent sociological thought.

The Entrepreneur in the History of Political Economy José M. Menudo, 2025-08-15 Modern economic theory has marginalised the figure of the entrepreneur despite their significance in economic activity. Entrepreneurs rose in prominence as economic agents during the Enlightenment, but no consensus on this issue was formed in the period. This book addresses the role of the entrepreneur in the economic thought of the 18th and early 19th centuries, filling a gap in the historiography of economics. The book reassesses the conflicting views on the entrepreneur held by leading economic thinkers such as Richard Cantillon, David Hume, François Quesnay, A. R. J. Turgot, Adam Smith, Jeremy Bentham, and Jean-Baptiste Say. They had differing opinions on the role of the entrepreneur in various economic debates, including economic growth, price formation, conception of production, construction of economic agents, innovation, and the market of capital. These debates and treatises highlight the importance of the entrepreneur, and yet the figure was later excluded from the classical canon in economics. This book explores the emergence of entrepreneurial activity as a recognised factor of production in economic theory, the contributions and connections of Enlightenment economists, and the reasons for the concept's disappearance. The book will be of great interest to readers in the history of economic thought, history of

Schumpeterian Perspectives on Innovation, Competition and Growth Uwe Cantner, Jean-Luc Gaffard, Lionel Nesta, 2009-07-25 Recent developments in economics have gone from the recognition of the importance of innovation for growth and the exploration of innovation mechanisms to the incorporation of the results of the previous research into economic models An important lesson to be drawn from all this research is that a purely macro based analysis of growth is not enough The various mechanisms of innovation creation and diffusion the importance of agent heterogeneity of market selection processes of the internal organization of the firm and of organizational routines and the obsolescence and the consequent emergence of new types of capital goods are a few examples of micro economic phenomena that contribute decisively to macro economic development The papers in this volume approach those issues from a Schumpeterian point of view and tackle issues like the growing importance of knowledge and human capital increasing returns and path dependence the role of variety in economic growth competition and industry evolution Crossroads of Entrepreneurship Guido
